Preface xi

1. Valuing the Ocean: An Introduction
KEVIN J. NOONE, USSIF RASHID SUMAILA AND ROBERT J. DIAZ

Purpose and Scope of the Book  2
Differential Analysis for Future Scenarios  3
Expert Survey Approach  9
The Matrix: Values, Threats, and Knowledge  9
Knowledge for Decision Support  12

2. Ocean Acidification
CAROL TURLEY

Cause and Chemistry  15
Time and Space Scales  17
Future Ocean Acidification Scenarios  21
Potential Future Effects on Physiological Processes and Behavior  25
Impacts on Communities, Food Webs, and Ecosystems  32
Conclusions  35

3. Ocean Warming
KEVIN J. NOONE AND ROBERT J. DIAZ

Introduction  45
Physical Consequences of Ocean Warming  46
Biological Consequences of Ocean Warming  57
Summary and Take-Home Messages  62

4. Hypoxia
ROBERT J. DIAZ, HANNA ERIKSSON-HÄGG AND RUTGER ROSENBERG

Key Messages  67
Introduction  68
The Heart of the Problem  71
Global Patterns in Hypoxia  73
CONTENTS

OMZs and Open Ocean Decline in Oxygen 78
Environmental Consequences of Hypoxia 81
  Economic Consequences of Hypoxia 85
  Global Change and Hypoxia 87
Restoration and the Future of Hypoxia 90

5. Sea-Level Rise
KEVIN J. NOONE
  Introduction 97
  Causes of Sea-Level Rise 97
  Observations of Sea-Level Rise 109
  Sea Level Rise in the Future 111
  Impacts of Sea-Level Rise 115

6. Marine Pollution
DAN WILHELMSSON, RICHARD C. THOMPSON, KATRIN HOLMSTRÖM, OLOF LINDÉN
  AND HANNA ERIKSSON-HAGG
  Introduction 127
  Chemical Pollution—POPs and Metals/Toxic Chemicals 129
    Oil Pollution 135
    Solid Substances 143
    Radioactive Waste 150
    Noise 152
  Present and Forecasted Impacts of Pollution on Global Marine Ecosystems 157

7. The Potential Economic Costs of the Overuse of Marine Fish Stocks
USSIF RASHID SUMAILA, WILLIAM W.L. CHEUNG AND A.D. ROGERS
  Fish and Fisheries Are Important to People 171
  Evidence of Overuse of Fish Stocks 173
  Climate Change Will Exacerbate the Problem of Overuse of Fish Stocks 179
  Global Economic Loss due to Overfishing 181
  Estimated Economic Losses 184
  Conclusion 186

8. Impacts of Multiple Stressors
JULIE HALL, ROBERT J. DIAZ, NICOLAS GRUBER AND DAN WILHELMSSON
  Introduction 193
  Global-Scale Stressors 195
  Local- and Regional-Scale Stressors 200
  Feedbacks and Synergistic Effects 203
  Concluding Remarks 215
9. Tipping Points, Uncertainty, and Precaution: Preparing for Surprise
KEVIN J. NOONE AND FRANK ACKERMAN

Introduction 223
Why Buy Insurance? 226
Making Decisions in the Dark 228
Peering into the Future 231
Shell Game 231
Pentagon Planning 233
Safe Standards and Planetary Boundaries 235

10. Valuing the Ocean Environment
FRANK ACKERMAN

Introduction 243
What Is Not Included 244
Classic Studies of the Value of Ocean Environments 247
Fisheries and Climate Change 252
Tourism and Climate Change 254
Costs of SLR 257
Stormy Weather 259
Shrinking the Ocean Carbon Sink 262
Valuing the Damages 265
Scenario Definitions 266
Fisheries 267
Sea-Level Rise 267
Storms 268
Tourism 268
Ocean Carbon Sink 269

11. Managing Multiple Human Stressors in the Ocean: A Case Study in the Pacific Ocean
WILLIAM W.L. CHEUNG AND USSIF RASHID SUMAILA

Introduction 277
Pattern of Biodiversity and Marine Living Resources 278
Key Human Pressures in the Pacific Ocean 282
Challenges to Sustainable Management of Fisheries Resources in the Pacific Ocean 283
Climate Change 287
Sustainable Management of the Pacific Ocean 294
12. Paths to Sustainable Ocean Resources

KATERYNA M. WOWK

Introduction 301
Implications of Major Threats and Policy Recommendations 303
Multiple Stressors: Putting the Pieces Together 323
Implications of Valuing Ocean Damages and Planning for Surprise 329
Pacific Region Case Study—Implications for Regional Ocean Governance 334
The Next Era of Global Ocean Governance: Paths to Sustainability 336
Concluding Recommendations 340

Index 349
