Contents

Preface 15
About the Authors 25

PART 1 Why MIS? 29

Chapter 1 The Importance of MIS 30
Q1 Why is Introduction to MIS the Most Important Class in the Business School? 31
How Can I Attain Job Security? 33
How Can Intro to MIS Help You Learn Nonroutine Skills? 34
Jobs 36
What is the Bottom Line? 37

Q2 What Is MIS? 38
Processes, Information Systems, and Information 38
Management and Use 38
Achieve Strategies 39

Q3 How Does MIS Relate to Organizational Strategy? 40

Q4 What Five Forces Determine Industry Structure? 40

Q5 What Is Competitive Strategy? 42

Q6 How Does Competitive Strategy Determine Value Chain Structure? 43
Primary Activities in the Value Chain 43
Support Activities in the Value Chain 44
Value Chain Linkages 44

• MIS INCLASS 1: Industry Structure → Competitive Strategy → Value Chains → Business Processes ← Information Systems 45

Q7 How Does Competitive Strategy Determine Business Processes and Information Systems? 45

• ETHICS GUIDE: Ethics and Professional Responsibility 48

• CASE STUDY 1: Singing Valley 52

Chapter 2 Business Processes, Information Systems, and Information 54

Q1 What Is a Business Process? 55
An Example Business Process 56
Why Do Organizations Standardize Business Processes? 57

Q2 What Is an Information System? 58
How Can I Use the Five-Component Model? 59

Q3 How Do Business Processes and Information Systems Relate? 59
The Role of Procedures 60

Q4 How Do Structured and Dynamic Processes Vary? 61
Characteristics of Structured Processes 61
Characteristics of Dynamic Processes 62

Q5 What Is Information? 63
Definitions Vary 63
Common Elements in the Definitions 63
How Can I Use These Ideas About Information? 64

Q6 What Are Necessary Data Characteristics? 65
Accurate 65
Timely 65
PART 2  Information Technology  75

Chapter 3  Hardware, Software, and Networks  76
Q1 What Do Business Professionals Need to Know About Computer Hardware?  78
  Hardware Components  78
  Types of Hardware  78
  Computer Data  79

Q2 What Do Business Professionals Need to Know About Software?  80
  What Are the Major Operating Systems?  80
  Virtualization  83
  Own Versus License  84
  What Types of Applications Exist, and How Do Organizations Obtain Them?  84
  What Is Firmware?  86
  Is Open Source a Viable Alternative?  86

Q3 What Are the Differences Between Native and Thin-Client Applications?  87
  MIS INCLASS 3: 3D Print Yourself!  88
  Developing Native Applications  88
  Developing Thin-Client Applications  90
  Which Is Better?  91

Q4 What Characterizes Quality Mobile User Experiences?  91
  Feature Content  92
  Use Context-sensitive Chrome  92
  Provide Animation and Lively Behavior  92
  Design to Scale and Share  93
  Use the Cloud  94

Q5 What Do Business Professionals Need to Know About Data Communications?  95
  What Are the Components of a LAN?  95
  How Can You Connect Your LAN to the Internet?  97
  Communication over the Internet  98
  An Internet Example  98

Q6 What Happens on a Typical Web Server?  99
  Three-Tier Architecture  100
  Watch the Three Tiers in Action!  101
  Hypertext Markup Language (html)  101

Q7 Why Is the Cloud the Future for Most Organizations?  102
  Why Is the Cloud Preferred to In-House Hosting?  104
  Why Now?  105
  When Does the Cloud Not Make Sense?  106
  How Do Organizations Use the Cloud?  106
  ETHICS GUIDE: Showrooming: The Consequences  108
  CASE STUDY 3: The Apple of Your i  113

Chapter 4  Database Processing  116
Q1 What Is the Purpose of a Database?  118
Q2 What Are the Contents of a Database?  119
  What Are Relationships Among Rows?  120
  Metadata  121
Q3 What Are the Components of a Database Application System? 122
   What Is a Database Management System? 122
   Creating the Database and Its Structures 123
   Processing the Database 123
   Administering the Database 124
   What Are the Components of a Database Application? 124
   What Are Forms, Reports, Queries, and Application Programs? 125
   Why Are Database Application Programs Needed? 126
   Multi-User Processing 126
   ■ MIS INCLASS 4: How Much Is a Database Worth? 128
   Enterprise DBMS Versus Personal DBMS 128

Q4 How Do Data Models Facilitate Database Design? 129
   What Is the Entity-Relationship Data Model? 130
   Entities 130
   Relationships 131

Q5 How Is a Data Model Transformed into a Database Design? 133
   Normalization 133
   Data Integrity Problems 133
   Normalizing for Data Integrity 134
   Summary of Normalization 135
   Representing Relationships 135
   What Is the User’s Role in the Development of Databases? 135

Q6 Why Are NoSQL and Big Data Important? 138
   Will NoSQL Replace Relational DBMS Products? 138
   How Does Big Data Differ from Relational Data? 138

Q7 How Can the Intramural League Improve Its Database? 139
   League Database, Revision 1 140
   League Database, Revision 2 141
   ■ ETHICS GUIDE: Querying Inequality? 144
   ■ CASE STUDY 4: Fall Away with Dynamo, Bigtable, and Cassandra 150

PART 3 Operational Processes and Information Systems 153

Chapter 5 Using IS to Improve Processes 154
Q1 What Are the Important Characteristics of Processes in Organizations? 156
   Examples of Processes 156
   Scope of Processes 157
   Objectives of Processes 158

Q2 What Are Examples of Common Business Processes? 158
   Inbound Logistics Processes 160
   Operations Processes 160
   Outbound Logistics Processes 160
   Sales and Marketing Processes 160
   Service Processes 160
   Human Resources Processes 161
   Technology Development Processes 161
   Infrastructure Processes 161
   Applying Process Characteristics 161

Q3 How Can Management Improve Processes? 162
   Process Objectives 162
   Process Measures 163

Q4 How Can Information Systems Be Used to Improve Processes? 163
   Improve an Activity 164
   Improve Data Flow Among Activities 164
   Improve Control of Activities 164
Chapter 6  Supporting Processes with ERP Systems  181

Q1 What Problem Does an ERP System Solve?  182

Q2 What Are the Elements of an ERP System?  187

Q3 What Are the Benefits of an ERP System?  193

Q4 What Are the Challenges of Implementing an ERP System?  194

Q5 What Types of Organizations Use ERP?  198

Q6 Who Are the Major ERP Vendors?  200

Chapter 7  Supporting the Procurement Process with SAP  209

Q1 What Are the Fundamentals of a Procurement Process?  210

Q2 How Did the Procurement Process at CBI Work Before SAP?  213

Q3 What Were the Problems with the Procurement Process Before SAP?  214

Q4 How Does CBI Implement SAP?  216

Q5 How Does the Procurement Process Work at CBI After SAP?  218

Q6 How Can SAP Improve Supply Chain Processes at CBI?  223
Q7 How Does the Use of SAP Change CBI? 228
Wally's Job Change 229

Q8 What New IS Will Affect the Procurement Process in 2024? 230
- ETHICS GUIDE: Estimation Ethics 232
- ACTIVE CASE 7: SAP Procurement Tutorial 236

Appendix 7 SAP Procurement Tutorial 237

Chapter 8 Supporting the Sales Process with SAP 254
Q1 What Are the Fundamentals of a Sales Process? 255
Q2 How Did the Sales Process at CBI Work Before SAP? 257
Q3 What Were the Problems with the Sales Process Before SAP? 258
   - Sales Problems 258
   - Warehouse Problems 259
   - Accounting Problems 259
Q4 How Does CBI Implement SAP? 259
Q5 How Does the Sales Process Work at CBI After SAP? 260
   - Sales 260
   - Warehouse 261
   - Accounting 262
   - The Benefits of SAP for the CBI Sales Process 263
- MIS INCLASS 8: Building a Model 265
Q6 How Can SAP Improve Customer-Facing Processes at CBI? 265
   - Improving Customer-Facing Processes by Sharing Data 266
   - Improving Customer-Facing Processes with Integration 267
   - Challenges 268
Q7 How Does E-Commerce Improve Processes in an Industry? 268
   - E-Commerce Merchant Companies 269
   - Nonmerchant E-Commerce 270
   - How Does E-Commerce Improve Market Efficiency? 270
Q8 What New IS Will Affect the Sales Process in 2024? 271
   - Process Integration and You in 2024 273
- ETHICS GUIDE: Are My Ethics for Sale? 274
- ACTIVE CASE 8: SAP Sales Tutorial 278

Appendix 8 SAP Sales Tutorial 279

PART 4 Dynamic Processes and Information Systems 297

Chapter 9 Collaboration and IS 299
Q1 What Is Collaboration, and Why Is It Important to Business? 300
   - The Two Key Activities of Collaboration 301
   - Importance of Effective Critical Feedback 301
   - Guidelines for Giving and Receiving Critical Feedback 303
   - Warning! 303
Q2 What Are the Objectives of the Collaboration Process? 304
   - Product Objective: Successful Output 304
   - Team Objective: Growth in Team Capability 304
   - Individual Objective: Meaningful and Satisfying Experience 305
Q3 What Are the Key Components of a Collaboration IS? 306
   - The Five Components of a Collaboration IS 306
   - Key Attributes of Collaboration IS 307
Q4 How Can Collaboration IS Support the Communicating Activity? 307
Q5 How Can Collaboration IS Support the Iterating Activity? 311
   - No Iteration Control 311
Contents

Iteration Management 312
Iteration Control 313

Q6 How Can Collaboration IS Support Business Processes? 314
  The Project Management Process 315
  The Workflow Process 315
  Supporting New Processes with Collaboration IS 316

Q7 Which Collaboration IS Is Right for Your Team? 317
  Three Sets of Collaboration Tools 317
  Choosing the Set for Your Team 318
  Don’t Forget Procedures and People! 319
  • MIS INCLASS 9: Virtual Practice! 320

Q8 2024? 321
  • ETHICS GUIDE: Virtual Ethics? 322
  • CASE STUDY 9: Eating Our Own Dog Food 327

Chapter 10 Social Media and IS 331

Q1 What Is Social Media, and Why Is It Important to Business? 332

Q2 What Are the Objectives of the Social Media Process? 333
  Effectiveness Objectives 334
  Efficiency Objectives 335

Q3 What Are the Key Components of a Social Media IS? 336
  The Five Components of a Social Media IS 336
  Key Attributes of a Social Media IS 337

Q4 How Do Social Media IS Support Social Media Activities? 338
  Creating 338
  Sharing 339

Q5 How Can Social Media IS Support Business Processes? 341
  The Promotion Process 341
  The Customer Service Process 342
  Supporting New Processes with Social Media IS 343
  Tips for Conducting Social Media Promotions 344

Q6 How Can Social Media IS Support the Process of Building Social Capital? 345
  • MIS INCLASS 10: Using Twitter to Support the Class Discussion Process 345
  How an Organization Can Use Social Media IS to Increase the Number of Relationships 346
  How an Organization Can Use Social Media IS to Increase the Strength of Relationships 346
  How an Organization Can Use Social Media IS to Connect to Those with More Assets 347

Q7 How Do Businesses Manage the Risks of Social Media? 348
  Management Risks 348
  Employee Communication Risks 349
  User-Generated Content Risks 349
  Responding to User Content Problems 350

Q8 2024? 351
  • ETHICS GUIDE: Ethics, Social Marketing, and Stretching the Truth 352
  • CASE STUDY 10: Tourism Holdings Limited (thl) 356

Chapter 11 Business Intelligence and IS 358

Q1 What Is Business Intelligence, and Why Is It Important to Business? 359
  Examples of BI 361

Q2 What Are the Objectives of the BI Process? 361

Q3 What Are the Key Components of a Business Intelligence IS? 363
  The Five Components of a BI Information System 363
Key Attributes of BI Information Systems 364

Q4 How Do BI Information Systems Support BI Activities? 364
   Acquiring 365
   Analyzing 366
   Publishing 370

Q5 How Can BI Information Systems Support Business Processes? 371
   Supporting Existing Processes with BI Information Systems 372
   Supporting New Processes with BI Information Systems 374

Q6 What Is a Big Data BI System, and How Is It Used? 374
   MapReduce Technique 375
   SAP HANA Technique 375
   Processes Supported by Big Data BI IS 376

Q7 How Do Businesses Manage the Risks of Business Intelligence? 377
   Data Problems 377
   People Problems 378
   • MIS INCLASS 11: I Know That, I Think 379

Q8 How Does SAP Do BI? 380
Q9 2024? 380
   Mobile Devices 380
   Unstructured Data 381
   Real-time Use 381
   Technology Backlash 381
   • ETHICS GUIDE: Unseen Cyberazzi 382
   • CASE STUDY 11: Harryop the Cookie Cutter 386

Appendix 11 SAP Business Intelligence Tutorial 389

PART 5 MIS Management Processes 393

Q1 What Are the Activities of Business Process Management? 395
   The BPM Monitoring Activity 396
   The BPM Modeling Activity 397
   The BPM Create Components Activity 397
   The BPM Implement Process Activity 397

Q2 What Are the Activities of the Systems Development Life Cycle (SDLC) Development Process? 397
   Define System 398
   Determine Requirements 399
   Create Components 400
   Implement 400
   Maintain the System 402

Q3 How Can the Scrum Process Overcome the Problems of the SDLC? 403
   What Are the Principles of Agile Development Methodologies? 403
   What Is the Scrum Process? 404
   When Are We Done? 406

   The IS Security Threat/Loss Scenario 407
   What Are the Sources of Threats? 408
   What Types of Security Loss Exist? 409
   Challenges of Information Systems Security 411

Q5 How Should You Respond to Security Threats? 411
Q6 How Should Organizations Respond to Security Threats? 412
Q7 How Can Technical and Data Safeguards Protect Against Security Threats? 413
   Identification and Authentication 413
   Encryption 414
   Firewalls 414
   Malware Protection 415
   Data Safeguards 416

Q8 How Can Human Safeguards Protect Against Security Threats? 416
   Human Safeguards for Employees 417
   Human Safeguards for Nonemployee Personnel 418
   Account Administration 419
   Backup and Recovery Procedures 419
   Security Monitoring 420

Q9 How Should Organizations Respond to Security Incidents? 420
   ■ MIS INCLASS 12: Phishing for Credit Cards, Identifying Numbers, and Bank Accounts 421
   ■ ETHICS GUIDE: Security Privacy 422
   ■ CASE STUDY 12: Will You Trust FIDO? 426

Application Exercises 428
Glossary 447
Index 459
