

Hariolf Grupp (Ed.)

Dynamics of Science-Based Innovation

With 50 Figures

Springer-Verlag Berlin Heidelberg GmbH

CONTENTS

	Page
Preface	V
Contents	IX

PART I CONCEPTS AND NEW METHODOLOGY

1	By way of introduction	
	Alliances between science research and innovation research	
	<i>Hariolf Grupp, Edo Albrecht and Knut Koschatzky</i>	3
1.1	Historic background and research questions nowadays	3
1.2	A cognitive model.....	8
1.3	From models to science policy and innovation management	12
2	Technology as an autonomous socio-cognitive system	
	<i>Rikard Stankiewicz</i>	19
2.1	Introduction.....	19
2.2	Differentiation of technology as a socio-cognitive system.....	23
2.3	Functional integration of the socio-cognitive system of technology.....	35
2.4	Concluding comments.....	41
3	A special mediation between science and technology	
	When inventors publish scientific articles in fuel cells research	
	<i>Vololona Rabearisoa</i>	45
3.1	Introduction.....	45

3.2	What fuel cell patents filed in France count and tell.....	47
3.3	Articles cited on the front page of the patents in B: Fuel cell research does exist.....	53
3.4	Articles published by inventors: When science and technology intermingle.....	57
3.5	Conclusion	68
4	Perceptions of scientification of innovation as measured by referencing between patents and papers Dynamics in science-based fields of technology <i>Hariolf Grupp and Ulrich Schmoch</i>	73
4.1	Introduction and state of the art.....	73
4.2	Methodology and data	78
4.3	Fundamental characteristics of science involvement in technology.....	90
4.4	International development panorama.....	99
4.5	Sectoral tableau of science involvement in Germany	109
4.6	Conclusions.....	122

PART II CHANGES IN NATIONAL SCIENCE AND INNOVATION SYSTEMS

5	Linking science and innovation in East Germany - a fiasco? <i>Edo Albrecht</i>	131
5.1	A macroview on R&D in the former German Democratic Republic	131
5.2	Links between academic and industrial research: A microview	133
5.3	Discussion and assessment of science-related innovation in East Germany.....	138
6	Linking science and innovation in Japan - a success? <i>Shinichi Yamamoto</i>	143
6.1	The role of universities in Japan.....	143
6.2	Separation of research from education	146
6.3	Opening universities to industry and the general public.....	150
6.4	Popularization of graduate school education	155
6.5	Future perspectives	157

7	Molecular beam epitaxy - a mesoview of Japanese research organization	
	<i>Lennart Stenberg</i>	161
7.1	Introduction.....	161
7.2	Sketch of MBE technology and its development.....	166
7.3	Evolution of the institutional structure of MBE research in Japan.....	175
7.4	Conclusions.....	218

PART III CROSSROADS IN SELECTED TECHNOLOGIES: CASE STUDIES

8	Knowledge expansion in applied science	
	A bibliometric study of laser medicine and polyimide chemistry	
	<i>Ben van Vianen and Anthony van Raan</i>	227
8.1	Introduction.....	227
8.2	General methodology.....	229
8.3	Data collection.....	232
8.4	Exploration of the field of polymer research.....	233
8.5	Trends in polyimide research.....	239
8.6	Exploration of the field of laser research.....	246
8.7	Trends in laser medicine research.....	254
8.8	Conclusions.....	258
9	At the crossroads in laser medicine and polyimide chemistry	
	Patent assessment of the expansion of knowledge	
	<i>Hariolf Grupp and Ulrich Schmoch</i>	269
9.1	Introduction.....	269
9.2	Meaning of citations in patent search reports.....	270
9.3	Selection of case studies and abstract of historic events in laser and polyimide evolution.....	274
9.4	Cyclicity of laser and polyimide development.....	278
9.5	Science-technology relation in laser medicine and polyimides in electronics.....	284
9.6	Technological knowledge expansion in laser medicine and polyimides in electronics.....	288
9.7	Conclusions for corporate R&D management and science policy.....	297

10	Mapping an evolving technology cluster	
	The composition and structure of factory automation	
	<i>Anders Granberg</i>	303
10.1	Introduction.....	303
10.2	Conceptual approach.....	304
10.3	Composition and structure of factory automation technology.....	308
10.4	Concluding remarks	324

PART IV DISCUSSION

11	Analysing links between science, technology and innovation	
	State of the art in science research and in innovation research	
	<i>Knut Koschatzky and Hariolf Grupp</i>	329
11.1	Why this chapter?	329
11.2	Concepts and new methodology.....	330
11.3	Changes in national science and innovation systems.....	337
11.4	Crossroads in selected technologies: Case studies.....	346
11.5	Conclusions: State of the art in science and innovation research	352
	List of figures	359
	List of tables	363
	Bibliographic sketch of contributors	365
	Index	369
