About the Authors xiii

Chapter 1: Introduction 01-14
1.0 General
1.1 Status of urban transport in India and developing countries
1.2 Status of public transport with respect to coverage, fleet strength, and utilization in urban areas
1.3 Sustainability and land use consideration

Chapter 2: Demography and Settlement Patterns 15-31
2.1 Introduction
2.2 Demographic changes of India since 1950
2.3 Gross domestic product (GDP)
2.4 Migration to urban areas
2.5 Growth of slums in urban areas
2.6 Accessibility and mobility issues for rural settlements
2.7 Transport infrastructure scenario in India

Chapter 3: Different Modes and Their Characteristics 33-60
3.1 Mode of transport
3.2 Transport systems definitions and classifications
3.3 Intermediate public transport
3.4 Public transport modes
3.5 Classification of mass transit modes
3.6 Integrated transport infrastructure approach
3.7 A look ahead in public transportation
3.8 Comparative analyses

Chapter 4: Current Scenario of Public Transport (PT) in Developing Countries 61-93
4.1 Current perception of PT
4.2 Current planning and operational practices
4.3 Issues of coordination and level of services
4.4 Funding pattern
4.5 Differences in scenario with respect to developed countries

Chapter 5: Public Transport Planning in Rural Areas 95-110
5.1 Planning strategy
5.2 Network planning
5.3 Travel demand estimation
5.4 Stakeholder consultation and preferences
5.5 Public transport mode options
Contents

Chapter 6: Public Transport Planning in Urban Areas — 111-170
6.1 Urban transport planning
6.2 Travel demand estimation
6.3 Efficient use of existing/proposed infrastructure
6.4 Routing and scheduling of public transport
6.5 Intermodal coordination
6.6 Stakeholder consultation and preferences
6.7 Feasibility for higher-order modes like BRT and Metro rail

Chapter 7: Management of Public Transport 171-220
7.1 Urban transport management
7.2 Data collection, retrieval, and analysis for effective management
7.3 Role of private sector in public transport management
7.4 The global trend
7.5 Assessment of user satisfaction

Chapter 8: Resource Needs for Public Transport 221-234
8.1 Financial performance of public transport organizations
8.2 Inter STU comparison
8.3 Review of the existing funding pattern
8.4 Estimation of resource requirements
8.5 Institutional finance for STUs
8.6 Innovative methods to generate revenue surpluses

Chapter 9: Economics of Public Transport 235-253
9.1 Cost of public transport services
9.2 Manpower requirements
9.3 Estimation of social, economic, and environmental benefits

References and Bibliography 255-259
