Acronyms ....................................................................................................................... vii  
List of Figures .................................................................................................................. xv  
List of Tables ................................................................................................................... xvii

1 Introduction .................................................................................................................. 1  
1.1 Puzzles ................................................................................................................... 1  
1.2 Research Questions and Core Arguments ................................................................ 5  
1.3 Theoretical Implications ....................................................................................... 8  
1.4 Plan of the Study ................................................................................................... 10  

2 Regulatory Reforms and Theoretical Framework ....................................................... 13  
2.1 Conventional Explanations .................................................................................... 13  
2.1.1 Economic Explanations ................................................................................. 13  
2.1.2 Technological Explanations .......................................................................... 17  
2.1.3 State-Centered Explanations ....................................................................... 19  
2.2 Research Framework ............................................................................................ 21  
2.2.1 The Governance Perspective ........................................................................ 21  
2.2.2 Types of Governance in the Mobile Telecom Market .................................. 25  
2.2.3 Variables for Governance Transformation ................................................ 29  
2.2.4 Sectoral Components of Telecom Politics .................................................. 31  

3 Network Governance in the Korean Telecom Market .............................................. 35  
3.1 Evolution of Mobile Market Governance in Korea ............................................. 35  
3.2 Government Monopoly in the Korean Telecom Market .................................... 39  
3.3 Centralized Network Governance in the Korean Telecom Market in the 1990s .......... 43  
3.3.1 International Pressure and Telecom Disputes .......................................... 43  
3.3.2 Institutional Changes for Telecom Reform ................................................. 47  
3.3.3 The First Restructuring Plan in Early 1990 .................................................. 50
3.4 Flexible Network Governance in the Korean Telecom Market in the Mid-1990s .......... 56
   3.4.1 Intensification of International Pressure and Telecom Disputes .......... 56
   3.4.2 Institutional Changes in the Telecom Industry .......... 58

4 Global and Structural Challenges in Telecommunications .......... 63
   4.1 Structural and Technological Changes in Telecommunications .......... 63
      4.1.1 U.S. Telecom Market Liberalization and Free Trade Regime .......... 63
      4.1.2 Digitalization in Mobile Telecommunications .......... 68
   4.2 Dynamics in the Global Telecom Market .......... 73
      4.2.1 Strategic Alliances .......... 73
      4.2.2 From de jure Standard to de facto Standard .......... 76
   4.3 New Challenges and the Korean State .......... 81
      4.3.1 From Industrial Policy to Competition Policy .......... 82
      4.3.2 Policy Tools for Regulatory Governance in Telecommunications .......... 84

5 The Emergence of Centralized Network Governance in the Korean Mobile Market .......... 89
   5.1 Forces for Change and the Korean Strategy .......... 89
      5.1.1 The U.S. Government and Multinationals .......... 90
      5.1.2 Diversification in the Telecommunications Industry .......... 93
      5.1.3 Two Strategies for Building Mobile Markets .......... 94
   5.2 Building a Mobile Services Market in Korea .......... 95
      5.2.1 Market Liberalization in Other Telecom Services .......... 95
      5.2.2 Liberalization under the MIC's Control .......... 97
      5.2.3 The Selection of a Second Mobile Services Provider .......... 101
      5.2.4 Privatization of a Public Mobile Carrier: The Birth of SK Telecom .......... 105
      5.2.5 Competition in the Privatized Mobile Telecom Network .......... 107
   5.3 Institutions of Mobile Market Liberalization .......... 109
      5.3.1 Two Pillars for Regulatory Reform in Telecom .......... 109
      5.3.2 The Licensing System .......... 111
   5.4 CDMA Technology Project .......... 114
      5.4.1 Initiation of the Digital Mobile Technology Project .......... 114
      5.4.2 Technology Standard War: CDMA Versus TDMA .......... 117
      5.4.3 Public Carriers’ Involvement in the Project .......... 123
      5.4.4 Centralized Network Governance in Technology Projects .......... 126
   5.5 Centralized Network Governance in the Korean Mobile Market .......... 128
6 The Emergence of Flexible Network Governance under the WTO Regime

6.1 PCS Mobile Market with Indigenous CDMA Technology

6.1.1 The Korean Response to International Pressure under the WTO

6.1.2 Domestic Interests in PCS

6.1.3 Licensing PCS Mobile Service Carriers

6.2 Dynamic Competition of the Korean Mobile Telecom Industry

6.2.1 Competition Policy in the Mobile Services Market

6.2.2 The Growth of Korean Manufacturers in the Telecom Market

6.2.3 Governing a Competitive Mobile Market

6.2.4 From Centralized Network Governance to Flexible Network Governance

6.3 The WTO Regime and Digitalization of the Network

6.3.1 The WTO Regime and the MIC’s Policy Tools

6.3.2 Asian Financial Crisis and Liberalization of Foreign Investment

6.3.3 Digitalization of the Network and Network Convergence

6.3.4 Business Strategies under the WTO Regime: Global Strategic Alliances

6.4 Licensing IMT-2000 Mobile Telecom Services

6.4.1 Licensing IMT-2000 Services

6.4.2 Standard War Between the MIC and Mobile Carriers

6.4.3 Attitude of the Korean Firm Toward W-CDMA

6.5 Developing the 4G Mobile Telecom Market

6.5.1 New Technology Development Strategy and the WiBro

6.5.2 Standard War Between WiBro and LTE 4G Players

6.5.3 From Ministry to Committee under the Lee Administration

6.6 Flexible Network Governance under the WTO Regime

7 Different Roads to a Market Economy

7.1 Different Models of Market Governance

7.2 Constraints on Network Governance toward Market-Oriented Reform

7.2.1 Constraints on Technology Development

7.2.2 Constraints from International Changes

7.2.3 Constraints from the Private Sector
