STREAMLINED ANALYSIS WITH ADePT SOFTWARE

Analyzing Food Security Using Household Survey Data

Ana Molteo
Nathalie Troubat
Michael Lokshin
Zurab Sajaia

THE WORLD BANK

## Contents

### Preface
- xi

### Abbreviations
- xiii

### Chapter 1
#### Food Security
- Introduction: 1
- Background: 1
- Sources of Food Consumption Data: 4
- Summary: 9

#### ADePT-Food Security Module
- Notes: 10

#### References
- 12

#### Bibliography
- 13

### Chapter 2
#### Theoretical Concepts
- Introduction: 15
- Food Data Collected in Household Surveys: 15
- Standardization Procedures: 20
- Indicators on Food Security: 32
- Annexes: 61

#### Notes
- 68
Contents

1.1: Prevalence of Undernourishment Using Mainly Survey Data.............. 74
1.2: Prevalence of Undernourishment Using Mainly External Sources ..... 75
1.3: Selected Food Consumption Statistics by Population Groups........... 78
1.4: Selected Food Consumption Statistics of Population Groups by Income Deciles .................................................................................. 79
1.5: Shares of Food Consumption by Food Sources (in Dietary Energy) ..... 80
1.6: Shares of Food Consumption by Food Sources (in Dietary Energy) by Income Deciles .............................................................................. 82
1.7: Shares of Food Consumption by Food Sources (in Monetary Value).... 83
1.8: Shares of Food Consumption by Food Sources (in Monetary Value) by Income Deciles .............................................................................. 84
1.9: Food Consumption in Dietary Energy, Monetary, and Nutrient Content by Population Groups................................................................. 85
1.10: Nutrient Contribution to Dietary Energy Consumption .................. 87
1.11: Nutrient Contribution to Dietary Energy Consumption at Income Quintile Levels .............................................................................. 88
1.12: Nutrient Density per 1,000 Kcal.......................................................... 89
1.13: Share of Animal Protein in Total Protein Consumption ................. 90
1.14: Within-Region Differences in Nutrient Consumption, by Regional Income Quintiles............................................................................... 91
2.1: Food Consumption by Food Commodity Groups.............................. 92
2.2: Contribution of Food Commodity Groups to Total Nutrient Consumption .................................................................................................. 93
2.3: Food Consumption by Food Commodity Group and Income Quintile... 93
2.4: Food Consumption by Food Commodity Group and Area................. 94
2.5: Contribution of Food Commodity Groups to Total Nutrient Consumption by Area .................................................................................... 96
2.6: Food Consumption by Food Commodity Group and Region .......... 97
2.7: Food Consumption by Food Commodity Group and Region in the First Quintile ....................................................................................... 97
2.8: Nutrient Costs by Food Commodity Group ........................................ 98
2.9: Food Consumption by Food Commodity Group and Food Sources (in Dietary Energy) .............................................................................. 99
3.1: Consumption Statistics for Each Food Item at National Level .......... 101
3.2: Food Item Protein Consumption at National Level......................... 102
3.3: Consumption Statistics for Each Food Item by Area ....................... 102
3.4: Food Item Protein Consumption by Area .......................................... 103
3.5: Consumption Statistics for Each Food Item by Region .................... 104
3.6: Food Item Protein Consumption by Region ........................................ 105
3.7: Food Item Quantities by Food Source ........................................... 105
3.8: Food Item Quantities by Food Source and Area ............................. 108
3.9: Food Item Quantities by Food Source and Region ......................... 109
4.1: Dispersion Ratio of Food Consumption by Income Quintile within Population Groups .......................................................... 111
4.2: Dispersion Ratios of Share of Food Consumption (in Dietary Energy) by Food Source, Income Quintile, and Population Groups .......... 112
4.3: Dispersion Ratios of Share of Food Consumption (in Monetary Values) by Food Source and Income Quintile within Population Groups ........................................................................ 113
4.4: Dispersion Ratios of Food Dietary Energy Unit Values, Total Income, and Engel Ratio by Income Quintile within Population Groups ........................................................................ 114
4.5: Income Demand Elasticities by Income Decile within Population Groups .................................................................................. 115
5.1: Availability of Vitamin A ............................................................... 116
5.2: Availability of B Vitamins .............................................................. 118
5.3: Availability of Vitamin C and Calcium ......................................... 119
5.4: Availability of Iron ........................................................................ 120
5.5: Density of Calcium per 1,000 Kcal .............................................. 121
5.6: Density of Vitamin A and Vitamin C per 1,000 Kcal .................... 123
5.7: Density of B Vitamins per 1,000 Kcal .......................................... 124
6.1: Micronutrient Availability by Food Group ................................. 126
6.2: Micronutrient Availability by Food Group and Income Quintile .... 127
6.3: Micronutrient Availability by Food Group and Area .................... 128
6.4: Micronutrient Availability by Food Group and Region ............... 129
6.5: Contribution of Food Groups to Micronutrient Availability .......... 131
6.6: Contribution of Food Groups to Micronutrient Availability by Area ................................................................. 132
6.7: Micronutrient Availability by Food Item ...................................... 133
6.8: Micronutrient Availability by Food Item and Area ...................... 134
6.9: Micronutrient Availability by Food Item and Region ................. 135
7.1: Protein Consumption and Amino Acid Availability .................... 137
7.2: Amino Acid Availability per Gram of Protein ......................... 138
8.1: Availability of Amino Acids by Food Group ............................ 139
8.2: Availability of Amino Acids by Food Group and Income Quintile .... 141
8.3: Availability of Amino Acids by Food Group and Area .......... 142
8.4: Availability of Amino Acids by Food Group and Region ............ 143
8.5: Contribution of Food Groups to Amino Acid Availability ........... 144
8.6: Contribution of Food Groups to Amino Acid Availability by Area .... 145
8.7: Contribution of Food Groups to Amino Acid Availability by Region ................................................................. 147
8.8: Availability of Amino Acid by Food Item .......................... 148
8.9: Availability of Amino Acid by Food Item and Area ............... 149
8.10: Availability of Amino Acid by Food Item and Region .......... 150
4.1: Dataset 1 (HOUSEHOLD) ............................................. 183
4.2: Review of the Number of Observations within the Population Groups ................................................................. 188
4.3: Dataset 2 (INDIVIDUAL) .............................................. 189
4.4: Treatment of Food Acquired but Not Consumed by the Household ... 193
4.5: Dataset 3 (FOOD) ...................................................... 193
4.6: Dataset 4 (COUNTRY_NCT): Minimum Information Required .... 196
4.7: Dataset 4 (COUNTRY_NCT): Micronutrient Analysis ............ 198
4.8: Dataset 4 (COUNTRY_NCT): Amino Acids Analysis ............. 199
4.9: Content of Protein in Rice Applying Equal Weights ............... 202
4.10: Content of Protein in Rice Applying Different Weights .......... 202
5.1: System Requirements .................................................. 211
5.2: Description of the Commands Displayed in the Menu ........... 220
5.3: Variables to Map According to the Type of Analysis ............. 221
5.4: Description of the Commands Displayed in the Pop-Up Menu .... 237
5.5: Operators That Can Be Used in Expressions ..................... 238
5.6: Examples of Expressions ............................................. 238
