Contents

1 Introduction 1

2 The Information Economy: Literature and History of Research 5

3 The U.S. Information Economy 13
  3.1 Data and Methodology 13
  3.2 Main Findings 18
  3.3 Information–Material Decomposition at the Industry Level 22

4 Employment and Wages in the U.S. Economy 27
  4.1 Data and Methodology 27
  4.2 Main Findings 29
  4.3 Sector-wise Employment and Wage Patterns 36

5 International Trade in Information-Intensive Services 41
  5.1 Data and Definitions 41
  5.2 Main Observations 42
6 Drivers of Economic Evolution  
and Sector Growth 59

6.1 Productivity 59
6.2 Industrialization 61
6.3 Technology and Process Change 62
6.4 Design and Innovation 63
6.5 Logistics and Distributed Production 64
6.6 Demographics 65

7 The Consequences of Economic Evolution 67

7.1 Competition 67
7.2 Services Trade and Off-Shoring 71
7.3 Wage Distribution 72
7.4 Convergence and Sector Restructuring 73
7.5 Organizational Restructuring 78
7.6 Continuing Evolution and New Developments 79

8 Summary, Conclusions, and Future Research 81
