1 Introduction

2 Opportunities and challenges for localising solar PV manufacturing
  2.1 Different elements of solar PV manufacturing
  2.2 Potential benefits of local solar PV manufacturing
  2.3 Competing in the global solar PV manufacturing industry

3 Promoting local manufacturing through local content requirements
  3.1 The current fashion for local content requirements
  3.2 International pressure to eliminate local content requirements
  3.3 Analysing legitimacy and effectiveness of local content requirements

4 Local content requirements in India’s National Solar Mission
  4.1 The solar landscape in India
  4.2 Policy support for solar PV
  4.3 Taking a global leadership role in solar PV manufacturing
  4.4 Evaluating the impact of local content requirements

5 Explaining limited effectiveness of local content requirements in India’s National Solar Mission
  5.1 Market size and stability
  5.2 Policy design
  5.3 Cooperation and financial incentives/consistency
  5.4 Industry sophistication and innovation potential

6 Conclusions and recommendations
