From Uneconomic Growth to a Steady-State Economy

Herman E. Daly
Emeritus Professor, School of Public Policy, University of Maryland, USA and Winner of the 2014 Blue Planet prize

ADVANCES IN ECOLOGICAL ECONOMICS

Edward Elgar
Cheltenham, UK • Northampton, MA, USA
## Contents

*Preface* viii

1. Introduction: envisioning a successful steady-state economy 1

**PART I EARLY DISCUSSION OF BASIC STEADY-STATE CONCEPTS**

2. The economics of the steady state 9
3. In defense of a steady-state economy 18

**PART II LATER EXTENSIONS INTO STANDARD ECONOMICS**

4. Towards an environmental macroeconomics 39
5. Growth, debt and the World Bank 47

**PART III RECENT REVIVAL OF THE GROWTH DEBATE AND POLICIES FOR A STEADY STATE**

6. A further critique of growth economics 59
7. Moving from a failed growth economy to a steady-state economy 74
8. Climate policy: from 'know how' to 'do now' 87

**PART IV ETHICAL FOUNDATIONS OF A STEADY-STATE ECONOMY**

9. Incorporating values in a bottom-line ecological economy 95
10. Ethics in relation to economics, ecology and eschatology 112
From uneconomic growth to a steady-state economy

PART V SHORT ESSAYS ON CURRENT ISSUES RELATED TO GROWTH VERSUS STEADY STATE

A. MEANING OF GROWTH

1. Two meanings of 'economic growth'
2. What is a 'green economy'?
3. Wealth, illth and net welfare
4. Limits to growth – 40 more years?
5. Krugman's growthism

B. BIOPHYSICAL LIMITS

6. Thermodynamic roots of economics
7. Dualist economics
8. A smarter planet?
9. Geo-engineering or cosmic protectionism?

C. ETHICAL AND PHILOSOPHICAL LIMITS

10. Presuppositions of policy
11. Homo economicus versus person-in-community
12. The lurking inconsistency
13. Renewable ignorance
14. Depletion of moral capital as a limit to growth

D. REAL-WORLD ECONOMICS

15. Not production, not consumption, but transformation
16. What is the limiting factor?
17. Opportunity cost of growth
18. Sustaining our commonwealth of nature and knowledge
19. Uneconomic growth deepens depression

E. POPULATION

20. The big population question
21. Open borders and the tragedy of open access commons
22. Elitist growth by cheap labor policies
