ORGANISATIONAL CULTURE
Concept, Context, and Measurement

Volume I

Elizabeth Kummerow
The University of Adelaide, Australia

Neil Kirby
The University of Adelaide, Australia
PART ONE: THE CONCEPT

Chapter 1 Organisational Culture: Development and Early Application

1.1 A Brief Introduction to Organisational Culture
1.2 Organisational Culture Defined
1.3 Origins of the Contemporary Study of Organisational Culture
1.4 Development of the Organisational Culture Perspective within Organisation Theory
  1.4.1 Classical organisation theory
  1.4.2 The classical philosophers
  1.4.3 The neoclassical school
  1.4.4 The human relations school
  1.4.5 Differences between the human relations and organisational culture perspectives
  1.4.6 Contribution of competing perspectives
  1.4.7 ‘Modern’ structural theory
  1.4.8 Systems and contingency theories
  1.4.9 Power and politics perspective
  1.4.10 Organisational culture and organisational theories
1.5 Popularisation of the Organisational Culture Concept
  1.5.1 In Search of Excellence
    1.5.1.1 Commentary on the text
    1.5.1.2 Reasons for the success of In Search of Excellence
    1.5.1.3 Critique of In Search of Excellence
1.6 Major Claims about Organisational Culture
1.7 Conclusions
3.2 The Strength of Organisational Culture

3.2.1 An important but problematic concept
3.2.2 Schein's treatment of cultural strength
3.2.3 Payne's three-dimensional model
  3.2.3.1 Description and operationalisation of the model
  3.2.3.2 Critique of Payne's model
3.2.4 Other indicators of cultural strength
3.2.5 Towards assessing the strength of organisational culture

3.3 Organisational and Occupational Subcultures

3.3.1 A single unified culture or numerous subcultures?
3.3.2 Conditions for the development of subcultures
3.3.3 Organisation-specific versus occupational subcultures
  3.3.3.1 Differential influence of occupational and organisational subcultures
  3.3.3.2 A competition for control
  3.3.3.3 A case of competing loyalties
3.3.4 Membership of a single subculture or multiple subcultures?
3.3.5 The relationship between an organisation's subcultures and its overall culture
3.3.6 Can there be subcultures only?
3.3.7 Management awareness of subcultures

3.4 Conclusions

PART TWO: RELATED CONCEPTS

Chapter 4 Organisational Climate and National Culture

4.1 Organisational Climate

4.1.1 A comparison of the constructs of organisational climate and organisational culture
  4.1.1.1 Conceptual similarities
  4.1.1.2 Conceptual differences
4.1.2 Approaches to the measurement of organisational climate and organisational culture
4.1.3 Different research agendas of organisational climate and organisational culture
4.1.4 The different origins of organisational climate and organisational culture
4.1.5 Organisational climate and organisational culture: Synonymous or fundamentally different constructs?
4.1.6 Reframing the relationship between organisational climate and organisational culture
4.1.7 Reconceptualising organisational climate
4.2 National Culture
4.2.1 Hofstede’s work on national and organisational culture 193
4.2.2 Trompenaars and Hampden-Turner’s work on national and organisational culture 199
4.2.3 Schwartz’s model of national differences in values and its implications for work organisations 201
4.2.4 Further studies and issues related to national culture and organisational culture 202

4.3 Conclusions 206

Chapter 5 Social Representations 209
5.1 Origins and Definition of Social Representations 210
5.2 Conceptual Similarities Between Social Representations and Organisational Culture 212
5.2.1 The importance of consensus 213
5.2.2 Beliefs and representations as socially created and changed 216
5.2.2.1 Anchoring and sensemaking 217
5.2.2.2 Objectification and sensemaking 222
5.2.3 Anxiety reduction function of beliefs and representations 228
5.2.4 Beliefs and representations as taken-for-granted and unconsciously held 231
5.2.5 Beliefs and representations as evolving over time 235
5.2.6 The role of socialisation and social communication in the evolution and transmission of beliefs and representations 237
5.2.7 Other conceptual similarities between organisational culture and social representations 239
5.2.8 The related concept of the ‘psychological contract’ 242

5.3 A Comparison of Research Studies in Organisational Culture and Social Representations 245
5.3.1 The data for comparison: Sourcing and coding 246
5.3.2 General observations about the data set 246
5.3.3 Analysis and results 248
5.3.3.1 Differences in research domain 249
5.3.3.2 Differences in types of article 251
5.3.3.3 Differences in research method 251
5.3.3.4 Differences in research purpose 253
5.3.4 Can differences in broad research agenda inform mutual learning? 256
5.4 A Comparison of the Research Methods Used in Organisational Culture and Social Representations Research 258
5.4.1 Methods used in organisational culture research 260
5.4.1.1 Using qualitative methods to study organisational culture 260
5.4.1.2 Using quantitative methods to study organisational culture 266
5.4.1.3 Using mixed methods to study organisational culture 281
5.4.1.4 Which method(s) to use in organisational culture research? 282
5.4.2 Methods used in social representations research 285
5.4.2.1 Using qualitative methods to study social representations 286
5.4.2.2 Using quantitative methods to study social representations 293
5.4.2.3 Methods particular to the study of social representations 296
5.4.2.4 Methodological challenges in the study of social representations 302
5.4.2.5 Using mixed methods to study social representations 304
5.4.2.6 Which method(s) to use in social representations research? 305
5.4.3 Can differences in research method inform mutual learning? 306
5.5 Conclusions 313

PART THREE: MEASUREMENT AND CONTEXT 315

Chapter 6 Deciphering Organisational Culture 317
6.1 Qualitative Methods and Techniques 318
6.1.1 Overview of common qualitative techniques 318
6.1.2 Schein’s qualitative approach to deciphering organisational culture 321
6.1.3 Advantages and disadvantages of the use of qualitative methods for studying organisational culture 333
6.2 Quantitative Methods and Techniques 336
6.2.1 The Organizational Culture Inventory 337
6.2.2 The Organizational Culture Profile 338
6.2.3 Advantages and disadvantages of the use of quantitative methods for studying organisational culture 339
6.3 Qualitative and Quantitative Methods Combined
6.3.1 Siehl and Martin: A mixed-method approach to the study of cultural knowledge acquisition by new employees
6.3.2 Hofstede, Neuijen, Ohayv, and Sanders: The use of a mixed-method approach to explore the possibilities for the quantitative assessment of organisational culture
6.3.3 Rentsch: The use of a mixed-method approach to investigate the role of social interaction in influencing shared meanings

6.4 Conclusions

Chapter 7 Introduction to a Contextual Framework
7.1 Organisational Culture: Key Characteristics and Associated Research Issues
7.2 The Role of Context in Conceptualisations of Organisational Culture: Existing Treatments and a Contemporary Perspective
7.2.1 The historical context
7.2.2 The future context
7.2.3 The other context
7.2.4 The ideal context
7.3 The Role of Context in the Measurement of Organisational Culture: Current Status and New Possibilities
7.3.1 The role of context in quantitative measures of organisational culture
7.3.2 The role of context in qualitative measures of organisational culture
7.4 A Proposed Contextual Approach
7.5 Using Context to Understand Change
7.6 Conclusions
