# Innovative Approaches Towards Low Carbon Economics

Regional Development Cybernetics

# Contents

<b>1</b>	<b>Novel Pathway of Regional Economy Development</b>	<b>1</b>
1.1	Overall Low Carbon Development	1
1.1.1	LCD Advancements	3
1.1.2	The LCD Concept	12
1.1.3	LCD Practice	19
1.2	Systematic Review on Low Carbon Development	24
1.2.1	Specifying Research Questions	25
1.2.2	Identification of Relevant Research	32
1.2.3	Selection of Primary Studies	34
1.2.4	Study Assessment and Synthesis	34
1.2.5	Review Results and Findings	36
1.3	Key Issues of Regional Low Carbon Development	46
1.3.1	Greenhouse Gas Control	46
1.3.2	Ecological Capacity Evaluation	49
1.3.3	Regional Economic Prediction	51
1.3.4	Energy Structure Optimization	52
1.3.5	Land Resource Utilization	54
1.3.6	Industrial Structure Adjustment	56
1.3.7	Low Carbon Industrial Chains	57
1.3.8	Low Carbon Transportation Systems	59
1.3.9	Low Carbon Tourism	61
	References	62
<b>2</b>	<b>Pedigree of Model Technologies</b>	<b>73</b>
2.1	Total Flow Path	73
2.1.1	Regional Low Carbon System Model	74
2.1.2	Flow Chart of LCSM	78
2.2	Problem Framework	78
2.2.1	Problem Categories	81
2.2.2	Problem System	81
2.3	Model System	81
2.3.1	Model Categories	84
2.3.2	Model Flowchart	87

2.4	Meta Model . . . . .	89
2.4.1	Model Pedigree . . . . .	89
2.4.2	Expression Form . . . . .	106
2.4.3	Operation Process . . . . .	107
2.5	General Equilibrium Framework . . . . .	108
2.5.1	Regional General Equilibrium . . . . .	108
2.5.2	LC-RGE Structure . . . . .	111
2.5.3	LC-RGE Operation . . . . .	116
2.5.4	LC-RGE Simulation . . . . .	119
2.5.5	Low Carbon Policy System . . . . .	122
	References . . . . .	126
<b>3</b>	<b>Greenhouse Gas Control . . . . .</b>	<b>129</b>
3.1	Environment Background . . . . .	129
3.2	Problem Statement . . . . .	132
3.2.1	System Description . . . . .	132
3.2.2	Assumptions and Notations . . . . .	133
3.3	System Modelling . . . . .	134
3.3.1	System Dynamic Model . . . . .	134
3.3.2	REVM . . . . .	139
3.3.3	Solution Approach . . . . .	141
3.4	Empirical Study . . . . .	144
3.4.1	Data Sources . . . . .	146
3.4.2	Result Analysis . . . . .	147
3.4.3	Policy Advice . . . . .	151
	References . . . . .	152
<b>4</b>	<b>Ecological Capacity Evaluation . . . . .</b>	<b>155</b>
4.1	Background Review . . . . .	155
4.2	Problem Description . . . . .	158
4.3	Emergy and Ecological Footprint . . . . .	160
4.3.1	Emergy Accounting . . . . .	160
4.3.2	Ecological Footprint . . . . .	163
4.4	System Dynamics Model . . . . .	166
4.5	Application in Dual Heritage Area . . . . .	166
4.5.1	Ecological Footprint Evaluation . . . . .	167
4.5.2	Ecological Footprint Forecast . . . . .	170
4.5.3	Policy Proposal . . . . .	173
	References . . . . .	174
<b>5</b>	<b>Regional Economic Prediction . . . . .</b>	<b>177</b>
5.1	General Background . . . . .	177

5.2	Problem Description . . . . .	179
5.2.1	Regional System. . . . .	179
5.2.2	Basic Assumption. . . . .	182
5.2.3	Index System . . . . .	182
5.3	Modelling . . . . .	182
5.3.1	Econometric Model. . . . .	182
5.3.2	System Dynamic Model . . . . .	187
5.4	Scenarios Simulation. . . . .	201
5.4.1	Simulation Result . . . . .	202
5.4.2	Analysis of Three Scenarios. . . . .	203
5.4.3	Some Advices . . . . .	206
	References . . . . .	208
<b>6</b>	<b>Energy Structure Optimization . . . . .</b>	<b>209</b>
6.1	Background Review . . . . .	209
6.2	Problem Statement . . . . .	211
6.2.1	Energy Structure. . . . .	211
6.2.2	Approach Flow Chart . . . . .	212
6.3	Modeling of the Energy-Related System . . . . .	213
6.3.1	System Dynamics Model. . . . .	214
6.3.2	Fuzzy Multi-objective Programming Model . . . . .	218
6.3.3	Solution Method. . . . .	221
6.4	A Case Study. . . . .	223
6.4.1	Problem Description . . . . .	223
6.4.2	Simulation and Results . . . . .	224
6.4.3	Policy Suggestions . . . . .	225
	References . . . . .	230
<b>7</b>	<b>Land Resource Utilization. . . . .</b>	<b>233</b>
7.1	Circumstance and Problem Description . . . . .	233
7.1.1	System Description . . . . .	235
7.1.2	Basic Assumptions . . . . .	235
7.2	System Modelling. . . . .	236
7.2.1	SD Model . . . . .	237
7.2.2	Fuzzy Expected Value Model . . . . .	240
7.2.3	Solution Method. . . . .	244
7.3	Empirical Research. . . . .	246
7.3.1	Regional Situation . . . . .	247
7.3.2	Data Sources . . . . .	247
7.3.3	Simulation Results . . . . .	248
7.3.4	Proposal . . . . .	249
	References . . . . .	254

<b>8</b>	<b>Industrial Structure Adjustment</b> . . . . .	257
8.1	Condition and Problem Description . . . . .	257
8.1.1	Industrial Structure . . . . .	259
8.1.2	Basic Assumption . . . . .	262
8.1.3	Related Symbols . . . . .	263
8.2	System Modelling . . . . .	263
8.2.1	System Dynamics Model . . . . .	264
8.2.2	Fuzzy Random Multiobjective Model . . . . .	265
8.2.3	Solution Method . . . . .	269
8.3	Empirical Study . . . . .	271
8.3.1	Data Resources . . . . .	271
8.3.2	System Simulation . . . . .	276
8.3.3	Results Analysis . . . . .	276
8.3.4	Policy Suggestion . . . . .	281
	References . . . . .	282
<b>9</b>	<b>Low Carbon Industrial Chains</b> . . . . .	283
9.1	Backing and Problem Description . . . . .	283
9.2	Low Carbon Polysilicon Industry Chain . . . . .	286
9.2.1	Polysilicon Industry . . . . .	286
9.2.2	System Modelling . . . . .	291
9.2.3	Case Study . . . . .	300
9.3	Low Carbon Textile Industry Chain . . . . .	308
9.3.1	Textile Industry . . . . .	311
9.3.2	System Modelling . . . . .	313
9.3.3	Empirical Research . . . . .	318
9.4	Low Carbon Pig Industry Chain . . . . .	324
9.4.1	Pig Industry . . . . .	326
9.4.2	System Modelling . . . . .	328
9.4.3	Empirical Study . . . . .	335
9.5	Low Carbon Coal Industry Chain . . . . .	343
9.5.1	Coal Industry . . . . .	346
9.5.2	System Modelling . . . . .	349
9.5.3	Practical Simulation . . . . .	357
