MARKET POWER
AND
MARKET MANIPULATION
IN
ENERGY MARKETS

FROM THE CALIFORNIA CRISIS
TO THE PRESENT

Gary Taylor, M.S., J.D.
Shaun Ledgerwood, Ph.D., J.D.
Romkaew Broehm, Ph.D.
Peter Fox-Penner, Ph.D.
# TABLE OF CONTENTS

Preface .................................................................................................................. 1

## Part I: The Concepts of Market Power and Market Manipulation

### Chapter 1

**Introduction** ........................................................................................................ 5
- The California Crisis – A Market Experiment in Shambles ................................. 5
- A New Era of Market Manipulation ................................................................. 6
- The Purpose and Plan of this Book ................................................................. 8

### Chapter 2

**Market Power and Market Manipulation: Definitions and Comparison** ........ 11
- Definitions of Market Power and Market Manipulation ................................. 11
- Market Power .................................................................................................... 12
- Market Manipulation ........................................................................................ 14
- The Role of Intent ............................................................................................. 17
- Distinguishing Between Market Power and Market Manipulation ................. 18
- Noncompetitive Prices versus “Artificial” or Fraudulent Prices ......................... 21

### Chapter 3

**Issues in Identifying and Diagnosing Market Power in Electric Power Markets** 23
- Special Features of Electricity Supply and Demand and Their Implications for Market Power and Manipulation ......................................................... 23
- Unique Features of Electricity Supply ............................................................ 23
- Unique Features of Electricity Demand .......................................................... 27
- Implications for Defining Electric Power Markets .............................................. 31
  - *Product Market Definition* ........................................................................... 31
  - Geographic Market Definition ...................................................................... 33
- Other Market Power Related Issues .................................................................. 35
  - Supplier Entry ................................................................................................. 35
  - Information Availability and Repeat Games .................................................. 35
- Identifying Market Power in Wholesale Electricity Markets ............................ 36
- Structural Approaches ..................................................................................... 36
  - The Herfindahl-Hirschman Index (HHI) ......................................................... 37
  - The Pivotal Supplier Index (PSI) ................................................................... 38
Part II: Market Power and Manipulation in the Western Crisis

Chapter 4
Overview of the California Markets and the Western Power Crisis
Establishment of the California Markets
Basic Operations of PX and CAISO Markets
The Power Exchange (PX)
The California Independent System Operator (CAISO)
CAISO Transmission Markets
CAISO Ancillary Services Markets
CAISO Imbalance Energy Market
Issues in the First Two Years of Operation
The Crisis—Phase I (May 2000-December 2000)
The Crisis—Phase II (January 2001 through June 2001)

Chapter 5
Litigation History
Phase I
August 23, 2000 Order
Commission's Initial Attempt to Quell the Crisis: The Orders in November and December, 2000
Market Collapse
The Commission Restores Order to the Markets:
The Orders of April and June 2001
Phase 2
The Enron Orders
The Gaming Order
The Enron MBR Revocation Order
Ninth Circuit Remands
Proceedings under the CPUC Remand
Proceedings under the Puget Remand
# Chapter 6

## Market Power vs Scarcity in the California Crisis ................................. 99

- Market Definition .................................................................................. 100
- The Relevant Product Markets .............................................................. 100
- Relevant Geographic Markets ............................................................... 106
- Structural Test Case Studies ................................................................. 109
- FERC’s Hub-and-Spoke Test ................................................................. 109
- Pivotal Supplier Tests ........................................................................... 111
- Other Views of PSI Tests ....................................................................... 116
- Conduct-Based Tests and “Two-Stage” Withholding ......................... 117
  - Two-Stage Withholding Mechanism .................................................. 117
  - Withdrawals from the Day-Ahead Market ........................................ 120
  - Real-Time Withholding .................................................................... 122
- Withholding Via High (Anomalous) Bidding ......................................... 125
- Separating Undue Market Power from Efficient Scarcity ................ 129
- Sellers’ Objections to Our Market Power Tests .................................. 129
- Viewing Scarcity From a Long-Term Perspective ................................ 131
- The FERC’s Ruling On Scarcity vs. Market Power ............................. 132

## Appendix 6A

### Adjustments of Data to Reflect Proper Market Size in
Pivotal Supplier Index Tests and an Example 135

- Imports .................................................................................................. 135
- Inclusion of Uninstructed Generation ................................................... 135
- Inclusion of False Load ......................................................................... 136
- Example of PSI Calculation .................................................................. 136

## Appendix 6B

Capital Cost Recovery and Scarcity Rents ............................................. 138

## Appendix 6C

An Example of Two-Stage Withholding .................................................. 140
Chapter 7
Fraud-Based Manipulation Strategies During the Crisis

Enron Manipulation

Fraudulent Entry into the RT Energy and Ancillary Services Markets.

Ricochet and False Export

False Export Analysis and Evidence

Fat Boy

Analysis of Fat Boy Transactions

Fraudulent Collection of Congestion Revenues

Death Star/Circular Scheduling

Death Star Analyses

Cut Schedules

Load Shift

Analysis of Load Shift

Fraudulent Sales of Ancillary Services/Get Shorty

Analysis of Fraudulent Ancillary Services Sales

Appendix 7-1

Chapter 8
Regulatory Handicaps Then and Now

Vagueness: Manipulation versus Pornography

Tariffs vs General Prescriptions

Weaknesses in Statutory Authority

Current Challenges

Part III
New Developments in Market Manipulation

Chapter 9
Market Power and Manipulation: A New Conceptual Framework

Manipulation Triggers

Market Power—Extensions Outside of the Primary Market

Traditional (or Outright) Fraud—Recognized in Common Law

Uneconomic Trading—Can Be Seen as “TransactionaI Fraud”

Manipulation Targets

Financial Derivatives Contracts

Physical Positions “Traded at Settlement” or “at Index"

Other Positions

Manipulation Nexuses

Market Features That Affect the Incentive to Manipulate

Avoiding False Positives and the Presumption of Legitimate Trading
## Table of Contents

### Chapter 10
**Implementation of the Framework in Practice**
- The Proof (or Disproof) of Suspected Manipulative Behavior 208
- The Evaluation of Intent 210
- The Detection of Potentially Manipulative Behavior 211
- Informational Asymmetries and Challenges 212
- Using the Framework to Investigate Specific Allegations 213
- Using the Framework as "Clean-Sheet" Processes to Detect Potentially Manipulative Behavior 214
- *Stratification of the Rolled-Up Trading Data*
- Application of the Framework to the Stratified Triggers and Targets 216

### Chapter 11
**Recent Enforcement Actions and Their Links to The Framework**
- Uneconomic Trading 221
- *Index Manipulations*
- Amaranth Advisors LLC (Amaranth) and Brian Hunter 222
- Barclays Bank PLC, et al. (Barclays) 225
- BP America Inc., et al. (BP) 226
- Optiver US, LLC, et al. (Optiver) 228
- Energy Transfer Partners, L.P., et al. (ETP) 229
- *In the Matter of Anthony DiPlacido (DiPlacido)* 230
- Auction Manipulations 231
- *Constellation Energy Commodities Group, Inc. (Constellation)* 231
- Deutsche Bank Energy Trading (DBET) 233
- Inefficient Dispatch: J.P. Morgan Ventures Energy Corp. (JPM) 238
- Manipulation Triggered by the Exercise of Market Power 239
- KeySpan-Ravenswood, et al. (KeySpan) 240
- Parnon Energy Inc., et al. (Parnon) 244
- E.ON SE (E.ON) 245
- Manipulation Triggered by Outright Fraud 246
- Demand Response Manipulation: Rumford Paper Company (Rumford) and Others 247
- Circular Scheduling: Gila River Power, LLC (Gila River) 249

### Chapter 12
**Conclusion** 251

**GLOSSARY OF TERMS** 255

**Bibliography** 269
