Introduction xxi
   Definitions of Concepts and Terms Used Widely in the Book xxv
   Book Overview xxvi

PART ONE | EXAMINING BIG DATA AND ITS VALUE TO FIRMS

1. What is “Big Data”? 3
   Scale: How Big Is Big? How Big Will It Become? 6
   Data Creation: A Measure of How Fast Data Is Generated 7
   Data Storage: A Measure of Scale and the Data We Keep 9
   Data Processing: A Measure of How Much Data We Use 10
   Data Consumption: A Measure of Our Demand for Data 11
   Implications of Scale in Big Data 15
   Exploratory Data Analysis: Considering All of the Data 16
   Data Organization and Metadata 19
   Variety: Using More than Numerical Data 20
   Velocity: Leveraging Data within Its Window of Opportunity 21
   Viral Distribution of Data: Social Networks Take Front Stage 23
   Availability of Data Alters Decisions for the Better 26

Where Is Big Data Being Created? 27
   Customer Data: External Data 28
   Operations: Internal Data 30
   Knowledge Sets: Internal Data 32
   Mass Markets: External Data 33
2. Benefits of Scale and Velocity in Big Data: The Movement to Now! 35

Overcoming Complexity through Scale in Big Data 35
Yelp and TripAdvisor: Case Studies in the Creation of Value through Big Data 36
Scale 37
Organization and Metadata 37
Data Variety 38
Data Velocity 38
Data Availability 38
Value of Information: Risk Reduction 38
Data Velocity Is the New Normal 40
Automated Data Creation: A Necessary Byproduct of Scale and Velocity 42
Human Interactions with the Internet of Things: Wearable Devices 45
Mastering Velocity and Scale: Creating Advantages with Big Data 47
Increasing Data Velocity 47
Increasing Data Scale 48
Merging High Velocity and High Scale in Data 50
Merging High Velocity and High Scale at Amazon 51
Merging High Velocity and High Scale in Advertising 54
Getting to High Return on Big Data 55
Success in a High Velocity and High Precision Data Environment 58

3. Big Data Expands with Passive Data Capture 61
Active Data Capture 61
Example of Passive Data Capture at Work 62
Passive Data Capture 63
Mobile Platforms Expand Passive Data Capture 65
What Variables Can Be Passively Captured with Smartphones Today? 66
Mobile Apps Perform Passive Data Capture Too 67
Passive Data Capture Will Change the Driving Experience 68
Passive Data Capture Adds Value to Agriculture 68
Valuable Features of Passive Data Capture 69
Passive Data Capture Is in the Home of the Future 70
Passive Data Capture Is Transforming Health Care 71
Trade-offs Are Inevitable When Passive Data Capture Is Collected and Leveraged 72
Passive Data Capture Raises Privacy Concerns 73
4. Novel Measures in Market Activity: Direct vs. Indirect Measurement 75
   Direct Measurement by Active Data Capture 76
   From Micro to Macro 77
   Indirect Measurement by Passive Data Capture 79
   Measurement of Assets by Leveraging Big Data and Data Inverting 81
      What’s a Billboard Worth—Exactly? 81
      Inverting Data 82
   Media Measurement by Third Parties 83
   Measurement of Health Care Providers 84
   Considerations in the Use of Direct and Indirect Asset Measurements 85

5. Precision in Data: New Possibilities for Mass Customization and Location-Based Services 86
   New Sensors and Mobile Phone Systems Enable Precision in Location-Based Data Capture 86
   Social Networks Enable Measuring the Previously Immeasurable 87
   Precision in Measuring Human Performance Is Here Now 88
   Precision Agriculture Is Changing Decision-Making in Powerful Ways 89
   Precision Medicine and Genomics Enable Personalized Care 90
   High Precision in Customer Data Leads to Mass Customization 91
   Digital Platforms Enable Increased Precision in Data Capture 92
   Precision in Data Is Critical to Unraveling Complexity 93

6. Data Fusion: Combining Data to Produce Economic Value 95
   Data Availability in the Real Estate Industry 96
   Zillow: A Real Estate Innovator 97
   History of Zillow: Data Opens Opportunities 98
   Zillow Focuses on Data Fusion and Data Productization 100
   Zillow’s Data Product Innovations 101
      Make Me Move 102
      Mortgage Marketplace 102
      Zillow Digs 103
      Zillow Data 103
      Mobile 104
   Success with Data Breeds Competition and Innovation 105
   Data Comes in All Forms 107
   Lessons from Zillow 108
   Mint.com Transforms Personal Finance 110
Fusing of Data at Mint.com Creates Novel Data Views for Users and Vendors 111
Lessons from Mint.com 112

PART TWO | SUCCESS IN LEVERAGING BIG DATA

7. Strategies for Monetizing Big Data 117

Keep the Data Proprietary 119
- Monetization Strategy: Leverage Data for Internal Operations 119
- Monetization Strategy: Enter New Business 121
- Monetization Strategy: License Data Exclusively 124

Data Strategy: Trade Data to Business Partners for Shared Benefits 127
- Monetization Strategy: Trade Data with Downstream Business Partners 127

Data Strategy: Sell the Data Product (to a Host of Possible Clients) 131
- Monetization Strategy: Sell Data Products to Asset Owners 133
- Monetization Strategy: Sell Data Products to Other Interested Parties 136
- Monetization Strategy: Sell Premium Data Product Access 139

Data Strategy: Make the Data Available (and Even Free) to Many Users 141
- Monetization Strategy: Leverage User Base for Advertisement
  - Advertisement Strategy for Broad Awareness (Low Precision and Low Velocity Data) 146
  - Advertisement Strategy for Time-Sensitive Decisions (High Velocity in Data) 146
  - Advertising Strategy for Products or Services Aligned with Customer
    (High Precision in Data) 148
  - Advertising Strategy for Products or Services Aligned with Customer
    AND are Time-Sensitive (High Precision, High Velocity in Data) 150

Novel Data Creation in Advertisement on Digital Platforms 152

Origins of the Marketplace 153
Overview of Data Strategies and Monetization Strategies 158
Multi-sided Business Models Form to Monetize Data from Digital Platforms 160
LinkedIn.com Creates Big Data 160
Lessons from LinkedIn on Multi-sided Business Models 163

8. Monetizing Big Data through Productization and Data Inverting 166

The Origins of Netflix as a Disruptive Innovator 167
Blockbuster: A History 168
Netflix Cultivates Big Data on Customer Preferences 169
Netflix Forms a Data Exchange with Customers 170
Big Data and Analytics Enable Netflix's Success 172
Data Supporting the Digital Platform Enables Customer Loyalty 172
Analytics Enable Long-Tail Capture and Aggregation of Demand 173
Data on Movies Changes Relationship with Movie Houses 174
Employee Management Reflects Data Importance 177
The Future of Netflix: Data Wars Have Begun 178
Lessons from Netflix 182

9. Impact of Analytics and Big Data on Corporate Culture and Recruitment 184
   The Rise of the Data Scientist 185
   A Portrait of a Data Scientist 188
   Graduate Programs in Data Science are Available 192
   Benefits of Functionally Assigned Analytical Teams 194
   Challenges of Functionally Assigned Analytical Teams 195
   Benefits of Centralized Analytical Teams 196
   A New Organizational Model: Chief Data Scientist 197
   Maximizing the Impact of Data Scientists 200

10. Stimulating Innovation through Big Data 202
    Leveraging and Re-leveraging Data Dynamically 202
    New Data Fuels Innovation 205
    Digital Platforms Enable Innovation 207
    New Data and Digital Platforms Can Change Markets 207
    Innovation in Health Care 209
    Innovation through Data Requires a Data Laboratory for Data Creation 210
    Nest and Building New Digital Platforms for Innovation 213
    Digital Platforms and the Internet of Things Fuel Innovation 215
    Stimulating Innovation with Big Data Challenges 219
    Experimenting with Data at the Enterprise 221

11. Disrupting Business Models with New Data from Location-Based Services 222
    Big Data Possibilities from Cellular Networks 223
    Passive vs. Active Data Capture in Location-Based Services 225
    Leveraging Location for Data Monetization 227
    Location-Based Services 228
    Trends in Location-Based Services 228
    Foursquare: Using Customer Location Data to Guide You Where to Go 230
    Opportunities Created by Leveraging Location-Based Data 231
    Foursquare Example: Gaining Precision in User Location Data 234
    San Francisco vs. New York 237
Lessons from Foursquare 238
Strategy Implications of Using Location-Based Data 241

12. Protecting Data Assets 242
   Privacy Concerns 242
   Tracking and Monitoring 243
   Who Owns the Data? Data Ownership Raises Many Questions 244
   Data Ownership Differs for Actively Shared and Passively Captured Data 245
   Privacy in Aggregate Data Views 247
   Operational Risk in Dealing with Big Data 248
   Best Practices for Firms Dealing with Sensitive Personal Data 250

13. Future Trends in Big Data 252
   Increases in Automation for Data Capture, Creation, and Use 252
   Cloud Computing Makes Big Data Possible for Most Firms 254
   Flexible Analytical Tools Make Big Data Processing Possible to More Firms 254
   Mobile Platforms Drive Location-Based Data and Services to New Levels 254
   Analytical Talent Will Be in Short Supply Due to High Demand 255
   Aggregation of Digital Platforms Will Become More Common 255
   Digital Platforms Will Reduce Market Inefficiencies through New Data 256
   Autonomy, not Just Automation, Will Become More Mainstream 257

   Sources of Data 259
   Innovation 259
   Growth Mindset 260
   Market Opportunities 261
   Analytics 262
   Big Data to Big Profits Diagnostic: Scoring an Enterprise with the SIGMA Framework for Big Data Readiness 263
   Getting Started on the Path from Big Data to Big Profits 266

SELECTED BIBLIOGRAPHY 269
INDEX 271
