Global value chains and world trade
Prospects and challenges for Latin America

René A. Hernández
Jorge Mario Martínez-Piva
Nanno Mulder
Editors

Economic Commission for Latin America and the Caribbean (ECLAC)
Santiago, Chile, August 2014
Contents

Foreword .......................................................................................................................... 11
About the editors ................................................................................................. 15
Introduction ........................................................................................................ 21

Chapter I
Mapping global value chains ................................................................................ 43
Introduction ........................................................................................................ 43
A. The rise of global value chains ................................................................. 45
   1. A brief history of global value chains ..................................................... 45
   2. The main drivers of the phenomenon ..................................................... 46
   3. How far will the fragmentation of production go? ............................ 47
   4. Industries, business functions or tasks? .............................................. 48
B. Data and methodology ............................................................................... 48
   1. New data available to study GVCs: the OECD ICIO model .............. 49
   2. Measuring the importance of GVCs: country and industry indicators .................................................. 50
   3. The distance to final demand: what is the position of a country in the value chain? ............. 54
C. Analysis of specific GVCs ........................................................................ 56
   1. Case study 1: agriculture and food products ...................................... 56
   2. Case study 2: motor vehicles ............................................................... 61
   3. Case study 3: electronics (office, accounting and computing machinery) ........................................... 64
   4. Case study 4: business services ........................................................... 67
D. Concluding remarks: closing the gap between policies and the reality of business

Bibliography

Annex

Chapter II
Global value chains in Latin America: A development perspective for upgrading

Introduction

A. The global value chains framework: a tool for driving economic development in the new global economy
1. What is value chain analysis?
2. What is the role of value chain analysis in economic development?

B. Latin America’s participation and opportunities in global value chains
1. How Latin American countries participate in GVCs
2. How Latin American countries can leverage local endowments to upgrade in global value chains

C. Skills for upgrading in global value chains: workforce development and national innovation systems
1. Finishing schools in India and Latin America
2. The Chilean Public-Private Strategic Council for the Offshore Services Sector
3. The aerospace industry in Querétaro, Mexico
4. Costa Rica’s offshore services talent-development pipeline

D. Conclusions

Bibliography

Chapter III
Access to finance in value chains: New evidence from Latin America

Introduction

A. How can inter-firm linkages in value chains facilitate access to financing?

B. Case Studies
1. The agrifood industry in Argentina
2. The furniture value chains in the Serra Gaucha cluster, Brazil
3. The information and communication technology (ICT) sector in Costa Rica

C. Summary of empirical findings

D. Policy Implications

Bibliography
Chapter IV
Inclusive value chain interventions in the high-value agrifood sector in Latin America ......................................................... 137
   Introduction .............................................................................. 138
   A. Inclusion of small and medium-sized producers in high-value agriculture chains ............................................................... 139
      1. Changing governance patterns in high-value agrifood industries: challenges and opportunities for small producers .................. 140
   B. Model for sustainable inclusion of small and medium-sized producers in the value chain: a holistic approach .............. 143
      1. Competitiveness .................................................................. 144
      2. The four pillars model ................................................................. 145
      3. Sustainability of small producer inclusion in the value chain ................................................. 150
   C. Selected IDB Multilateral Investment Fund projects: best practices and lessons learned .................................................. 151
      1. Case 1. Supporting the competitiveness of Central American coffee producers (Costa Rica, El Salvador, Guatemala, Honduras and Nicaragua) ........................................... 152
      2. Case 2. Strengthening the competitiveness of the stevia value chain (Paraguay) ................................................................. 153
      3. Case 3. Conversion to organic cacao cultivation (Peru) ......................................................... 154
      4. Case 4. Strengthening the competitiveness of organic fruit and vegetable producers in the Peruvian Andes ........................................... 154
      5. Case 5. Improving the competitiveness of micro and small rural apiculturists (Nicaragua and Honduras) ............................. 155
   D. Conclusions ............................................................................ 156
   Bibliography .............................................................................. 160

Chapter V
Economic integration and value chains case study: Dairy products in Central America ............................................................................. 163
   Introduction .............................................................................. 163
   A. Problem .................................................................................. 164
   B. Objectives ............................................................................... 165
   C. Conceptual framework ............................................................... 165
      1. Economic integration and international trade ......................... 165
      2. Foreign direct investment and economic integration ....................... 166
      3. Value chain analysis and governance ........................................ 168
   D. Methodology ........................................................................... 169
   E. The dairy sector in Central America: an overview ................. 170
      1. Nicaragua’s dairy value chain ................................................. 173
      2. El Salvador’s dairy value chain ................................................ 174
      3. Costa Rica’s dairy value chain ................................................ 175
      4. Panama’s dairy value chain ...................................................... 176
Chapter VIII
Value chains in Colombian exports to the European Union:
How inclusive are they? ................................................................. 245

Introduction ................................................................................. 245
A. Exports and value chains ....................................................... 246
   1. Backward linkages of the export sector to the
domestic economy ................................................................. 246
   2. Domestic value chains related to exports to the
   European Union ................................................................. 249
   3. Direct and indirect employment in sectors exporting
to the European Union ....................................................... 252
B. Background to the Association Agreement between
   Colombia and the European Union ........................................ 259
   1. Bilateral trade ................................................................. 259
   2. Outcomes of the Association Agreement ......................... 262
   3. Survey of previous studies .............................................. 264
C. Modelling the effects of the Association Agreement
   on Colombia ........................................................................ 265
   1. Computable general equilibrium model ........................... 265
   2. Micro simulation methodology ....................................... 267
   3. Two scenarios ............................................................... 268
D. Macroeconomic and social outcomes of the Association
   Agreement with the European Union ..................................... 269
   1. Macroeconomic outcomes .............................................. 269
   2. Effects on international trade ......................................... 270
   3. Social impacts ............................................................... 272
E. Conclusions ............................................................................. 274

Bibliography ................................................................................. 276

Tables
II.1 Latin America (selected countries): economic and industry
     indicators for the offshore services industry, 2008 ............... 92
III.1 Chain governance indicators ............................................... 110
III.2 Summary of financial instruments and guarantees observed
     in Argentine agrifood value chains ................................... 115
III.3 Main sources of finance for sampled furniture firms in
     Serra Gaucha ................................................................. 118
III.4 Summary of financial instruments and guarantees observed
     in furniture value chains (Serra Gaucha, Brazil) ............... 122
III.5 Inter-firm linkages and financing in the ICT sector
     in Costa Rica .................................................................. 127
III.6 Relationships between chain governance and inter-firm
     linkages in accessing finance for three case studies .......... 130
IV.1 Selected competitiveness bottlenecks and measures for
     overcoming them ............................................................ 144
