A Course on Cooperative Game Theory

Satya R. Chakravarty
Manipushpak Mitra
Palash Sarkar
Contents

Preface page vii

1. Introduction and Motivation
   1.1 A brief historical sketch 2
   1.2 An overview of the chapters 6

2. Basics and Preliminaries
   2.1 Introduction 19
   2.2 Preliminaries 19
   2.3 Illustrative examples 28
   Exercises 29

3. The Core and Some Related Solutions
   3.1 Introduction 31
   3.2 Concepts and definitions 32
   3.3 The core and dominance core 35
   3.4 A condition for the core to be non-empty 39
   3.5 Reasonable set and core cover as core catchers 43
   3.6 Some variants of the core 46
   3.7 Stable sets 48
   3.8 Applications 50
   Exercises 55

4. The Bargaining Set, Kernel and Nucleolus
   4.1 Introduction 57
   4.2 The bargaining set 58
   4.3 The kernel and pre-kernel 62
   4.4 The nucleolus, pre-nucleolus and proportional nucleolus 65
   4.5 Applications 69
   Exercises 72

5. The Shapley Value
   5.1 Introduction 74
   5.2 The formal framework: Definitions and axioms 75
   5.3 Characterization of the Shapley value 78
   5.4 A discussion on some alternative characterizations 84
Contents

5.5 Applications 85
5.6 Appendix 87
Exercises 90

6. The Core, Shapley Value and Weber Set
6.1 Introduction 92
6.2 The Weber set and core 93
6.3 Some properties of a convex game 95
6.4 Random order values and the random arrival rule 102
Exercises 105

7. Voting Games
7.1 Introduction 106
7.2 Background 108
7.3 Measures of individual voting power 114
7.4 Postulates for a measure of voting power 126
7.5 Characterizations and interpretations 135
7.6 Voting power with more than two alternatives 141
7.7 Measures of power of collectivity 142
7.8 Applications 146
Exercises 148

8. Mathematical Matching
8.1 Introduction 150
8.2 The marriage model 151
8.3 The Gale—Shapley algorithm 157
8.4 Many-to-one matchings 158
8.5 Matchings when one side does not have preferences 161
Exercises 165

9. Non-Transferable Utility Cooperative Games
9.1 Introduction 167
9.2 The basic model 168
9.3 Cooperative bargaining games 170
9.4 Exchange economy 179
Exercises 182

10. Linear Programming
10.1 The diet problem 184
10.2 Formulations of LP 185
10.3 Basic feasible solution 188
