CHAPTER 3

Demand Curves 79

3-1 Individual Demand Functions 79
   Homogeneity 79
3-2 Changes in Income 80
   Normal Goods 81
   Inferior Goods 81
3-3 Changes in a Good's Price 81
   Application 3.1: Engel's Law 82
   Substitution and Income Effects from a Fall in Price 83
   Substitution Effect 83
   Income Effect 85
   The Effects Combined: A Numerical Example 85
   The Importance of Substitution Effects 85
   Substitution and Income Effects for Inferior Goods 87
   Application 3.2: The Consumer Price Index and Its Biases 88
   Giffen's Paradox 90
3-4 An Application: The Lump-Sum Principle 90
   A Graphical Approach 90
   Generalizations 91
   Application 3.3: The Inefficiency of In-kind Programs 92
3-5 Changes in the Price of Another Good 93
   Substitutes and Complements 94
3-6 Individual Demand Curves 94
   Shape of the Demand Curve 96
3-7 Shifts in an Individual's Demand Curve 97
   Be Careful in Using Terminology 98
3-8 Two Numerical Examples 98
   Perfect Complements 98
   Some Substitutability 99
3-9 Consumer Surplus 99
   Demand Curves and Consumer Surplus 99
   Consumer Surplus and Utility 101
3-10 Market Demand Curves 102
   Construction of the Market Demand Curve 102
   Application 3.4: Valuing New Goods 103
   Shifts in the Market Demand Curve 104
   Numerical Examples 104
   A Simplified Notation 105
3-11 Elasticity 105
   Use Percentage Changes 106
   Linking Percentages 106
3-12 Price Elasticity of Demand 106
   Values of the Price Elasticity of Demand 107
Price Elasticity and the Substitution Effect 107
Price Elasticity and Time 108
Price Elasticity and Total Expenditures 108
Application 3.5: Brand Loyalty 109
Application 3.6: Price Volatility 111
3-13 Demand Curves and Price Elasticity 112
   Linear Demand Curves and Price Elasticity: A Numerical Example 112
   A Unit Elastic Curve 114
3-14 Income Elasticity of Demand 115
Application 3.7: An Experiment in Health Insurance 116
3-15 Cross-Price Elasticity of Demand 117
3-16 Some Elasticity Estimates 117
Summary 119
Review Questions 119
Problems 120

PART 3 UNCERTAINTY AND STRATEGY 123

CHAPTER 4 Uncertainty 125

4-1 Probability and Expected Value 125
4-2 Risk Aversion 126
   Diminishing Marginal Utility 126
Application 4.1: Blackjack Systems 127
   A Graphical Analysis of Risk Aversion 128
   Willingness to Pay to Avoid Risk 129
4-3 Methods for Reducing Risk and Uncertainty 129
   Insurance 130
Application 4.2: Deductibles in Insurance 132
   Diversification 133
Application 4.3: Mutual Funds 135
   Flexibility 136
Application 4.4: Puts, Calls, and Black-Scholes 139
   Information 140
   Information Differences among Economic Actors 142
Application 4.5: The Energy Paradox 144
4-4 Pricing of Risk in Financial Assets 145
   Investors' Market Options 145
   Choices by Individual Investors 146
Application 4.6: The Equity Premium Puzzle 147
Summary 148
Review Questions 148
Problems 149
Appendix to Chapter 4 Two-State Model of Uncertainty 152
A4-1 Model 152
A4-2 Risk Aversion 153
A4-3 Insurance 154
A4-4 Diversification 156
A4-5 Option Value 157
Summary 158
CHAPTER 5  Game Theory 159

5-1 Background 159
5-2 Basic Concepts 160
   Players 160
   Strategies 160
   Payoffs 160
   Information 160
5-3 Equilibrium 161
Application 5.1: A Beautiful Mind 162
5-4 Illustrating Basic Concepts 163
   The Prisoners' Dilemma 163
   The Game in Normal Form 163
   The Game in Extensive Form 163
   Solving for the Nash Equilibrium 164
   Dominant Strategies 165
   The Dilemma 167
   Mixed Strategies 167
   Matching Pennies 167
   Solving for a Mixed-Strategy Nash Equilibrium 168
   Interpretation of Random Strategies 169
5-5 Multiple Equilibria 169
Application 5.2: Mixed Strategies in Sports 170
   Battle of the Sexes 171
   Computing Mixed Strategies in the Battle of the Sexes 172
   The Problem of Multiple Equilibria 174
5-6 Sequential Games 174
Application 5.3: High-Definition Standards War 175
   The Sequential Battle of the Sexes 176
   Subgame-Perfect Equilibrium 178
   Backward Induction 180
   Repeated Games 182
   Definite Time Horizon 182
   Indefinite Time Horizon 182
Application 5.4: Laboratory Experiments 183
5-7 Continuous Actions 185
   Tragedy of the Commons 185
   Shifting Equilibria 186
5-8 N-Player Games 187
5-9 Incomplete Information 187
Application 5.5: Terrorism 188
Summary 189
Review Questions 189
Problems 190

PART 4  PRODUCTION, COSTS, AND SUPPLY 193

CHAPTER 6  Production 195

6-1 Production Functions 195
   Two-Input Production Function 196
6-2 Marginal Product 196
Diminishing Marginal Product 196
Application 6.1: Every Household Is a Firm 197
Marginal Product Curve 198
Average Product 198
Appraising the Marginal Product Concept 199
6-3 Isoquant Maps 199
Rate of Technical Substitution 201
RTS and Marginal Products 202
Diminishing RTS 202
Application 6.3: Engineering and Economics 203
6-4 Returns to Scale 204
Adam Smith on Returns to Scale 204
A Precise Definition 204
Graphic Illustrations 204
Application 6.4: Returns to Scale in Beer and Wine 206
6-5 Input Substitution 207
Fixed-Proportions Production Function 207
Relevance of Input Substitutability 208
6-6 Changes in Technology 209
Technical Progress versus Input Substitution 210
Multifactor Productivity 210
Application 6.5: Finding the Computer Revolution 211
6-7 A Numerical Example of Production 212
The Production Function 212
Average and Marginal Productivities 212
The Isoquant Map 212
Rate of Technical Substitution 213
Technical Progress 214
Summary 215
Review Questions 215
Problems 216

CHAPTER 7 Costs 219

7-1 Basic Cost Concepts 219
Economic versus Accounting Costs 219
Economic versus Opportunity Costs 221
Labor Costs 221
Capital Costs 222
Entrepreneurial Costs 222
Application 7.1: Stranded Costs and Deregulation 223
The Two-Input Case 224
Economic Profits and Cost Minimization 224
7-2 Cost-Minimizing Input Choice 224
Graphic Presentation 225
An Alternative Interpretation 226
Application 7.2: Is Social Responsibility Costly? 227
The Firm's Expansion Path 228
7-3 Cost Curves 228
**CHAPTER 8  Profit Maximization and Supply  249**

8-1  The Nature of Firms  249
   Why Firms Exist  249
   Contracts within Firms  250
   Contract Incentives  250
   Firms' Goals and Profit Maximization  251

8-2  Profit Maximization  251
   Marginalism  251
   Application 8.1: Corporate Profits Taxes and Firms' Financing
   Decisions  252
   The Output Decision  253
   The Marginal Revenue/Marginal Cost Rule  254
   Marginalism in Input Choices  254

8-3  Marginal Revenue  255
   Marginal Revenue for a Downward-Sloping Demand Curve  255
   A Numerical Example  255
   Marginal Revenue and Price Elasticity  257

8-4  Marginal Revenue Curve  259
   Numerical Example Revisited  259
   Application 8.2: Maximizing Profits from Bagels and Catalog Sales  260
   Shifts in Demand and Marginal Revenue Curves  262

8-5  Supply Decisions of a Price-Taking Firm  262
   Price-Taking Behavior  262
   Application 8.3: Evolving Airline Pricing Strategies  263
   A Numerical Example Showing Price-Taking Behavior  264
   Short-Run Profit Maximization  264
PART 5 PERFECT COMPETITION 275

CHAPTER 9 Perfect Competition in a Single Market 277

9-1 Timing of a Supply Response 277
9-2 Pricing in the Very Short Run 277
   Shifts in Demand: Price as a Rationing Device 278
   Applicability of the Very Short-Run Model 278
Application 9.1: Internet Auctions 279
9-3 Short-Run Supply 280
   Construction of a Short-Run Supply Curve 280
9-4 Short-Run Price Determination 281
   Functions of the Equilibrium Price 281
   Effect of an Increase in Market Demand 282
9-5 Shifts in Supply and Demand Curves 283
   Short-Run Supply Elasticity 283
   Shifts in Supply Curves and the Importance of the Shape of the
   Demand Curve 284
   Shifts in Demand Curves and the Importance of the Shape of the
   Supply Curve 285
Application 9.2: Ethanol Subsidies in the United States and Brazil 286
   A Numerical Illustration 287
   Algebra is Easier 288
9-6 The Long Run 289
   Equilibrium Conditions 289
   Profit Maximization 289
   Entry and Exit 289
   Long-Run Equilibrium 290
9-7 Long-Run Supply: The Constant Cost Case 290
   Market Equilibrium 290
   A Shift in Demand 291
   Long-Run Supply Curve 291
9-8 Shape of the Long-Run Supply Curve 292
   The Increasing Cost Case 292
   Long-Run Supply Elasticity 293
   Estimating Long-Run Elasticities of Supply 293
   Can Supply Curves Be Negatively Sloped? 294
Application 9.3: How Do Network Externalities Affect Supply Curves? 295
9-9 Consumer and Producer Surplus 296
   Short-Run Producer Surplus 297
   Long-Run Producer Surplus 297
CHAPTER 10  General Equilibrium and Welfare  315

10-1 A Perfectly Competitive Price System  315
10-2 Why Is General Equilibrium Necessary?  316
   Disturbing the Equilibrium  317
   Reestablishing Equilibrium  317
10-3 A Simple General Equilibrium Model  317
Application 10.1: Modeling Excess Burden with a Computer  318
10-4 The Economic Efficiency of Perfect Competition  320
   Some Numerical Examples  322
   Prices, Efficiency, and Laissez-Faire Economics  324
10-5 Why Markets Fail to Achieve Economic Efficiency  325
   Imperfect Competition  325
   Externalities  325
   Public Goods  325
Application 10.2: Gains from Free Trade and Free Trade Agreements  326
   Imperfect Information  328
10-6 Efficiency and Equity  328
   Defining and Achieving Equity  328
   Equity and Competitive Markets  329
10-7 The Edgeworth Box Diagram for Exchange  329
   Mutually Beneficial Trades  329
   Efficiency in Exchange  331
   Contract Curve  331
   Efficiency and Equity  331
   Equity and Efficiency with Production  332
Application 10.3: The Second Theorem of Welfare Economics  333
10-8 Money in General Equilibrium Models  334
   Nature and Function of Money  334
   Money as the Accounting Standard  334
   Commodity Money  335
   Fiat Money and the Monetary Veil  335
Application 10.4: Commodity Money  336
Summary  337
Review Questions  338
Problems  338
PART 6  MARKET POWER  343

CHAPTER 11  Monopoly  345

11-1 Causes of Monopoly  345
   Technical Barriers to Entry  345
   Legal Barriers to Entry  346
11-2 Profit Maximization  346
   A Graphic Treatment  346
Application 11.1: Should You Need a License to Shampoo a Dog?  347
   Monopoly Supply Curve?  348
   Monopoly Profits  349
11-3 What’s Wrong with Monopoly?  350
   Deadweight Loss  351
   Redistribution from Consumers to the Firm  351
Application 11.2: Who Makes Money at Casinos?  352
   A Numerical Illustration of Deadweight Loss  353
   Buying a Monopoly Position  354
11-4 Price Discrimination  355
   Perfect Price Discrimination  355
Application 11.3: Financial Aid at Private Colleges  357
   Market Separation  358
   Nonlinear Pricing  359
Application 11.4: Mickey Mouse Monopoly  362
   Durability  364
Application 11.5: Bundling of Cable and Satellite Television Offerings  365
11-5 Natural Monopolies  366
   Marginal Cost Pricing and the Natural Monopoly Dilemma  367
   Two-Tier Pricing Systems  367
Application 11.6: Does Anyone Understand Telephone Pricing?  368
   Rate of Return Regulation  369
Summary  369
Review Questions  370
Problems  370

CHAPTER 12  Imperfect Competition  374

12-1 Overview: Pricing of Homogeneous Goods  374
   Competitive Outcome  374
   Perfect Cartel Outcome  375
   Other Possibilities  376
12-2 Cournot Model  376
   Nash Equilibrium in the Cournot Model  377
Application 12.1: Measuring Oligopoly Power  378
   Comparisons and Antitrust Considerations  380
   Generalizations  381
   Bertrand Model  381
Application 12.2: Cournot in California  382
   Nash Equilibrium in the Bertrand Model  383
   Bertrand Paradox  384
   Capacity Choice and Cournot Equilibrium  384
   Comparing the Bertrand and Cournot Results  385
12-3 Product Differentiation  385
  Market Definition  386
  Bertrand Model with Differentiated Products  386
Application 12.3: Competition on the Beach  387
  Product Selection  388
  Search Costs  389
  Advertising  390
Application 12.4: Searching the Internet  391
12-4 Tacit Collusion  392
  Finite Time Horizon  392
Application 12.5: The Great Electrical Equipment Conspiracy  393
  Indefinite Time Horizon  394
  Generalizations and Limitations  395
12-5 Entry and Exit  396
  Sunk Costs and Commitment  396
  First-Mover Advantages  396
  Entry Deterrence  398
  A Numerical Example  398
  Limit Pricing  399
  Asymmetric Information  400
  Predatory Pricing  401
Application 12.6: The Standard Oil Legend  402
12-6 Other Models of Imperfect Competition  403
  Price Leadership  403
  Monopolistic Competition  404
12-7 Barriers to Entry  405
Summary  406
Review Questions  407
Problems  407

PART 7  INPUT MARKETS  411

CHAPTER 13  Pricing in Input Markets  413
13-1 Marginal Productivity Theory of Input Demand  413
  Profit-Maximizing Behavior and the Hiring of Inputs  413
  Price-Taking Behavior  414
  Marginal Revenue Product  414
  A Special Case—Marginal Value Product  414
13-2 Responses to Changes in Input Prices  415
  Single Variable Input Case  415
Application 13.1: Jet Fuel and Hybrid Seeds  416
  A Numerical Example  417
  Two-Variable Input Case  418
  Substitution Effect  418
  Output Effect  418
  Summary of Firm's Demand for Labor  419
13-3 Responsiveness of Input Demand to Input Price Changes  420
  Ease of Substitution  420
  Costs and the Output Effect  420
13-4 Input Supply  421
## Contents

**Application 13.2: Controversy over the Minimum Wage** 422

- Labor Supply and Wages 423

13-5 Equilibrium Input Price Determination 423

- Shifts in Demand and Supply 423

13-6 Monopsony 425

- Marginal Expense 425

- A Numerical Illustration 425

**Application 13.3: Why Is Wage Inequality Increasing?** 426

- Monopsonist's Input Choice 428

- A Graphical Demonstration 428

- Numerical Example Revisited 428

- Monopsonists and Resource Allocation 430

- Causes of Monopsony 430

**Application 13.4: Monopsony in the Market for Sports Stars** 431

- Bilateral Monopoly 432

**Application 13.5: Superstars** 433

- Summary 434

- Review Questions 434

- Problems 435

**Appendix to Chapter 13 Labor Supply** 438

A13-1 Allocation of Time 438

- A Simple Model of Time Use 438

- The Opportunity Cost of Leisure 439

**Application 13A.1: The Opportunity Cost of Time** 440

- Utility Maximization 441

A13-2 Income and Substitution Effects of a Change in the Real Wage Rate 441

- A Graphical Analysis 442

A13-3 Market Supply Curve for Labor 442

**Application 13A.2: The Earned Income Tax Credit** 444

**Summary** 445

---

**CHAPTER 14 Capital and Time 446**

14-1 Time Periods and the Flow of Economic Transactions 446

14-2 Individual Savings—The Supply of Loans 447

- Two-Period Model of Saving 447

- A Graphical Analysis 447

- A Numerical Example 448

- Substitution and Income Effects of a Change in the Real Wage Rate 449

- A Graphical Analysis 442

A13-3 Market Supply Curve for Labor 442

**Application 14.1: Do We Need Tax Breaks for Savers?** 450

- Rental Rates and Interest Rates 451

- Ownership of Capital Equipment 452

14-4 Determination of the Real Interest Rate 452

**Application 14.2: Do Taxes Affect Investment?** 453

**Application 14.3: Usury** 454

- Changes in the Real Interest Rate 455

14-5 Present Discounted Value 455

**Application 14.4: The Real Interest Rate Paradox** 456

- Single-Period Discounting 457
Multiperiod Discounting 457
Present Value and Economic Decisions 458
14-6 Pricing of Exhaustible Resources 458
Scarcity Costs 458
Application 14.5: Discounting Cash Flows and Derivative Securities 459
The Size of Scarcity Costs 460
Application 14.6: Are Any Resources Scarce? 461
Time Pattern of Resource Prices 462
Summary 462
Review Questions 463
Problems 464
Appendix to Chapter 14 Compound Interest 466
A14-1 Interest 466
A14-2 Compound Interest 466
Interest for One Year 466
Interest for Two Years 467
Interest for Three Years 467
A General Formula 467
Compounding with Any Dollar Amount 468
Application 14A.1: Compound Interest Gone Berserk 469
A14-3 Present Discounted Value 469
An Algebraic Definition 470
General PDV Formulas 470
A14-4 Discounting Payment Streams 471
Application 14A.2: Zero-Coupon Bonds 472
An Algebraic Presentation 473
Perpetual Payments 474
Varying Payment Streams 475
Calculating Yields 475
Reading Bond Tables 475
A14-5 Frequency of Compounding 476
Semiannual Compounding 476
A General Treatment 477
Real versus Nominal Interest Rates 477
Application 14A.3: Continuous Compounding 478
A14-6 The Present Discounted Value Approach to Investment Decisions 479
Present Discounted Value and the Rental Rate 480
Summary 480

PART 8 MARKET FAILURES 483
CHAPTER 15 Asymmetric Information 485
15-1 Principal-Agent Model 485
15-2 Worker Moral Hazard 486
Application 15.1: Principals and Agents in Franchising and Medicine 487
Full Information about Effort 488
Unobservable Effort 489
Problems with High-Powered Incentives 491
Substitutes for High-Powered Incentives 492
A Numerical Example 493
Executives in the Firm 494
Summing Up 495
Application 15.2: The Good and Bad Effects of Stock Options 496
Application 15.3: Moral Hazard in the Financial Crisis 497
15-3 Private Information about Consumer Type 498
One Consumer Type 498
Two Consumer Types, Full Information 499
Two Consumer Types: Asymmetric Information 499
Examples 501
Inefficiency with Hidden Types 503
Adverse Selection in Warranties and Insurance 504
15-4 Asymmetric Information in Competitive Markets 504
Moral Hazard with Several Agents 504
Application 15.4: Adverse Selection in Insurance 505
Auctions 506
The Market for Lemons 508
15-5 Signaling 509
Spence Education Model 509
Application 15.5: Looking for Lemons 510
Separating Equilibrium 512
Pooling Equilibria 513
Predatory Pricing and Other Signaling Games 514
Inefficiency in Signaling Games 514
Summary 515
Review Questions 515
Problems 516

CHAPTER 16 Externalities and Public Goods 519
16-1 Defining Externalities 519
Externalities between Firms 519
Externalities between Firms and People 520
Externalities between People 520
Reciprocal Nature of Externalities 520
16-2 Externalities and Allocational Efficiency 521
A Graphical Demonstration 521
Application 16.1: Secondhand Smoke 522
16-3 Property Rights, Bargaining, and the Coase Theorem 523
Costless Bargaining and Competitive Markets 524
Ownership by the Polluting Firm 524
Ownership by the Injured Firm 524
The Coase Theorem 525
Distributional Effects 525
The Role of Transactions Costs 525
Application 16.2: Property Rights and Nature 526
16-4 Externalities with High Transactions Costs 527
Legal Redress 527
Taxation 527
Application 16.3: Product Liability 528
Contents xxi

Regulation of Externalities 529
Optimal Regulation 530
Fees, Permits, and Direct Controls 530
16-5 Public Goods 531
Attributes of Public Goods 531
Application 16.4: Power Plant Emissions and the Global Warming Debate 532
Nonexclusivity 534
Nonrivalry 534
Categories of Public Goods 534
16-6 Public Goods and Market Failure 535
A Graphical Demonstration 535
Application 16.5: Ideas as Public Goods 536
16-7 Solutions to the Public Goods Problem 538
Nash Equilibrium and Underproduction 538
Compulsory Taxation 538
The Lindahl Equilibrium 539
16-8 Revealing the Demand for Public Goods 540
Local Public Goods 540
16-9 Voting for Public Goods 540
Application 16.6: Fund Raising on Public Broadcasting 541
Majority Rule 542
The Paradox of Voting 542
Single-Peaked Preferences and the Median Voter Theorem 543
Voting and Efficient Resource Allocation 544
Representative Government and Bureaucracies 544
Application 16.7: Referenda on Limiting Public Spending 545
Summary 546
Review Questions 546
Problems 547

CHAPTER 17 Behavioral Economics 550
17-1 Should We Abandon Neoclassical Economics? 550
17-2 Limits to Human Decision Making: An Overview 551
17-3 Limited Cognitive Power 552
Uncertainty 553
Application 17.1: Household Finance 554
Prospect Theory 556
Framing 558
Paradox of Choice 558
Multiple Steps in Reasoning 559
Evolution and Learning 561
Application 17.2: Cold Movie Openings 562
Self-Awareness 563
17-4 Limited Willpower 563
Application 17.3: Going for It on Fourth Down 564
Application 17.4: Let's Make a Deal 565
Hyperbolic Discounting 566
Numerical Example 566
