

Job Creation and Local Economic Development

Table of contents

Executive summary	21
Reader's guide	25
Chapter 1. Setting the framework for local job creation	27
Skills policies should be flexible, and linked to local economic development policies	30
Disadvantage can best be tackled through a joined-up approach	30
Policy makers can do a great deal to support the development of entrepreneurial communities	31
Investment in local economies needs to be targeted towards new sources of growth while also building resilience.	32
All of these approaches should be informed by local data on jobs, businesses and skills	33
Conclusion	33
Special focus: Local strategies for youth employment	34
References	40

Part I

How labour market policies and training can help

Chapter 2. Aligning local employment, skills and economic development policies	43
Flexible policies can boost local job creation efforts	44
How are countries injecting greater flexibility into the management of labour market policies?	46
Flexibility is best exercised when there is strong local leadership and capacity ...	48
Strategic local partnerships can join up skills efforts	49
Employment and training services can be better connected to strategic sectors/clusters to stimulate local economic development and growth	52
Conclusion and issues for consideration	56
References	57
Chapter 3. Building a flexible and responsive skills system	59
Developing skills which are responsive to employer demand.	60
Employment and skills systems should provide flexible lifelong learning opportunities for individuals	64
Transparent educational pathways and skills recognition frameworks can reduce mismatches and better link supply to demand.	67

Reducing potential shortages through a stronger activation system which works with employers	69
Conclusion and issues for consideration	71
References	72
Chapter 4. Escaping the low skills equilibrium trap	73
Investing in skills does not always translate into improved productivity – if employers do not use them effectively	74
A “low skills equilibrium” can develop in some regions	75
Traditional employment and skills responses are inadequate in such regions – and may represent a poor use of public funds	76
Skills demand and utilisation is closely linked to firm product market strategies	76
Policy makers can use a variety of tools to help “shape” skills demand and utilisation	78
A broad set of local institutions have a role to play	79
Policies to tackle low skills demand and utilisation remain underdeveloped at the local level.	80
Conclusion and issues for consideration	83
Notes.	84
References	85
Chapter 5. Overcoming barriers to employment	87
Tackling labour market exclusion now will help to secure future economic prosperity and jobs growth.	88
Investing in skills is part of the story.	90
But other barriers to the labour market also need to be addressed	91
Targeting particular groups – and places – is important	92
Employers are important partners in building more inclusive growth	97
Innovation is needed in financing resource-intensive activities, in performance management and in new methods of service delivery.	99
Interventions need to be built on a better understanding of “what works”	100
Conclusion and issues for consideration	101
References	102

Part II

Building jobs through entrepreneurship and enterprise creation

Chapter 6. Building entrepreneurship skills	107
Entrepreneurship skills can contribute to economic growth and lead to job creation.	108
Entrepreneurship skills can be learned.	110
Supporting the development of entrepreneurship skills can be done by central government.	114
But local policy actions can sometimes have a greater impact.	114
Local partnerships are an effective approach to develop an entrepreneurial culture	117

Conclusion and issues for consideration	119
References	120
Chapter 7. Stimulating high-growth firms and local entrepreneurial ecosystems ..	123
High-growth firms are a main source of job creation	124
High-growth firms are generally of young age and small size, but are not necessarily high-tech.	125
Leadership and management skills are key to firm high-growth	126
Local entrepreneurial ecosystems support the emergence of high growth firms	128
Policy makers can buttress high-growth firms through setting adequate framework conditions, strengthening the local ecosystem and targeted programmes	132
Conclusion and issues for consideration	136
Notes.	138
References	138
Chapter 8. Job creation in the social economy and social entrepreneurship	141
Social enterprises are increasingly being recognised for their capacity to create jobs and address social challenges	142
Defining social economy, social entrepreneurship and social enterprises is still an issue	143
Estimating their size is essential, although difficult	143
Data show that the role of the social economy in employment is not negligible.	144
Job creation and retention in the social economy outweighs job destruction	147
Diversity in funding sources is a key issue in maintaining high levels of employment	149
The social economy has a pivotal role in creating jobs for vulnerable and at-risk individuals.	150
Job quality in the social economy, however, remains a controversial issue	150
Government policy can help social enterprises overcome barriers to meeting their objectives in terms of job creation and long term sustainability.	151
Conclusion and issues for consideration	154
Notes.	155

Part III

Local economic strategies and systems

Chapter 9. New growth and investment strategies – creating jobs and opportunity	161
There is a new challenging context for local development	162
The fortunes of local economies have diverged according to geographic location and functional roles in the global economy	163

Robust evidence-based economic strategies can act as foundations for inclusive growth	164
New growth and investment strategies are prioritising intangibles, such as knowledge-sharing, in addition to capital investments	165
Local growth strategies have focused primarily on a number of “employment-generating sectors”	167
The global market is an increasingly important driver of growth	169
Funding the future – putting in place financial support for local investment strategies	170
An effective local development system is needed to make economic development happen	172
Development agencies are a critical pillar of the system	173
Local economic leadership is now a joint public-private venture	175
Conclusion and issues for consideration	177
Note	178
References	178
Chapter 10. Managing demographic transitions in local labour markets	181
Demographic change shows general trends, but with distinctive local impacts	182
These changes will present both challenges and opportunities for local labour markets	185
Local economies can leverage opportunities generated by the silver and white economies	186
Skills, training and workforce age management practices for older workers have also become increasingly important	188
Building resiliency and sustainability	192
Conclusion and issues for consideration	195
References	197
Chapter 11. Seizing opportunities from green growth	199
Climate change will have variable impacts on the labour market at the local level	200
The green transition will require local flexibility in vocational training systems	200
The green transition brings employment challenges, but also opportunities	202
Businesses need both incentives and support to green their workforce	204
Green growth brings the potential for innovation and local industrial development	205
New jobs often emerge from old	207
Business-university partnerships can be important in driving disruptive eco-innovation	208
Local leadership is needed to accelerate the transition	209
Conclusion and issues for consideration	211
