Electromobility in India
Attempts at leadership by businesses
in a scant policy space

Ankur Chaudhary

Bonn 2014
Contents

Abstract

Abbreviations

1 Introduction 1

2 Electromobility: what, why and how 4
  2.1 Characteristics and trends of electromobility technology 4
  2.2 Global efforts, policy motives and industry dynamics 8
  2.3 Section summary 10

3 The Indian automobile industry landscape and electro-mobility experiments 10
  3.1 The Indian automobile landscape 10
    3.1.1 The Indian passenger car industry 11
    3.1.2 The Indian two-wheeler industry 13
    3.1.3 The Indian auto-component industry 14
    3.1.4 Recent investments and strategic direction 15
  3.2 Market conditions 17
    3.2.1 Evolution of the automobile market 17
  3.3 Electromobility focused policies 19
  3.4 Section summary 21

4 Emerging sector innovation path in India 22
  4.1 Major activities 22
    4.1.1 Production of EVs 22
    4.1.2 R&D across various sub-technologies 23
    4.1.3 International and national linkages 26
  4.2 Elements of the emerging trajectories in India 28
    4.2.1 Hybridization 28
    4.2.2 Pure battery EVs 29
    4.2.3 Vehicle types 30
    4.2.4 Charging infrastructure 30
  4.3 Section summary 30
5 Innovation case studies 31

5.1 Revolo 32
5.2 TVS Qube 33
5.3 Mahindra REVA NXR (E20) 35
5.4 The discussion so far 38

6 Discussion of India’s unfolding EV trajectory 38

Bibliography 43

Annex
Annex 1: Stakeholders (discussed in detail in an earlier report on the key stakeholders in the Indian EV sector) 47
Annex 2: Relevant policies (presented in detail in an earlier report on the policy framework surrounding the Indian EV sector) 48

Figures
Figure 1: Comparative assessment of the relative cost of technology sub-components within ICEs, hybrids and pure battery EV (BEVs) 6
Figure 2: Global government targets and EV/PHEV production/sales/targets reported by OEMs 9
Figure 3: The production of two-wheelers and passenger vehicles in the Indian market 10
Figure 4: Market share of OEMs in the Indian market over the past 15 years 11
Figure 5: Market shares in the Indian passenger car market with the ownership status of the different firms 12
Figure 6: The time lag between the global and Indian launches of a particular car model over the years (based on engine version) 12
Figure 7: Market shares, 2010–2011, in the Indian two-wheeler market 13
Figure 8: Growth in the Indian auto component market over the past decade 14
Figure 9: OEM development activities in various EV-related powertrains in India 16
Figure 10: Rise in petrol and diesel prices in India over the past two decades 18
Figure 11: Comparing REVA E20 with the Nissan Leaf on performance parameters 36

Tables
Table 1: Announced EV deployment targets for major automobile market countries 1
Table 2: Taxonomy of electric / hybrid vehicles 7
