Foreword .................................................................................................................. 7
Acknowledgements .................................................................................................... 9
List of Figures ............................................................................................................ 15
List of Tables .............................................................................................................. 17
List of Important Abbreviations ............................................................................... 19
1. Introduction ........................................................................................................... 21
   1.1 Macro-Trends in the Global and European Gas Markets ......................... 21
   1.2 Research Design and Methodology ......................................................... 27
      1.2.1 Research Questions and Hypotheses .............................................. 27
      1.2.2 State of the Art .............................................................................. 30
      1.2.3 Conceptual Challenges and Research Gap ..................................... 37
      1.2.4 Research Approach ..................................................................... 39
2. Theory and Methodology ..................................................................................... 41
   2.1 A Historical Approach to Energy Security ............................................ 41
   2.2 Defining and Examining Energy Security: Methodological Challenges ... 47
   2.3 A Theoretical and Methodological Approach to Gas Security Analysis ... 55
      2.3.1 The Traditional Gas Security Framework ..................................... 56
      2.3.2 Compatibility With Current Energy Security Concepts .................. 58
      2.3.3 Traditional and Liberalised Gas Markets: Theoretical Assumptions 60
      2.3.4 Measuring Energy Security: The Choice of Indicators ................. 63
3. EU Energy Legislation and Security of Gas Supply ......................................... 67
   3.1 EU Energy Cooperation ............................................................................ 67
      3.1.1 The European Coal and Steel Community and EURATOM .......... 67
      3.1.2 The International Energy Agency .................................................. 67

4.4 Gas Supply Security

4.4.1 Official Assessments (2009-2010)
- 4.4.1.1 The Wicks Report (2009)
- 4.4.1.2 Ofgem Project Discovery (2009/2010)
- 4.4.1.3 Pöyry Gas Security of Supply Report to DECC (2010)
- 4.4.1.5 The UK Debate on Gas Supply Security

4.4.2 Resulting Policy Approaches (2011-2012)
- 4.4.2.1 Electricity Market Reform Proposals (2011) and Energy Bill (2012)
- 4.4.2.2 DECC Gas Generation Strategy (2012)

4.4.3 What about Price Volatility?
- 4.4.3.1 The Challenge
- 4.4.3.2 Storage Capacity in the UK

4.5 The UK Gas Supply Security Framework: Summary and Conclusions
- 4.5.1 R/P Ratio and Import/Source Dependency
- 4.5.2 Long-Term Contracts and Investments
- 4.5.3 Emergency Security Events

5. The German Gas Market

5.1 Market Structure and Competition
- 5.1.1 Historical Development
- 5.1.2 Market Structure
- 5.1.3 Competition

5.2 Gas Trading in Germany – Framework Conditions and Developments
- 5.2.1 Negotiating a Model for Network Access in Germany
- 5.2.2 The Cooperation Agreement II
- 5.2.3 Reducing the Number of Market Areas: Opposition and Development
- 5.2.4 OTC Trading and Exchange-Based Trading in Germany
- 5.2.5 Balancing
- 5.2.6 Capacity Allocation and Congestion Management

5.3 Supply and Demand
5.3.1 Gas Infrastructure (Import, Export, Storage) ........................................... 217
  5.3.1.1 Status Quo ......................................................................................... 217
  5.3.1.2 Planned Projects ............................................................................. 222
5.3.2 The Role of Gas in Germany’s Energy Mix ............................................. 224
  5.3.2.1 Supply and Demand: Historical Development ......................... 224
  5.3.2.2 Supply and Demand: Projections ................................................. 232
5.4 Gas Supply Security ................................................................................. 240
  5.4.1 BMWi Monitoring Report Concerning the Security of Gas Supply (2013) ... 240
  5.4.2 BNetzA Report on The Russian–Ukrainian Gas Crisis (2009) ............. 241
  5.4.3 The Cold Snap of February 2012: A Supply Crisis? – Interpretations .... 246
  5.4.4 Developments .................................................................................... 254
  5.4.5 The 2013 Coalition Agreement .......................................................... 257
5.5 The German Gas Supply Security Framework: Summary and Conclusions ... 259
  5.5.1 R/P Ratio and Import/Source Dependency ........................................ 259
  5.5.2 Long-term Contracts and Investments ............................................... 262
  5.5.3 Emergency Security Events .............................................................. 266
6. Theory and Market Realities .................................................................... 271
  6.1 Liberalisation and Gas Supply Security: Theoretical Assumptions and Market Realities in the UK and Germany ....................................................... 271
    6.1.1 The Reduction of Monopoly Power .................................................. 271
    6.1.2 Resource Depletion and the Risk of Import Dependence ............... 274
    6.1.3 Investments in Strategic Infrastructure and Emergency Provisions .... 276
  6.2 The Traditional Gas Security Framework in the UK and Germany: Challenges and Policy Recommendations ................................................................. 278
    6.2.1 R/P Ratio and Import/Source Dependence .................................... 278
    6.2.2 Long-term Contracts and Investments .......................................... 283
    6.2.3 Emergency Security Events ............................................................ 289
  6.3 Energy Security Dimensions and the UK and German Gas Markets .......... 293
  6.4 Conclusions ........................................................................................... 297

Bibliography ............................................................................................... 307
