1 Developing countries and the concept of development	1
1.1. Approaches to development	1
1.2. The development debate	4
1.3. Growth and development	4
1.4. Are growth and development desirable?	9
1.5. Development and Westernisation	11
1.6. Indicators of growth and development	12
1.7. Does the 'Third World' exist?	15
1.8. The gap between rich and poor countries	27
1.9. What do developing countries have in common?	31
1.10. The framework of proximate, intermediate and ultimate sources of growth and development	37
<i>Questions for review</i>	39
<i>Further reading</i>	39
2 Development of the international economic order, 1450–2015	41
2.1. International economic order	41
2.2. Economic breakthrough and external expansion from Western Europe	41
2.2.1. Economic growth before 1500	42
2.2.2. Pre-modern international orders	43
2.2.3. China in the fourteenth and fifteenth centuries	44
2.3. Why expansion from Europe instead of from China?	45
2.4. European expansion in the world	49
2.4.1. Types of international economic orders	51
2.4.2. The first wave of expansion, 1400–1815	53
2.4.3. The first wave of decolonisation	56
2.4.4. The second phase of European expansion, 1815–1913	56
2.4.5. The period 1870–1913	58
2.4.6. Migration flows	59
2.4.7. Non-colonised areas	65
2.4.8. Latecomers in the process of economic development	65

2.4.9.	The period 1913–50	66
2.4.10.	The period after the Second World War	66
2.4.11.	Two perspectives on developments in the world economy, 1450–2015	68
2.5.	Key issues in development	69
	<i>Questions for review</i>	70
	<i>Further reading</i>	71
3	Growth and stagnation: theories and experiences	73
3.1.	What are the sources of growth and development?	73
3.2.	Classical thinking about growth, development and stagnation	80
3.2.1.	Adam Smith	80
3.2.2.	The classical economists Ricardo, Malthus and Mill	80
3.2.3.	Friedrich List	81
3.2.4.	Classical sociologists: Spencer, Tönnies and Durkheim	81
3.2.5.	Karl Marx	82
3.2.6.	Theories of imperialism	84
3.2.7.	Max Weber and Joseph Schumpeter	84
3.3.	Internal and external approaches	86
3.4.	Explanations of economic backwardness	87
3.4.1.	Rostow's theory of the stages of economic growth	87
3.4.2.	Kuznets' preconditions for industrialisation	89
3.4.3.	Neoclassical theories of growth	90
3.4.4.	Growth accounting	92
3.4.5.	New growth theory	93
3.4.6.	North and Thomas: efficient institutions	94
3.4.7.	Myrdal: institutional reforms	95
3.4.8.	Rodrik: identifying the binding constraints to growth	95
3.5.	Explanations of underdevelopment	97
3.5.1.	Neo-Marxist theories of underdevelopment	99
3.5.2.	Structuralism and theories of unequal exchange	100
3.5.3.	Underdevelopment theories: an evaluation	102
3.6.	Combining internal and external influences	103
3.6.1.	Advantages of technological backwardness	104
3.6.2.	Evolutionary theories of economic change	106
3.7.	Empirical study of development experiences	107
3.7.1.	Growth of income per capita: can developing countries escape stagnation?	108
3.7.2.	Investment: how important is capital?	112
3.7.3.	Export performance	113
3.7.4.	Can primary exporters become manufacturing exporters?	116
3.7.5.	External finance: does money flow from poor to rich countries?	116
3.7.6.	Are developing countries dominated by foreign interests?	120
3.7.7.	Are developing countries capable of structural change?	121
3.7.8.	How unequal is the income distribution?	125
	<i>Questions for review</i>	128
	<i>Further reading</i>	129

4	Technology and development	131
4.1.	The role of technology	132
4.2.	The technology race	133
4.3.	Technological change and increases in productive capacity	134
4.3.1.	How to increase labour productivity?	136
4.3.2.	Investing in technological change	138
4.3.3.	Diffusion of technology and absorptive capabilities	138
4.3.4.	The knowledge economy: technology, productivity and competitiveness	139
4.4.	Indicators for science, technology and innovation	140
4.5.	Economic theories about the role of technological change revisited	141
4.6.	Consequences of the acceleration of technological development for developing countries	143
4.6.1.	Acceleration of global technological change	143
4.6.2.	Knowledge gaps	143
4.6.3.	New opportunities offered by technological development	145
4.6.4.	New threats	149
4.7.	International technology transfer and technology diffusion	149
4.7.1.	International technology transfer	149
4.7.2.	Intellectual property rights	150
4.7.3.	Absorptive capacity	151
4.8.	Biotechnology and information and communication technology	155
4.8.1.	Biotechnology	155
4.8.2.	Information and communication technology	156
4.9.	National and international policy	156
	<i>Questions for review</i>	158
	<i>Further reading</i>	158
5	Population and development	160
5.1.	Introduction	161
5.2.	Perspectives on population growth	162
5.3.	Growth of world population	162
5.4.	The demographic transition	165
5.5.	Demographic developments in developing countries	167
5.6.	Socio-economic consequences of population growth	172
5.6.1.	Pessimistic and optimistic perspectives	172
5.6.2.	Malthusian analyses	174
5.6.3.	The Neo-Malthusian trap	174
5.6.4.	Growth of national income, growth of per capita income and the dependency ratio	175
5.6.5.	Changes in the age structure and the demographic dividend	176
5.6.6.	Dependency ratio and savings	176
5.6.7.	Population growth and investment	177
5.6.8.	Population growth, education and healthcare	178
5.6.9.	Employment, income distribution and poverty	178
5.6.10.	Population growth and the environment	181

5.6.11.	Population growth and technological progress	187
5.6.12.	Consequences of population growth: concluding remarks	188
5.7.	Why do people in developing countries have so many children?	188
5.7.1.	Introduction	188
5.7.2.	Intermediate determinants of fertility: the Bongaarts model	189
5.7.3.	Economic explanations of fertility	190
5.7.4.	Cultural and institutional explanations of fertility	192
5.8.	Policy	194
	<i>Questions for review</i>	197
	<i>Further reading</i>	197
6	Health, healthcare and development	199
6.1.	The state of health in developing countries	200
6.1.1.	Quantitative indicators of the state of health	200
6.1.2.	Infant and child mortality	201
6.1.3.	Life expectancy	203
6.1.4.	Patterns of disease and health	206
6.1.5.	Common infectious and parasitic diseases in developing countries	207
6.1.6.	Epidemiological transition	213
6.2.	Theoretical explanations of changes in health and morbidity	214
6.2.1.	Factors affecting the state of health	215
6.2.2.	Preston: per capita income and life expectancy	216
6.2.3.	McKeown: the importance of nutrition	217
6.2.4.	Preston and McKeown	217
6.2.5.	The Mosley model and the importance of education	218
6.2.6.	Caldwell: the importance of healthcare policy	221
6.2.7.	Standards of living, education, medical technology and healthcare systems: a synthesis	225
6.3.	Health and economic development	226
6.4.	Healthcare policy	229
	<i>Questions for review</i>	234
	<i>Further reading</i>	235
7	Education and development	237
7.1.	Theories of the contribution of education to economic development	238
7.1.1.	'Human capital' theory	238
7.1.2.	Criticisms of human capital theory	242
7.1.3.	Screening theory	242
7.1.4.	Criticisms of screening theory	244
7.1.5.	An evaluation of the human capital debate	244
7.1.6.	Education as a necessary but not sufficient condition for development: thresholds and complementarities	246
7.2.	Indicators of educational development	249
7.2.1.	Indicators of educational enrolment	249
7.2.2.	Educational attainments	251

7.2.3.	Financial indicators	251
7.2.4.	Physical indicators	251
7.2.5.	Educational outcomes: literacy	251
7.2.6.	Educational outcomes: cognitive skills	252
7.3.	Educational performance in developing countries	252
7.3.1.	The initial situation after the Second World War	252
7.3.2.	Increases in educational enrolment	253
7.3.3.	Education completed	256
7.3.4.	Years of education per member of the population	257
7.3.5.	Educational expenditures	257
7.3.6.	Cognitive skills	263
7.3.7.	Non-formal and informal education	263
7.3.8.	Literacy	265
7.3.9.	Nation building	269
7.3.10.	Summary: comparison with developments in more developed countries	270
7.4.	Problems and challenges	271
7.4.1.	Discrepancies between educational needs and financial resources	271
7.4.2.	The quality of education	272
7.4.3.	Lack of relevance	272
7.4.4.	Unequal access to education	274
7.4.5.	Mismatch between education and the labour market	275
7.4.6.	Education and the national innovation system	276
7.4.7.	The knowledge economy: increased importance of tertiary education	276
7.4.8.	Brain drain versus brain circulation	277
7.5.	Policy	278
	<i>Questions for review</i>	279
	<i>Further reading</i>	280
8	Economic development, structural change and industrialisation	282
8.1.	Economic development and structural transformation	283
8.1.1.	Definitions of economic sectors	284
8.1.2.	Structural change	286
8.2.	Capital accumulation and structural change	291
8.2.1.	Capital accumulation and industrialisation	291
8.2.2.	Accumulation of industrial capital in open and closed models of the economy; early and late stages of development	292
8.3.	The debate about engines of growth	294
8.3.1.	Introduction	294
8.3.2.	Manufacturing as the engine of growth	295
8.3.3.	Is the agricultural sector a stagnant or a dynamic sector?	298
8.3.4.	What about service-led growth?	300
8.3.5.	Conclusion	301
8.4.	Structural change in closed economies at early stages of development	301

8.4.1.	The development of agriculture as a prerequisite for industrialisation at early stages of development	301
8.4.2.	Historical examples of relationships between agriculture and industry	302
8.4.3.	Conclusion	303
8.5.	Open model: are primary exports an engine of growth and structural transformation?	303
8.5.1.	Introduction	303
8.5.2.	Intermezzo: comparative advantage and the role of trade in development	304
8.5.3.	Primary exports between 1870 and 1913: vent for surplus	306
8.5.4.	Can primary exports function as an engine of growth?	308
8.5.5.	Export pessimism	311
8.5.6.	Debates about export pessimism and export optimism	315
8.5.7.	Concluding remarks	321
8.6.	Closed model: interactions between agriculture and industry in later stages of development and structural change	321
8.6.1.	Introduction: import-substituting industrialisation in the closed model	321
8.6.2.	Transfer mechanisms	322
8.6.3.	Towards a balance between agriculture and industry	322
8.6.4.	The mix of negative and positive incentives in a balanced growth path	324
8.7.	Open model: labour-intensive manufactured exports	326
8.8.	Concluding remarks	326
	<i>Questions for review</i>	327
	<i>Further reading</i>	328
9	Industrial development	330
9.1.	Introduction	331
9.2.	Large-scale industrialisation and balanced growth strategies, 1950–80	333
9.2.1.	Economic development with unlimited supplies of labour	333
9.2.2.	Capital–output ratio	336
9.2.3.	Shortage of capital as the key bottleneck in economic development	337
9.2.4.	Does economic development result in increasing income inequality?	337
9.2.5.	The two-gap model of foreign finance: the role of financial flows from abroad	339
9.2.6.	Big is beautiful: large-scale investment, government planning and import substitution	340
9.3.	Criticisms of orthodox industrialisation strategies	345
9.3.1.	Shortcomings of the Lewis model	345
9.3.2.	Is capital really so important?	346
9.3.3.	How important is the scale of investment?	347
9.3.4.	Urban industrial bias and the neglect of agriculture	348
9.4.	Alternative industrialisation strategies	350
9.4.1.	Balanced growth path	350
9.4.2.	Unbalanced growth	351
9.4.3.	Medium and small-scale enterprises and the urban informal sector	354
9.5.	Export-oriented industrialisation	357

9.5.1.	The shift from import substitution to export orientation	357
9.5.2.	Technological upgrading and learning	363
9.5.3.	Global value chains, FDI and the role of MNCs in development	364
9.5.4.	Resource-based industrialisation as an alternative export strategy <i>for resource rich economies</i>	366
9.6.	Criticisms of market-oriented policies and the re-emergence of industrial policy	368
9.7.	Outcomes of industrialisation strategies	372
9.8.	Conclusions, new challenges and new paradigms	378
	<i>Questions for review</i>	379
	<i>Further reading</i>	380
10	Agricultural development and rural development	382
10.1.	Is there enough food to feed the world population?	383
10.2.	What are the sources of growth of agricultural production?	390
10.2.1.	How much land is still left for cultivation?	390
10.2.2.	Intensification of land use	396
10.2.3.	Increasing yields per harvest	401
10.2.4.	Models of agricultural development	404
10.2.5.	The green revolution: increase in yields per harvest	408
10.2.6.	The green revolution continued: biotechnology and genetically modified crops	413
10.2.7.	Summary and prospects	416
10.3.	Food consumption and nutrition	417
10.3.1.	Concluding remarks on agricultural policy	422
10.4.	Rural development versus agricultural development	423
10.4.1.	Changes in rural societies	426
10.4.2.	Three perspectives on rural development	427
10.4.3.	The peasant economy and peasant households	430
10.4.4.	Rationality, risk and survival strategies in peasant societies	435
10.5.	Land reform	439
10.5.1.	Varieties of land reform	439
10.6.	Policies for rural development	447
	<i>Questions for review</i>	448
	<i>Further reading</i>	449
11	State formation and political aspects of development	451
11.1.	Concepts	452
11.2.	Marxist and Weberian perspectives on the state	455
11.3.	Processes of state formation in Europe	458
11.4.	State formation in developing countries	462
11.4.1.	The importance of external penetration in processes of state formation	463
11.4.2.	Internal political instability	467

11.4.3.	External political interference as a destabilising factor	468
11.4.4.	The role of the military in politics	476
11.4.5.	One-party states	480
11.4.6.	Is there a resurgence of democracy in developing countries?	482
11.4.7.	Rapid expansion of the public sector since 1945	484
11.4.8.	'Soft states' and the political economy of rent seeking	485
11.5.	The role of government in economic development	487
11.5.1.	The role of the state in economic development: five examples	488
11.6.	Interactions between political and economic developments	496
11.6.1.	Political instability as a source of economic stagnation	496
11.6.2.	Economic development and political stability	497
11.6.3.	Is there a relationship between democracy and economic development?	499
11.6.4.	Good governance and economic development	501
11.7.	The predatory state as an obstacle to economic development in Sub-Saharan Africa	503
11.8.	Concluding remarks	506
	<i>Questions for review</i>	507
	<i>Further reading</i>	507
12	Cultural and institutional dimensions of development	510
12.1.	Introduction	511
12.1.1.	Concepts: culture and institutions	511
12.1.2.	How important is culture?	512
12.1.3.	How important are institutions?	514
12.2.	Culture and development	515
12.2.1.	The Protestant Ethic and the rise of capitalism	515
12.2.2.	Traditional versus modern cultures	517
12.2.3.	Are there cultural obstacles to economic development?	521
12.3.	Institutions as one of the key sources of development	529
12.3.1.	Rediscovery of institutions	530
12.3.2.	Efficient institutions	530
12.3.3.	Colonial legacy: extractive or inclusive institutions	531
12.3.4.	Reversal of fortunes	532
12.3.5.	Controlling violence: limited and open access orders	533
12.4.	Conclusion	534
	<i>Questions for review</i>	534
	<i>Further reading</i>	535
13	The international economic and political order since 1945	537
13.1.	Characteristics of international relations since 1945	538
13.1.1.	Economic aspects	538
13.1.2.	Political aspects	544
13.2.	International institutions and institutional change since 1945	549

13.2.1.	A chronological overview	549
13.2.2.	The evolution of the post-war international order	550
13.3.	The liberal international economic order, 1944–73	555
13.4.	The New International Order, 1960–82	558
13.4.1.	Institutional responses to the New International Economic Order	560
13.4.2.	Criticisms of the New International Economic Order	563
13.5.	Debt and how to deal with it	564
13.5.1.	The 1982 debt crisis	564
13.5.2.	Is there anything wrong with debt?	564
13.5.3.	What caused the 1982 debt crisis?	565
13.5.4.	Trends in debt and financial flows in developing countries, 1982–2012	567
13.5.5.	How to deal with debt?	573
13.6.	Structural adjustment and the Washington consensus	578
13.6.1.	The debt crisis and the rise of the Washington consensus	578
13.6.2.	Neo-liberalism versus structuralism	579
13.6.3.	Stabilisation and structural adjustment	581
13.6.4.	The Cotonou Agreements between the European Union and ACP countries	583
13.6.5.	Foreign direct investment	584
13.6.6.	How effective have structural adjustment programmes been?	586
13.6.7.	Summary	590
13.7.	Financial instability, crises and accelerated growth: 1997–2014	591
13.7.1.	The post-1997 international economic order	591
13.7.2.	The renewed debate on globalisation and liberalisation	595
13.7.3.	Concluding remarks	599
	<i>Questions for review</i>	600
	<i>Further reading</i>	601
14	Foreign aid and development	603
14.1.	Why foreign aid?	604
14.2.	The emergence and evolution of foreign aid	608
14.3.	Development aid: sources and categories	611
14.4.	Quantitative data on aid flows	614
14.4.1.	Long-term trends in the magnitude and geographical distribution of aid flows	615
14.4.2.	Development aid in proportion to total resource flows	618
14.4.3.	Sectoral allocation of aid	621
14.4.4.	Net development assistance as a percentage of GDP	624
14.4.5.	Reduction of the real value of aid by tying	624
14.4.6.	Conclusion: the volume of aid is not negligible	626
14.5.	Theories of development and objectives of aid	626
14.5.1.	Aid as a source of investment, capital accumulation and growth	626
14.5.2.	The two-gap model of Chenery and Strout	627
14.5.3.	Aid, growth and poverty reduction	628

14.5.4.	Technical assistance, human capital theory and growth	630
14.5.5.	Policy dialogue and programme aid: policy reform and improvements in governance and institutions	632
14.5.6.	Building institutions and capabilities	633
14.6.	Does aid work? Different perspectives on the effectiveness of development aid	634
14.6.1.	Does aid contribute to socio-economic dynamism and poverty reduction?	634
14.6.2.	Radical criticisms of development aid	636
14.6.3.	Neoliberal criticism of development aid	638
14.6.4.	Criticism of development projects	641
14.6.5.	Empirical debates about aid effectiveness and proposals for reform	642
14.6.6.	Making aid work better	652
14.6.7.	Epilogue: an attempt at evaluation	654
	<i>Questions for review</i>	655
