SECTION II  Design for Usability

Chapter 8  User Research by Designers................................................................. 127
  Stephen J. Ward

Chapter 9  Near Field Communication: Usability of a Technology......................... 143
  Bruce Thomas and Ramon van De Ven

Chapter 10 Empathy Meets Engineering: Implanting the User's Perspective into a Systematic Design Process.......................................................... 161
  Matthias Göbel

Chapter 11 Building Empathy with the User........................................................ 177
  Louise Moody, Elaine Mackie, and Sarah Davies

Chapter 12 Usability Testing of Three Prototype In-Vehicle Information Systems.......... 199
  Margaret J. Trotter, Eve Mitsopoulos-Rubens, and Michael G. Lenné

Chapter 13 Ergonomics and Usability in an International Context.......................... 213
  Sinja Röbig, Muriel Didier, and Ralph Bruder

Chapter 14 Consumer eHealth............................................................................. 227
  Christopher P. Nemeth and Richard I. Cook

Chapter 15 Consumer Behavior of Employees Using Information and Communication Technology Products in an Organizational Setting................................. 241
  Ken Eason

SECTION III  Case Studies

Chapter 16 Constraint-Based Approach to Design................................................ 257
  Daniel P. Jenkins, Neville A. Stanton, Paul M. Salmon, and Guy H. Walker

Chapter 17 Development of a Media Player: Ambition and Constraints in the Consumer Electronics Industry ............................................................. 271
  John Jansen and Bruce Thomas

Chapter 18 Interaction Design for Mobile Phones................................................ 285
  Wen-Chia Wang, Mark S. Young, and Steve Love
Contents

Chapter 19 Human Factors in Protective Headgear Design ................................................................. 301
  Roger Ball

Chapter 20 Creating a User-Centered Supermarket Checkout .......................................................... 315
  Matthew Lyons and David Hitchcock

Chapter 21 Design and Development of an Interactive Kiosk for Customers of Jobcentre Plus ..................................................................................................................... 335
  David Hitchcock, James O'Malley, and Peter Rogerson

Chapter 22 Participatory Method for Evaluating Office Chairs: A Case Study ..................................... 365
  Lia Buarque de Macedo Guimarães

Chapter 23 Procedural Pictorial Sequences for Health Product Design: A Study of Male and Female Condoms Conducted with Adults with a Low Level of Literacy in Brazil .......................................................................................................................... 393
  Carla Galvao Spinillo, Tiago Costa Maia, and Evelyn Rodrigues Azevedo

Chapter 24 Special Needs in Pleasure-Based Products Design: A Case Study ....................................... 407
  Erminia Attaianese

Chapter 25 Applied Anthropometry in Ergonomic Design for School Furniture .................................. 419
  Luis Carlos Paschoarelli and José Carlos Plácido da Silva

Chapter 26 Anthropometric Fitting of Office Furniture for Mexican Users ......................................... 429
  Lilia R. Prado-León

Chapter 27 User-Centered Approach for Sailing Yacht Design ............................................................ 445
  Giuseppe Di Bucchianico and Andrea Vallicelli

Chapter 28 Design for Driver's Comfort: Discomfort Assessment and Discomfort Manifestation among Professional and Amateur Car Drivers ......................................................... 465
  David Ravnik

Chapter 29 Ergonomics as a Strategy Tool: An Approach through Design ........................................... 483
  Jairo José Drummond Câmara and Róber Dias Botelho

Index ......................................................................................................................................................... 493
