Introduction xvii

SECTION I Program evaluation

1 Recruiting intensity
Recruiting intensity is critical for understanding fluctuations in the labor market. R. Jason Faberman 2

2 Temporary agency work
Temporary agency work is not generally a stepping-stone to regular employment. Susan N. Houseman 4

3 Youth labor market interventions
Comprehensive programs that focus on skills can reduce unemployment and upgrade skills in OECD countries. Jochen Kluve 6

4 Do firms benefit from apprenticeship investments?
Why spending on occupational skills can yield economic returns to employers. Robert Lerman 8

5 The impact of monitoring and sanctioning on unemployment exit and job-finding rates
Job search monitoring and benefit sanctions generally reduce unemployment duration and boost entry to employment in the short term. Duncan McVicar 10

6 How to improve participation in social assistance programs
Government agencies can lower barriers that impede people’s take-up of social assistance. David C. Ribar 12

7 Do youth mentoring programs change the perspectives and improve the life opportunities of at-risk youth?
While most effects are positive, they tend to be modest and fade over time—in addition, some mentoring programs can backfire. Nuria Rodriguez-Planas 14
8 Do case workers help the unemployed?
Evidence for making a cheap and effective twist to labor market policies for unemployed workers  Michael Rosholm

SECTION II Behavioral and personnel economics

9 Gender diversity in teams
Greater representation of women on decision-making teams may better represent women's preferences but may not help economic performance  Ghazala Azmat

10 Efficient markets, managerial power, and CEO compensation
CEO pay, often contentious, is the product of many forces  Michael L. Bognanno

11 Alternative dispute resolution
How different procedures might succeed in settling disputes  David L. Dickinson

12 Fairness and motivation
Fair treatment creates incentives, and is beneficial for workers and the firm  Armin Falk

13 Late-life work and well-being
Flexible retirement may be one solution to the challenges of unemployment, aging populations, and public pension burdens  Carol Graham

14 Do responsible employers attract responsible employees?
The cost of a firm's commitment to CSR may be offset by its appeal to motivated employees who work harder for lower wages  Karine Nyborg

15 How should teams be formed and managed?
How teams are chosen and how they are compensated can determine how successfully they solve problems and benefit the firm  Hideo Owan

16 Unemployment and happiness
Successful policies for helping the unemployed need to confront the adverse effects of unemployment on feelings of life satisfaction  Rainer Winkelmann
SECTION III Migration

17 The good and the bad in remittance flows
Remittances have the potential to lift up developing economies Catalina Amuedo-Dorantes

18 Skill-based immigration, economic integration, and economic performance
Benefiting from highly skilled immigrants requires a complementary mix of immigrant selection and economic integration policies Abdurrahman B. Aydemir

19 Crime and immigration
Do poor labor market opportunities lead to migrant crime? Brian Bell

20 Do migrants take the jobs of native workers?
Migrants rarely take native workers' jobs, and they boost employment effects in the long term Amelie F. Constant

21 The brain drain from developing countries
The brain drain produces many more losers than winners in developing countries Frédéric Docquier

22 The impact of migration on trade
Immigrants are good for trade Murat Genç

23 The welfare magnet hypothesis and the welfare take-up of migrants
Welfare benefits are not a key determinant of migration Corrado Giuliani

24 Do immigrants improve the health of native workers?
Immigration crowds native workers out of risky jobs and into less strenuous work, with consequent benefits to their health Osea Giuntella

25 What determines the net fiscal effects of migration?
Proactive policies result in a better labor market integration Holger Hinte

26 Happiness and the emigration decision
Happy people are an asset to society, and happiness may be a determinant of emigration Artjoms Ivlevs
27 Roma integration in European labor markets
Nuclei of evidence tell a grim story, but a veil of ignorance impedes policy efforts  Martin Kahanec

28 Freedom of movement for workers
Relaxing immigration restrictions could greatly improve the well-being of people in developing countries, with little effect on wages  John Kennan

29 Immigrants and entrepreneurship
Business ownership is higher among immigrants, but promoting self-employment is unlikely to improve outcomes for less skilled immigrants  Magnus Lofstrom

30 Are immigrants healthier than native residents?
Immigrants tend to be healthier than native residents when they arrive—an advantage that dissipates with time  Shoshana Neuman

31 Enforcement and illegal migration
Enforcement deters immigration with many unintended consequences  Pia Orrenius

32 Do immigrant workers depress the wages of native workers?
Short-term wage effects of immigrants are close to zero—and in the long term immigrants can boost productivity and wages  Giovanni Peri

33 Anonymous job applications and hiring discrimination
Anonymous job applications can level the playing field in access to jobs but cannot prevent all forms of discrimination  Ulf Rinne

34 Taxpayer effects of immigration
Reliable estimates of taxpayer effects are essential for complete economic analyses of the costs and benefits of immigration  James P. Smith

35 Engaging the diaspora in an era of transnationalism
South Korea’s engagement with its diaspora can support the country’s development  Changzoo Song

36 Superdiversity, social cohesion, and economic benefits
Superdiversity can result in real economic benefits—but it also raises concerns about social cohesion  Paul Spoonley
37 Using a point system for selecting immigrants
A point system can select economically desirable immigrants
but it cannot prevent poor labor outcomes for immigrants
Massimiliano Tani

38 Post-enlargement emigration and new EU members’
labor markets
Outmigration has contributed to increasing wages and decreasing
unemployment in the new EU member states but may also cause
skills shortages Anzelika Zaiceva

39 The impact of aging on the scale of migration
Older people migrate less than young, yet with population
aging, mobility of elderly and specialized workers may
increase Anzelika Zaiceva

40 Who benefits from the minimum wage—natives or migrants?
There is no evidence that increases in the minimum wage have
hurt immigrants Madeline Zavodny

41 Circular migration
Why restricting labor mobility can be counterproductive
Klaus F. Zimmermann

SECTION IV Institutions

42 The consequences of trade union power erosion
Declining union power would not be an overwhelming cause for
concern if not for rising wage inequality and the loss of worker
voice John T. Addison

43 Tax evasion, labor market effects, and income distribution
Market adjustments to tax evasion alter factor and product
prices, which in turn determine the true impact and beneficiaries
of tax evasion James Alm

44 Tuning unemployment insurance to the business cycle
Unemployment insurance generosity should be greater when
unemployment is high—and vice versa Torben M. Andersen

45 Do in-plant alliances foster employment?
An instrument for responding to an imminent economic crisis
or for increasing firm competitiveness Lutz Bellmann

Entrepreneurs and their impact on jobs and economic growth

Productive entrepreneurs can invigorate the economy by creating jobs and new technologies, and increasing productivity. *Alexander S. Kritikos*

The internet as a labor market matchmaker

How effective are online methods of worker recruitment and job search? *Peter J. Kuhn*

Structural or cyclic?

Labor markets in recessions: How should policy respond to higher unemployment? *Edward P. Lazear*

Unemployment benefits and unemployment

The challenge of unemployment benefits is to protect workers while minimizing undesirable side effects. *Robert A. Moffitt*

Employment effects of minimum wages

When minimum wages are introduced or raised, are there fewer jobs? Global evidence says yes. *David Neumark*

The effect of overtime regulations on employment

There is no evidence that being strict with overtime hours and pay boosts employment—it could even lower it. *Ronald L. Oaxaca*

Flat-rate tax systems and their effect on labor markets

Despite their theoretical benefits, flat taxes have been tried only in a few formerly socialist countries. *Andreas Peichl*

Public-sector outsourcing

The desirability of outsourcing the provision of public services depends on their characteristics and market conditions. *Panu Poutvaara*

Employment protection

Policymakers need to find the right balance between protecting workers and promoting efficient resource allocation and productivity growth. *Stefano Scarpetta*

Gender quotas on boards of directors

Little evidence that gender quotas for women on boards of directors improve firm performance. *Nina Smith*
65 Unemployment benefits and job match quality
Do unemployment benefits help those seeking work to obtain better jobs? Konstantinos Tatsiramos

66 Entrepreneurship and the business cycle
Nascent entrepreneurship can have some predictive power over the business cycle Roy Thurik

67 Effect of international activity on firm performance
Trade liberalization benefits better performing firms and contributes to economic growth Joachim Wagner

68 International trade regulation and job creation
Trade policy is not an employment policy and should not be expected to have major effects on overall employment L. Alan Winters

SECTION V Transition and emerging economies

69 Can government policies reverse undesirable declines in fertility? Government policies can have a modest effect on raising fertility—but broader social changes lowering fertility are stronger Elizabeth Brainerd

70 Impact of privatization on employment and earnings
Workers and policymakers may fear that privatization leads to job losses and wage cuts, but what's the empirical evidence? John S. Earle

71 Formalization of jobs and firms in emerging market economies through registration reform
Reforming registration might not be enough to persuade informal firms and workers to formalize—enforcement and other reforms may also be needed Melanie Khamis

72 Worker displacement in transition economies and in China
Knowing which workers are displaced in restructuring episodes helps governments devise the right equity- and efficiency-enhancing policies Hartmut Lehmann

73 Employment protection legislation in transition and emerging markets
Although market failures mean employment protection is necessary, excessive protection can be counterproductive Alexander Muravyev
Informal employment in emerging and transition economies
Reducing informality requires better enforcement, more reasonable regulation, and economic growth  
Fabian Slonimczyk

SECTION VI Development

Designing labor market regulations in developing countries
Labor market regulation should aim to improve the functioning of the labor market while protecting workers  
Gordon Betcherman

Compliance with minimum wage laws in developing countries
Institutional, individual, firm, and local labor market characteristics are critical for understanding non-compliance with minimum wage laws  
Haroon Bhorat

Social protection programs for women in developing countries
How to design social protection programs that poor women can benefit from  
Lisa Cameron

Does minimum age of employment regulation reduce child labor?
The global fight against child labor might be better served by focusing less on existing laws and more on implementation and enforcement  
Eric V. Edmonds

Self-employment and poverty in developing countries
The right policies can help the self-employed to boost their earnings above the poverty level and earn more for the work they do  
Gary S. Fields

Does increasing the minimum wage reduce poverty in developing countries?
Whether raising minimum wages reduces—or increases—poverty depends on the characteristics of the labor market  
T. H. Gindling

Products and policies to promote saving in developing countries
Combine behavioral insights with good products to increase formal savings in developing countries  
Jessica Goldberg

Youth bulges and youth unemployment
Youth bulges are not a major factor explaining current levels of youth unemployment  
David Lam
83 Introducing a statutory minimum wage in middle and low income countries
Successful implementation of a statutory minimum wage depends on context, capacity, and institutional design  David N. Margolis

84 Designing unemployment benefits in developing countries
For unemployment benefit programs, the key policy issues are the level of benefits and subsidies and the types of taxes used to finance them  David A. Robalino

85 Female labor force participation in developing countries
Improving employment outcomes for women takes more than raising labor market participation—good jobs are important too  Sher Verick

86 Public works programs in developing countries have the potential to reduce poverty
The success of public works programs in reducing poverty depends on their design and implementation—in practice, they do better as safety nets  Laura Zimmermann

SECTION VII Environment

87 Environmental regulations and labor markets
Balancing the benefits of environmental regulations for everyone and the costs to workers and firms  Olivier Deschenes

88 Employment effects of green energy policies
Does a switch in energy policy toward more renewable sources create or destroy jobs in an industrial country?  Nico Pestel

SECTION VIII Education and human capital

89 How to attract foreign students
International student mobility can be good for migrating students, their home country, the host country, and those remaining at home  Arnaud Chevalier

90 Intergenerational return to human capital
Better educated parents invest more time and money in their children, who are more successful in the labor market  Paul J. Devereux
There is a positive association between study abroad and graduates' job prospects. Giorgio Di Pietro

Postponing school tracking can increase social mobility without significant adverse effects on educational achievement. Tuomas Pekkarinen

There is little evidence that substance use reduces educational attainment. Daniel I. Rees

Overskilling or overskilling plus overeducation are more likely than overeducation alone to harm employee welfare. Peter J. Sloane

While a four-year college degree is financially beneficial for most people, it is not necessarily the best option for everyone. Douglas Webber

Investing in female human capital can reduce brideprice and dowry practices and increase welfare. Siwan Anderson

The hidden private cost of obesity: Lower earnings and a lower probability of employment. Susan L. Averett

Over the last 50 years women have been increasing their participation in the labor market and in the crime market. Nadia Campaniello

Inheritance-related work disincentives can be strong, but labor supply could increase if bequests facilitate entrepreneurship. Donald Cox
100 Sexual orientation and labor market outcomes
Sexual orientation seems to affect job access and satisfaction, earning prospects, and interaction with colleagues Nick Drydakis

101 Should divorce be easier or harder?
The evidence, though weak, favors legal, easy, unilateral divorce Libertad Gonzalez

102 Teenage childbearing and labor market implications for women
Teenage childbearing is less a cause of inferior labor market outcomes for women than a marker of other social problems in a girl’s life Phillip B. Levine

103 Equal pay legislation and the gender wage gap
Despite major efforts at equal pay legislation, gender pay inequality still exists in the developed economies. How can this be put right? Solomon W. Polachek

104 Childcare subsidy policy: What it can and cannot accomplish
What are the implications of childcare subsidies for care quality, family well-being, and child development? Erdal Tekin

SECTION X Data and methods

105 Poverty persistence and poverty dynamics
Snapshots of who is poor in one period provide an incomplete picture of poverty Martin Biewen

106 Correspondence testing studies
What can we learn about discrimination in hiring? Dan-Olof Rooth

107 Randomized control trials in an imperfect world
How can we assess the policy effectiveness of randomized control trials when people don’t comply? Zahra Siddique

108 The importance and challenges of measuring work hours
Measuring hours worked is important, but different surveys can tell different stories Jay Stewart
109 The importance of measuring dispersion in firm-level outcomes

Ignoring the large variation in firm-level outcomes can create misunderstandings about the consequences of many policies

Chad Syverson
