Johannes Bähr, Paul Erker

BOSCH

History of a Global Enterprise

Translated by J. A. Underwood

C. H. Beck
Contents

Introduction ................................................................. 11

I Early years and rise of the company (1886–1932)
(by Johannes Bähr)

1 Robert Bosch – portrait of a founder ........................... 19
2 The difficult early years ................................................ 33
3 The period of rapid growth ........................................... 42
   The irresistible rise of the Bosch magneto ...................... 42
   The first regional subsidiaries and the conquest of the U.S. market .... 54
   The transition to a large-scale enterprise and the introduction of the eight-hour working day ................................ 61
   The strike of 1913 ....................................................... 68
   The company on the eve of the First World War ............... 73
4 The First World War and its aftermath .......................... 79
   The war – a turning point ............................................ 79
   Conversion to a stock corporation and establishment of VVB .......... 87
   Changing times: Robert Bosch AG and the aftermath of war ........ 91
   Organizational development and the evolution of a sense of identity ... 102
5 The 1926 crisis, and diversification in the Great Depression .... 114
   Causes, course, and repercussions of the great crisis of 1926 .... 114
   The restructuring of 1926–27 and the resolution of the crisis ...... 124
   Trial and tribulation on the way to the diesel injection pump .... 130
   Building up a presence outside Germany and battling for the U.S. market ... 135
   Between sackings and shorter working weeks: Bosch in the Great Depression .................................................. 140
   Power tools, refrigerators, radios, and gas-fired water heaters: the first phase of diversification and the rise of a conglomerate .... 145
II Bosch in the Third Reich (1933–1945)
(by Johannes Bahr)

1 The Bosch Group in the economic upswing of National Socialism
(1933–1939) .................................................. 155
The development of the enterprise and its subsidiaries .... 155
The transformation of Robert Bosch AG into a GmbH .... 166

2 “Corporate community” versus “people’s community”:
Bosch, the NSDAP, and the National Socialist regime ... 169
Robert Bosch AG after the National Socialist assumption of power ... 169
Clashes and compromises with the NSDAP ..................... 175
Between “model company” and “state within the state”:
Bosch under wartime totalitarianism ............................ 179

3 Bosch and the Jews ......................................... 183
Jews and people of Jewish descent at Robert Bosch AG and GmbH . 183
“For the sake of justice and humanity”: how the Bosch circle helped Jews . 187
“Aryanizations”: acquiring equity interests and real estate
from Jewish ownership ........................................ 189

4 Involvement in rearmament and arms production in the
Second World War ............................................. 193
Bosch and rearmament ......................................... 193
Emergence and early years of Dreilinden Maschinenbau GmbH .... 195
From Elektro- und Feinmechanische Industrie GmbH
to Trillke-Werke GmbH ...................................... 199
Concealing operations outside Germany ......................... 202
Integration into Germany’s wartime economy .................. 207
The last year of the war ........................................ 213

5 Beyond the bounds of the “Bosch community”: forced labor ... 218
6 The Bosch circle and resistance to Hitler ...................... 236
7 Death and legacy of Robert Bosch .......................... 245
The legacy: a family company – with reservations .......... 249

III Adaptation and change between economic boom
and economic crises (1945–1983)
(by Paul Erker)

1 Reconstruction in the shadow of Allied decartelization policy
and disagreements within the company ....................... 255
Continuities and breaks with the past: the struggle for positions of power within the company ........................................ 255
Conflicts with the works council ........................................ 262
The constraints of Allied antitrust legislation:
Bosch and its “deconcentration case” (1947–1952) .................. 264
On the brink of a growth crisis: sales figures and corporate financing in a period of tumultuous expansion .................. 271

2 From family-run business to foundation-owned Company:
the long march to a new Bosch constitution ........................................ 276
Who decides what the will means? Execution of the will, and the appointment of Robert Bosch Jr. to the board of management (1953–1964) ........................................ 277
Robert Bosch Industrietreuhand KG and shareholder structure: further development of corporate governance at Bosch (1965–1982) ........................................ 302

3 Corporate organization and corporate strategy
between economic miracle and oil-price shock ........................................ 311
Divisionalization, crisis strategies, and corporate management in the Merkle era ........................................ 312
Monopoly of supply versus collective buying power:
Bosch and terms of supply in the pre-López era .......................... 323
The challenge of re-entering the U.S. market: stages and problems of the second phase of internationalization .................. 332
The “greener automobile”: aspects of an environmental history of Bosch ........................................ 341

4 Between Americanization and Japanization:
manufacturing organization and work environment .................. 351
Manufacturing organization in times of postwar reconstruction, capacity bottlenecks, and labor shortages ........................................ 351
Structural adjustment policies, rationalization strategies, and labor conflicts in the 1970s ........................................ 365

5 The phase of “indiscriminate diversification”: strategic alliances and the move into new areas of business ........................................ 375
The Bosch-Siemens alliance in the household-appliances business ........................................ 376
The Blaupunkt crisis and attempts to reorganize the German consumer-electronics industry ........................................ 379
Strategic investments and political machinations: Bosch, MBB, and restructuring in the arms and aviation industries ........................................ 383
Moving into telecommunications technology:
Bosch and the AEG crisis ........................................ 386

6 Initial conclusions ........................................ 393
IV Bosch and the challenges of globalization (1984–2012)
(by Johannes Bähr and Paul Erker)

1 Radical change and continuity in the shadow of economic
turbulence (1984–1993) ................................................. 400
"Bosch is unstoppable": the dynamics of growth and a
new leadership culture ................................................. 400
From ray of hope to quagmire: development of
the communications technology business ...................... 409
Bosch in the three major economic regions of the 1980s:
Europe – USA – Japan .................................................. 421
Kaizen auf schwäbisch: CIP and lean production
in Bosch manufacturing ............................................... 427
The great clash of 1993 .................................................. 434
Upheaval at old-established locations: labor relations and labor conflicts . 444

2 Into the digital age ...................................................... 452
Technical strengths: research, development, and innovation ........ 452
Development and acceptance of electronically controlled
gasoline injection ....................................................... 456
Vehicle dynamics systems and navigation devices ................... 459

3 From restructuring to change:
the process of renewal in the 1990s (1993–2003) .................. 469
Corporate governance and corporate organization ................. 469
Crisis and reorganization: the automotive technology business sector and
the perennial problem with loss-making products ................ 475
Diesel injection systems and the diesel boom ...................... 482
A fresh phase of diversification: acquisition of Rexroth and Buderus .... 487
The rediscovery of values: value-driven and values-based management . 494
Changes in the parallelogram of forces in corporate governance .......... 500

4 Globalization, diversification, and focus on values
(2003–2012) ............................................................. 511
"Driving change forward": new strategies and trends .............. 511
"Getting the workforce through the crisis intact": Bosch in the financial
and economic crisis of 2008–2009 ...................................... 524
"Green Bosch": growth in renewables, losses in the solar business .... 531
The China boom and growing markets in the other
BRIC countries .......................................................... 535
Looking beyond 125 years .............................................. 541

Final conclusions ......................................................... 548
Appendix:

Notes ................................................................. 563
Bosch Group headcount and sales revenue (1886–2012) ...... 662
List of abbreviations ............................................... 666
Photo credits ......................................................... 673
Sources and bibliography ....................................... 674
Index of persons ................................................... 693
Index of companies ................................................ 699
