# Table of Contents

## Big Data

- Optimizing Big Data Management Using Conceptual Graphs: A Mark-Based Approach .......................... 1  
  *Yacine Djemaiel, Nejla Essaddi, and Noureddine Boudriga*

- DrugFusion - Retrieval Knowledge Management for Prediction of Adverse Drug Events ...................... 13  
  *Mykola Galushka and Wasif Gilani*

- Prescriptive Analytics for Recommendation-Based Business Process Optimization .......................... 25  
  *Christoph Gröger, Holger Schwarz, and Bernhard Mitschang*

- Towards Planning and Control of Business Processes Based on Event-Based Predictions ...................... 38  
  *Julian Krumeich, Sven Jacobi, Dirk Werth, and Peter Loos*

- Big Data as Strategic Enabler - Insights from Central European Enterprises .................................. 50  
  *Rainer Schmidt, Michael Möhring, Stefan Maier, Julia Pietsch, and Ralf-Christian Harting*

- App’ification of Enterprise Software: A Multiple-Case Study of Big Data Business Applications .......... 61  
  *Stefan Wenzel*

## Business Process Management

- Temporal Reconfiguration-Based Orchestration Engine in the Cloud Computing .............................. 73  
  *Zaki Brahmi and Chaima Gharbi*

- Data State Description for the Migration to Activity-Centric Business Process Model Maintaining Legacy Databases ......................................................... 86  
  *María Teresa Gómez-López, Diana Borrego, and Rafael M. Gasca*

- Change Analysis for Artifact-Centric Business Processes .......................................................... 98  
  *Yi Wang and Ying Wang*
Ontologies and Conceptual Modelling

Component-Based Development of a Metadata Data-Dictionary

Frank Kramer and Bernhard Thalheim

Intelligent System for Time Series Prediction in Stock Exchange Markets

Nicoleta Liviana Tudor

Natural Language Processing for Biomedical Tools Discovery:
A Feasibility Study and Preliminary Results

Pepi Sfakianaki, Lefteris Koumakis, Stelios Sfakianakis, and Manolis Tsiknakis

Collaboration

Automatic Generation of Questionnaires for Supporting Users during the Execution of Declarative Business Process Models

Andrés Jiménez-Ramírez, Irene Barba, Barbara Weber, and Carmelo Del Valle

Complexity-Aware Software Process Management: A Case of Scrum in Network Organization

Leszek A. Maciaszek and Lukasz D. Sienkiewicz

LCBM: Statistics-Based Parallel Collaborative Filtering

Fabio Petroni, Leonardo Querzoni, Roberto Beraldi, and Mario Paolucci

Service Science and Interoperability

Metamodel of a Logistics Service Map

Michael Glöckner, Christoph Augenstein, and André Ludwig

Yet another SLA-Aware WSC System

Dmytro Pukhkaiev, Tetiana Kot, Larysa Globa, and Alexander Schill

Processes within the Context of Cloud Operations Management:
A Literature Reflection

Christian Schulz and Klaus Turowski

Resource Mining: Applying Process Mining to Resource-Oriented Systems

Andrzej Stroiński, Dariusz Dwornikowski, and Jerzy Brzeziński
Specific BIS Applications

User-Defined Rules Made Simple with Functional Programming ........ 229  
*Sava Mintchev*

Risk Awareness in Open Source Component Selection .................... 241  
*Mirko Morandini, Alberto Siena, and Angelo Susi*

Continuous Quality Improvement in Logistics Service Provisioning ...... 253  
*Martin Roth, Stefan Mutke, Axel Klarmann, Bogdan Franczyk, and André Ludwig*

Author Index ................................................................. 265
