Acknowledgements xvii

Introduction 1
Economic Theory and Economic Modelling 3
Some Comments on the Philosophical Foundations of Economics 6
Dynamics and Stability 9
Money 12
Aggregation 15
Growth 17
Negative Commodities and Negative Utilities 18
Modelling the Economy 18

1 Neoclassical Theory and Rational Expectations:
Theoretical Deficiencies 25
Abstract 25
Barter and the Temptation of Generalization 25
Utilitarianism, Utility Theory and Consumption 27
The Axiomatic Structure of the Barter Economy 35
Equilibrium and Dynamics 38
Stability Matters and Community Excess Demand Curves 40
Growth 45
Aggregation and Arrow's Paradox 48
Expectations 52
Rational Expectations 53
Final Comments 63
Appendix: The Neoclassical Axiomatic Structure in a Technical Form 65
## Contents

### 2 Aggregation, Money and Keynes’ Epistemology

- **Abstract**
- **Rationality, Equilibrium and Epistemic Cycles**
- Epistemic Cycles
- Epistemic Cycles in Relation to Aggregation
- Keynes’ Philosophical Contribution
- Moore’s Paradox
- Physics and Social Sciences: Inference and Induction
- Hume on Induction

**Facts, Commodities and Structures**
- The Discussion on Negative Facts

**Final Comments**

### 3 The Basics of Money

- **Abstract**
- **Introduction**
- **Money, Equilibrium and Non-equilibrium**
  - Medium of Exchange
  - Liquidity
  - Money as an Accounting Measure
- **The Neutrality of Money**
  - Neutrality in the Short and Long Run and the Interest Rate
  - Long Run, Short Run
- **Quantity Identity and Quantity Theory**
  - What are Prices, P, and Real GDP, Y
  - The Left Hand Side M3
  - Some Elementary Conclusions
- **Money and its Intrinsic Contradiction**

**Appendix: On Increase of Commodity Dimensions**

### 4 Money, Finance and Growth

- **Abstract**
- **Introduction**
- **Growth**
- **The Bullionist-Real Bill Debate 1800–1826 in a Modern Perspective**
  - Lessons from the Bullionist Debate and Wicksell’s Doubts
  - Where are We Now?
- **The Enlarged Input–Output Matrix**
- **Real Growth and Growth in Money Terms**
## Contents

### 5 Structural Stability in Models and Reality

**Abstract** 176  
**Introduction** 176  
**Causality** 180  
  - Determinism and Probability 182  
  - Structural Causality 188  
  - Causality and Correlation 190  
  - The Copula 191  
  - Error Term and Bifurcations 192  
**Some Comments on Instability** 195  
  - Microscopic and Macroscopic Stability 197  
  - Initial Value Problems 201  
  - Consumption Characteristics Models à la Gorman/Lancaster 205  
  - Perturbations and Structural Stability 206  
**Stability as a State in Reality** 211  
**Conclusions** 214

### 6 Inflation and Unemployment

**Abstract** 217  
**Introduction** 217  
**The General Character of the Primary Concepts** 223  
  - Prices and Productivity 224  
  - Prices and Growth 228  
  - Growth and its Meaning 232  
  - Growth and Employment 234  
**Verdoorn’s Law and Phillips Curve** 235  
  - Verdoorn’s Law 237  
  - The Phillips Curve 241  
**Some Final Comments** 251

### 7 Epilogue: Pictures and Axiomatic Structures

**Abstract** 257  
**Form and Content** 258  
  - L’esprit de géométrie et L’esprit de finesse 260  
**Outside and Inside Human Beings and Society – Looking for Signs** 263  
**Axiomatic Structures** 265  
  - Paradoxes 270
Contents

Back to Pictures 272
- Dynamics and Entropy 277
- Saturation and Anomie 280
Determinism/Free Will and Reversibility/Irreversibility 283

Index 289
