Matching Economic Migration with Labour Market Needs
**Table of contents**

Executive summary ........................................................................................................................................... 15
Editorial: Turning the corner .............................................................................................................................. 17

**Part I. Demographic context**

*Chapter 1. Demographic trends, labour market needs and migration .......................................................... 23*
*by François Héran*
1.1. Introduction ............................................................................................................................................... 24
1.2. Conclusion: Learning from the past – Conciliating economic needs and human rights ... 33
Notes ................................................................................................................................................................. 34
References ....................................................................................................................................................... 35

*Chapter 2. Demographic change and the future of the labour force in the EU27, other OECD countries and selected large emerging economies ......................................................... 37*
*by Jason Gagnon*
2.1. Introduction ............................................................................................................................................... 38
2.2. Main findings ............................................................................................................................................. 38
2.3. Long-term global demographic trends .................................................................................................. 39
2.4. Recent trends in working-age population in the EU27 and other OECD countries ............................ 41
2.5. The labour force: Demographic vs. cohort effects ............................................................................... 46
2.6. Beyond participation: Skills and geographical mismatches ................................................................. 50
2.7. What role does international migration play? ....................................................................................... 51
2.8. Conclusion ............................................................................................................................................... 56
Notes ................................................................................................................................................................. 57
References ....................................................................................................................................................... 58

*Chapter 3. Current and future skills of the workforce: The demography of educational attainment and the role of migration ................................................................. 67*
*by Josep Mestres*
3.1. Introduction ............................................................................................................................................... 68
3.2. Educational attainment of the labour force and the role of migration ............................................... 68
3.3. Projections of the labour force by educational attainment for 2020 .................................................. 79
3.4. Conclusion ............................................................................................................................................... 94
Notes ................................................................................................................................................................. 96
References ....................................................................................................................................................... 97
Annex 3.A2. Methodology for estimating the projected educational attainment of the workforce in 2020 ................................................................. 100
# Table of Contents

## Chapter 4. The demography of occupational change and skill use among immigrants and the native-born

by Georges Lemaitre

4.1. Introduction ............................................. 112
4.2. Main findings ........................................... 112
4.3. The demography of occupational change ................. 114
4.4. The extent of occupational change over the decade 2000-10 .......................................................... 116
4.5. Occupational change and intra- and extra-European migration ......................................................... 130
4.6. Occupational change: The gender dimension .......... 134
4.7. Conclusion .................................................. 138
Notes ............................................................... 141
References ......................................................... 142
Annex 4.A2. Occupational change and overqualification .......................................................... 146

### Part II. Migrant skills

## Chapter 5. Immigrant skills, their measurement, use and return:

A review of literature ........................................... 153

by Ana Damas de Matos

5.1. Introduction ............................................. 154
5.2. Immigrants’ educational attainment and skills .......... 154
5.3. Returns to education and skills in the host country labour market ......................................................... 161
5.4. Explanations for the differences in returns to immigrant and native skills ........................................... 167
5.5. Conclusion .................................................. 173
Notes ............................................................... 176
References ......................................................... 177
Annex 5.A2. Explanatory factors of the difference in returns to education between immigrants and natives .......... 185

## Chapter 6. The qualifications of immigrants and their value in the labour market:

A comparison of Europe and the United States ............... 187

by Ana Damas de Matos and Thomas Liebig

6.1. Introduction ............................................. 188
6.2. The qualifications of immigrants .......................... 189
6.3. The value of immigrants’ qualifications in the labour market ......................................................... 201
6.4. Selected issues in transferring qualifications from the country of origin to the host country .................. 209
6.5. Conclusion .................................................. 213
Notes ............................................................... 214
References ......................................................... 216
### Chapter 7. The international portability of migrant human capital: Canadian experiences
by Arthur Sweetman

<table>
<thead>

# Chapter 11. Migration in Europe: An overview of results from the 2008 immigrant module with implications for labour migration

---

### 11.1. Introduction

---

### 11.2. The data source

---

### 11.3. International migration by reason for migrating

---

### 11.4. The evolution of the distribution of reasons for migrating by years of residence

---

### 11.5. Employment rates by category of entry and their evolution with years of residence

---

### 11.6. Occupation skill levels of recent immigrants and overqualification

---

### 11.7. Sources of skills

---

### 11.8. Job-changing among recent international migrants

---

### 11.9. A recapitulation of results from the module

---

### 11.10. Policy implications

---

### 11.11. Increasing retention

---

### 11.12. Increasing the volume of highly skilled migration

---

### 11.13. Conclusion

---

### Notes

---

### References
