## 1 Introduction to accounting

1. *Introduction*  
2. *Learning outcomes*  
3. What are accounting and finance?  
4. Who are the users of accounting information?  
5. The conflicting interests of users  
6. How useful is accounting information?  
7. Evidence on the usefulness of accounting  
8. Providing a service  
9. Further qualities  
10. Weighing up the costs and benefits  
11. Accounting as an information system  
12. Management accounting and financial accounting  
13. Scope of this book  
14. The changing face of accounting  
15. Why do I need to know anything about accounting and finance?  
16. Accounting for business  
17. What is the purpose of a business?  
18. What kinds of business ownership exist?  
19. Sole proprietorship  
20. Partnership  
21. Limited company  
22. How are businesses organised?  
23. How are businesses managed?  
24. What is the financial objective of a business?  
25. Balancing risk and return  
26. Not-for-profit organisations  
27. Summary  
28. Key terms  
29. References  
30. Further reading  
31. Review questions
Contents

Part 1 Financial accounting

2 Measuring and reporting financial position 37
   Introduction 37
   Learning outcomes 37
   The major financial statements – an overview 38
   The statement of financial position 42
      Assets 42
      Claims 45
   The effect of trading transactions 48
   Classifying assets 50
      Current assets 51
      Non-current assets 51
   Classifying claims 53
      Current liabilities 53
      Non-current liabilities 53
   Statement layouts 54
   Capturing a moment in time 56
   The role of accounting conventions 56
      Business entity convention 56
      Historic cost convention 57
      Prudence convention 58
      Going concern convention 58
      Dual aspect convention 59
   Money measurement 60
      Goodwill and brands 60
      Human resources 61
      Monetary stability 62
   Valuing assets 62
      Non-current assets 63
      Non-current assets with finite lives 63
      Non-current assets with indefinite lives 63
      Fair values 64
      The impairment of non-current assets 65
      Inventories 67
   Meeting user needs 68
   Self-assessment question 69
   Summary 69
   Key terms 71
   Further reading 71
   Review questions 72
   Exercises 72

## Part 2 Management accounting

### 8 Relevant costs for decision making

**Introduction**

289

**Learning outcomes**

289

Cost–benefit analysis

290

What is meant by 'cost'?

291

Relevant costs: opportunity and outlay costs

293

Sunk costs and committed costs

298

Non-measurable costs and benefits

299

Using relevant cost as a basis for setting prices

299

**Self-assessment question**

300

**Summary**

301

**Key terms**

302

**Further reading**

302

**Review questions**

303

**Exercises**

303

### 9 Cost-volume-profit analysis

**Introduction**

309

**Learning outcomes**

309

Cost behaviour

310

Fixed cost

310

Variable cost

312

Semi-fixed (semi-variable) cost

313

Analysing semi-fixed (semi-variable) costs

314

Finding the break-even point

315

**Contribution**

321

Contribution margin ratio

321

Margin of safety

322

Achieving a target profit

324

**Operating gearing**

325

Operating gearing and its effect on profit

326

Profit–volume charts

327

The economist's view of the break-even chart

328

Failing to break even

330

Weaknesses of break-even analysis

330

Using contribution to make decisions: marginal analysis

333

Pricing/assessing opportunities to enter contracts

334

The most efficient use of scarce resources

337
Full costing

10

Introduction
Learning outcomes
Why do managers want to know the full cost?
What is full costing?
Single-product businesses
Multi-product businesses
Direct and indirect cost
Job costing
Full (absorption) costing and the behaviour of cost
The problem of indirect cost
Overheads as service renderers
Job costing: a worked example
Selecting a basis for charging overheads
Segmenting the overheads
Dealing with overheads on a cost centre basis
Batch costing
Non-manufacturing overheads
The forward-looking nature of full (absorption) costing
Using full (absorption) cost information
Full cost (cost-plus) pricing
Price makers and price takers
Use of cost-plus information by price takers
Criticisms of full (absorption) costing
Full (absorption) costing versus variable costing
Which method is better?
Self-assessment question
Summary
Key terms
Reference
Further reading
Review questions
Exercises
Cost determination in the changed business environment
Costing and pricing: the traditional way
Costing and pricing: the new environment

Cost management systems
The problem of overheads
Taking a closer look

Activity-based costing
Attributing overheads
Benefits of ABC
ABC versus the traditional approach
ABC and service industries
Criticisms of ABC

Other costing approaches in the modern environment
Total (or whole) life-cycle costing
Total quality management
Costing quality procedures
Target costing
Każen costing
Value chain analysis
Benchmarking

Non-financial measures of performance
The balanced scorecard
Scorecard problems

Measuring shareholder value
The quest for shareholder value
How can shareholder value be created?
The need for new measures
Economic value added (EVA®)

Self-assessment question
Summary
Key terms
Reference
Further reading
Review questions
Exercises

Budgeting

Introduction
Learning outcomes
How budgets link with strategic plans and objectives
Exercising control
Time horizon of plans and budgets
Limiting factors
Budgets and forecasts
Periodic and continual budgets
How budgets link to one another
How budgets help managers
13 Accounting for control

Introduction

Learning outcomes

Budgeting for control

Types of control

Variances from budget
  Flexing the budget
  Sales volume variance
  Sales price variance
  Materials variances
  Labour variances
  Fixed overhead variance

Reasons for adverse variances

Variance analysis in service industries

Non-operating-profit variances

Investigating variances

Compensating variances

Making budgetary control effective

Behavioural issues
  The impact of management style
  Failing to meet the budget
  Budgets and innovation

Standard quantities and costs

Setting standards
  Who sets the standards?
  How is information gathered?
  What kind of standards should be used?
  The learning-curve effect
Part 3 Financial management

14 Making capital investment decisions 533
   Introduction 533
   Learning outcomes 533
   The nature of investment decisions 534
   Investment appraisal methods 535
   Accounting rate of return (ARR) 537
      ARR and ROCE 538
      Problems with ARR 539
   Payback period (PP) 541
      Problems with PP 543
   Net present value (NPV) 546
      Interest lost 546
      Risk 547
      Inflation 548
      What will logical investors do? 548
      Using present value tables 551
      The discount rate and the cost of capital 553
   Why NPV is better 553
      NPV's wider application 554
   Internal rate of return (IRR) 554
      Problems with IRR 559
   Some practical points 560
   Investment appraisal in practice 563
   Investment appraisal and strategic planning 566
   Dealing with risk 567
      Sensitivity analysis 567
   Managing investment projects 571
      Stage 1: Determine investment funds available 572
      Stage 2: Identify profitable project opportunities 572
      Stage 3: Evaluate the proposed project 573
      Stage 4: Approve the project 573
      Stage 5: Monitor and control the project 574
## Financing a business

*Introduction*

**Learning outcomes**

- The main objective of financing policy
- Sources of finance
- Internal sources of finance
- Internal sources of long-term finance
  - Retained earnings
  - Dividend policy
- Internal sources of short-term finance
  - Tighter credit control
  - Reducing inventories levels
  - Delaying payment to trade payables
  - Some further points
- External sources of finance
- External sources of long-term finance
  - Ordinary shares
  - Preference shares
  - Borrowing
  - Forms of borrowing
  - Finance leases
  - Sale-and-leaseback arrangements
  - Hire purchase
  - Securitisation
- External sources of short-term finance
  - Bank overdrafts
  - Debt factoring
  - Invoice discounting
- Long-term versus short-term borrowing
- Gearing and the financing decision
- Raising long-term finance
- Share issues
  - Rights issues
  - Offers for sale and public issues
  - Setting a share price
  - Private placings
  - Bonus issues
- The role of the Stock Exchange
  - Advantages of a listing
16 Managing working capital

Introduction 640

Learning outcomes 640

What is working capital? 641
Managing working capital 642
The scale of working capital 642
Managing inventories 645
  Budgeting future demand 648
  Financial ratios 648
  Recording and reordering systems 648
  Levels of control 650
  Inventories management models 652
Managing trade receivables 657
  Which customers should receive credit and how much should they be offered? 657
  Length of credit period 659
  Cash discounts 662
  Debt factoring and invoice discounting 663
  Credit insurance 663
  Collection policies 664
  Reducing the risk of non-payment 667
Managing cash 667
  Why hold cash? 667
  How much cash should be held? 668
  Controlling the cash balance 669
  Cash budgets and managing cash 670
  The operating cash cycle 670
  Cash transmission 674
  Bank overdrafts 675
Managing trade payables 675
  Taking advantage of cash discounts 677
  Controlling trade payables 677
### Part 4 Supplementary Information

Appendix A Recording financial transactions 691
   - Introduction 691
   - Learning outcomes 691
   - The basics of double-entry bookkeeping 692
   - Recording trading transactions 694
   - Balancing accounts and the trial balance 697
   - Preparing the financial statements (final accounts) 701
   - The ledger and its division 704
   - Summary 705
   - Key terms 706
   - Further reading 706
   - Exercises 707

Appendix B Glossary of key terms 710

Appendix C Solutions to self-assessment questions 727

Appendix D Solutions to review questions 748

Appendix E Solutions to selected exercises 762

Appendix F Present value table 811

Index 813
