Introduction .............................................................. xx

SECTION I  WHAT IS THE LEAN MANAGEMENT SYSTEM? PRINCIPAL ELEMENTS OF LEAN MANAGEMENT

1  The Missing Link in Lean: The Management System ................. 3
   Developing a Lean Culture ............................................. 3
   Don't Wait—Start Now! .................................................. 4
   Your Personal Lean Journey ............................................ 5
   Lean Management Focuses on Process ............................... 8
      Lean Management and Continuous Improvement ................. 8
   Parallel Implementations of Lean Production and Lean Management ... 10
      Changing from Conventional Production ............................ 11
   Getting Rid of the “Do Whatever It Takes” Approach .................. 11
   Lean Processes Need Lean Management .............................. 12
      Focusing on the Process Produces Results .......................... 13
   Engaging Executives with Lean: A Different Approach ............... 15
   Understanding the Executive Perspective ............................. 18
   Lean Orthodoxy—Not the Answer ..................................... 19
   Tending to the Chain of Command .................................... 21
   Measuring the Process against Expected Outcomes ................... 21
   How Can You Recognize Culture? ..................................... 22
   Overcoming Cultural Inertia .......................................... 24
   New Settings with Old Habits Won't Work ............................. 25
How to Change Your Culture .............................................................. 26
Extinguishing versus Breaking Habits .............................................. 27
Make Sure You Don't Slip Back into These Old Habits ......................... 28
Summary: Technical and Management Sides Need Each Other .......... 28
Study Questions ............................................................................. 29

2 Lean Management System’s Principal Elements ......................... 31
The Principal Elements of Lean Management ..................................... 31
Lean Elements Need to Work Together ............................................ 33
Execution Is Key to Lean Management ........................................... 35
Implementing Lean Management: Where to Begin? ......................... 36
  First, Improve Stability ................................................................. 38
  Start with Visual Controls ........................................................... 39
  When Implementing Leader Standard Work First Can Be Effective .... 41
  Leader Standard Work in Automated Production
    Environments and Process Industries ........................................... 41
    Does Lean Management Apply in Process Industries? ................. 43
  Process Focus and Leader Standard Work in Process
  Production ................................................................................... 46
    When Leader Standard Work Can Come First ............................ 47
Summary: Four Principal Elements of Lean Management ................ 48
Study Questions ............................................................................. 49

3 Standard Work for Leaders .......................................................... 51
Leader Standard Work Is Process Dependent ..................................... 52
  A Recipe for Success ................................................................... 52
Leader Standard Work as Interlocking Layers .................................... 56
  Leader Standard Work Shows What to Do—and What Not to Do ....... 57
  Leader Standard Work Should Be Layered from the Bottom Up ....... 62
  Designed Overlap in Leader Standard Work ................................. 63
What Does Leader Standard Work Cover? ....................................... 64
  Team Leaders ............................................................................ 65
  Supervisors .............................................................................. 66
  Value Stream Managers .............................................................. 66
Form and Format for Leader Standard Work .................................. 67
  Leader Standard Work: Compliance or Improvement? ................. 68
The Role of Training for Lean Implementation ................................ 72
Summary: Leader Standard Work Is Element 1 of Lean Management ................................................................. 73
Study Questions ......................................................................... 74

4  Visual Controls ........................................................................... 75
Visual Controls Focus on Process and Actual Performance ...... 77
A Variety of Tools to Visually Monitor Processes ..................... 78
  Hour-by-Hour Production Tracking Charts .............................. 78
  How Visual Controls Enforce Discipline ............................... 79
  Job-by-Job Tracking Charts .................................................... 83
  Priority Board Hourly Status ................................................... 90
  Completion Heijunka .............................................................. 92
  Between-Process Tracking ..................................................... 94
  Noncyclical Process Tracking ................................................ 96
  Maintaining Visual Trackers and Acting on the Information
They Provide ............................................................................. 100
  Benefits of Using Simple Visual Controls Instead of More
Sophisticated Information Technology .................................. 102
  Both Visuals and Automated Tracking ................................ 105
    Accuracy versus Precision of Visual Information ................. 106
    Proximity of Visual Controls ............................................... 108
    Flexibility of Visual Controls .............................................. 108
    Visual Controls and the “Fingerprint Factor” ....................... 109
    The Power of Networks ..................................................... 109
    Intangible Benefits of Visual Controls ................................ 111
Summary: Visual Controls and the Data for Lean Management .... 111
Study Questions ....................................................................... 112

5  Daily Accountability Process ...................................................... 115
How Conventional Production Differs from Lean .................... 115
Three Tiers of Daily Meetings ................................................ 116
  Tier One: Team Leader and Production Crew ....................... 119
  Tier Two: Supervisor and Team Leaders ............................ 120
    The Green Dot/Red Dot Convention .................................. 122
    Day-to-Day Project Management ....................................... 125
  Tier Three: Value Stream Leader with Supervisors and Support
Groups ................................................................................... 125
    Daily Accountability Exposes and Solves Problems Quickly .... 126
    Further Note on Task Assignments and Follow-Up .............. 126
It's Not about the Boards! .................................................................129
Early Boards as Experiments .......................................................130
Accountability Boards and Geographically Dispersed Locations ......130
Flat-Screen Monitors ................................................................. 131
The “Vacation Paradox” and Capacity for Improvement ................ 132
Improve-the-Business Capacity ................................................... 133
Impact of a Daily Few Minutes .................................................... 137
Accountability in Office Processes ................................................ 137
Summary: Daily Accountability Improves Processes ..................... 138
Study Questions ........................................................................ 139

6 Lean in Administrative, Technical, and Professional Work ..... 141
Lean Management in Enterprise Business Processes .................... 142
Lean: Not Just for Manufacturing Anymore .................................. 146
Resistance: Accountability and Visual Controls ............................ 146
Making Performance Visible—and Comparable ........................... 147
Enterprise Value Streams and Their Political Environment .......... 154
Organizational Governance for Enterprise Value Streams .............. 159
Lean Leader: Point of Contact with Executive Team .................... 165
Process and Structure ................................................................. 165
RG&A Workshop Participation .................................................... 166
RG&A Reviews Two-Way Commitments ....................................... 167
Summary .................................................................................... 168
Study Questions ........................................................................ 169

SECTION II LEARNING LEAN MANAGEMENT AND PRODUCTION:
SUPPORTING ELEMENTS OF LEAN MANAGEMENT

7 Learning Lean Management: The Sensei and Gemba Walks ... 173
Your Sensei and “True North” Provide Direction ............................ 175
Gemba Walking ........................................................................... 178
How Lean Typically Starts and Grows ........................................... 180
Gemba Walking Teaches How to See in New Ways ....................... 181
Seeing through the Surface ......................................................... 182
Focus on Both Processes—Technical and Management ............... 184
Being the Sensei: Gemba Walking as a Structured,
Repeatable Process .................................................................... 188
Letting “Students” Know What to Expect .................................... 189
Summary: Learning Lean Management by Being a Sensei’s Apprentice... 191
Study Questions ........................................................................ 192
8 Being the Sensei: Engaging Your Executives in the Lean Initiative .................................................................193
  Symptoms: Orphans, New Sheriffs, and the Next Big Thing .............195
  When Gemba Walks Are Not Enough ..................................198
  A Framework for Understanding the Engagement Problem ............200
  Redesigning Executive Gemba Walks ..................................201
    Experiential Learning ....................................................202
    Repeatable Process ......................................................202
    Lean Management as Structure .......................................202
  Nuts and Bolts of Executive Gemba Walks ................................203
  Strategic Breakdowns Are Management Problems ........................204
  “New” Executive Gemba Walks: Tools, Structure, Process ............207
  Summary ...........................................................................211
    If the Student Hasn’t Learned, the Teacher Hasn’t Taught ...........211
    Consider Executives as Customers .....................................212
  Study Questions ..................................................................213

9 Leading a Lean Operation ....................................................215
  Nine Leadership Behaviors to Learn .......................................215
    Attribute 1: Passion for Lean ...........................................218
      Willingness to Make Personal Change ...............................219
    Attribute 2: Disciplined Adherence to Process—Accountability ..220
    Attribute 3: Project Management Orientation .......................222
    Attribute 4: Lean Thinking ..............................................224
      Lean Thinking Looks for the Sources of Problems ...............225
    Attribute 5: Ownership ..................................................225
    Attribute 6: Tension between Application and Technical Details ..........................................................225
    Attribute 7: Balance between Production and Management Systems .........................................................228
    Attribute 8: Effective Relations with Support Groups ...............230
    Attribute 9: Don’t Confuse Measures of Process with Measures of Results ..................................................231
      A Measure of Process or Result? ......................................234
      Frequency of Observation ..............................................235
      Lean Leaders Recognize Imperfection ...............................236
  Summary: Consistent Leadership Is the Crucial Ingredient in Lean Operations ..............................................237
  Study Questions ..................................................................238
10 Solving Problems and Improving Processes—Rapidly .............239
  A Root Cause Orientation to Problem Solving..........................239
    Workarounds Are Anti-Improvement ....................................241
    A New Way of Thinking ...................................................241
    Should Perfection Be a Goal? .............................................243
  Structured Problem-Solving Process .....................................244
    Who Makes Improvements? ...............................................245
    Short-, Medium-, and Longer-Term Improvements ....................245
    Recommending Future Improvements ...................................247
    Managing Improvement Activities .....................................247
    Improvement Resources and Skills ....................................250
  A Rapid Response System and Implications for Support Groups ......251
    Support Group Response Time ..........................................252
    Leadership Alignment versus Changing Reporting Relationships .................................................252
  Summary: Finding the Root Cause of Problems Is Key ...............257
  Study Questions ....................................................................258

11 People—Predictable Interruption, Source of Ideas ..............259
  Whom Do I Expect Today? The Attendance Matrix ....................260
  Who Starts Where Today? The Labor and Rotation Plan .............262
  Completing the Labor Planning Suite ....................................262
    Who Is Qualified for Which Jobs? ......................................264
  How Can I Encourage Participation? The Idea System ..............265
    Who Will Work on Suggested Improvements? ........................266
  A Visual Improvement Suggestion Process ...............................266
    Making Listening Visible ................................................269
    Quick Wins and Just Do It Processes ..................................272
  Lean Training for Line Leaders ..........................................273
    Where Conventional Training Fits In ................................273
    Knowledge, Practice, Feedback: The Role of Coaching ............276
  What If Frontline People Don't Buy into Lean? ........................277
    Responding to Low Performers .......................................278
    Progressive Discipline ....................................................279
  Human Resources Policy Issues in Lean Management ................280
    Involve HR in Lean .......................................................280
  Summary: Resolving People Issues to Support Lean Production and
  Lean Management ............................................................282
  Study Questions ....................................................................283
12 Sustain What You Implement ................................................. 285
  You Already Have a Management System! .................................. 286
  What Should You Do? .................................................................. 288
    Rely on Leader Standard Work ................................................. 289
    Maintain the Visual Controls .................................................. 289
    Conduct Gemba Walks Regularly .............................................. 290
    Expect to Repeat Lessons ...................................................... 291
    “On Board” versus Active Involvement .................................... 291
    Keep Yourself Honest .............................................................. 292
    Ultimately, A Do-It-Yourself Proposition ................................ 292
  Assess Your Lean Management System ..................................... 293
    Details of the Lean Management System Assessment ............... 294
    When Should You Assess? ...................................................... 298
    Who Should Assess? .............................................................. 298
    Interpreting the Assessment ................................................... 300
    Keep Asking These Questions! ............................................... 300
  A Lean Culture Is a Beautiful Thing ......................................... 301
  Summary: Maintaining Lean Management .................................. 302
  Study Questions ....................................................................... 304

Appendix A ............................................................................... 305
Appendix B ............................................................................... 315
Appendix C ............................................................................... 325
Glossary .................................................................................. 335
Bibliography ............................................................................. 349
Index ....................................................................................... 351
About the Author ...................................................................... 367
