Preface xiii
Acknowledgments xvi

Introduction 1
  Derivative valuation theory vs. derivative pricing technology 6
  Implied volatility vs. real volatility 9
  Formal reality vs. physical reality 12

Part I  The Matter 19

1  The End of Probability 19
  1.1  The void of possibilities 19
  1.2  A new matter 23
  1.3  The infinity of markets 25
  1.4  The end of statistics 28

2  The Vision Ahead 30
  2.1  Regime-switching model 30
  2.2  Recalibration 32
  2.3  Is probability necessary? 35
  2.4  Price and probability 38
  2.5  A new metaphysics 39
  2.6  Absolute contingency 41
  2.7  The market as an opportunity for speculative thought 42
  2.8  The market as the conversion of the image of thought 43
  2.9  Ascending to the metalogical level 44

3  Introducing the Market 46
  3.1  The unexchangeable place of exchange 46
3.1.1 The market as a continual event 48
3.1.2 The market as quantitative history 50
3.1.3 The intensive nontemporal price process 52
3.1.4 The continuity of the discontinuity 53
3.1.5 The matter beyond antifragility 55
3.2 The medium of contingency 56
  3.2.1 The technology of the future 60
  3.2.2 The book behind the market 63
3.3 Pricing vs. valuation 66
  3.3.1 The surface of the market 69
  3.3.2 The smile problem 72
  3.3.3 The absolute local 74
  3.3.4 In the middle of the event 77

4 The Thought Behind 79
  4.1 Two sides of writing 79
  4.2 Genesis of price vs. generation of number 81
  4.3 The market as geometry 83
  4.4 State vs. mark 84
  4.5 Probability as an internal episode 89
  4.6 The alternative axiomatic system of Shafer and Vovk 92
  4.7 Extensive difference vs. intensive difference 98

Part II The Matter in Brownian Motion 103

5 From Throwing the Dice to Grasping Brownian Motion 104
  5.1 The meaning of probability 105
    5.1.1 The law of large numbers 105
    5.1.2 Intuition 108
    5.1.3 Matter 109
    5.1.4 Reality 113
    5.1.5 Tense 116
  5.2 Changing the meaning of matter 119
    5.2.1 The strike of contingency 119
    5.2.2 The one and the many 122
    5.2.3 The reality of contingency 124
  5.3 Money 126
    5.3.1 Time is not money 131
    5.3.2 Money is place 133
  5.4 Changing the meaning of reality 136
    5.4.1 Ex-ante vs. ex-post 137
Part III The Matter in Contingency

7 The Paper and the Tree
  7.1 The market and time
    7.1.1 Contingency, writing and exchanging
    7.1.2 Price and time
    7.1.3 Price and the event
    7.1.4 Price and the trace
  7.2 From the mark to the whole market
    7.2.1 Contingent payoff vs. contingent claim (first take)
    7.2.2 The invention of writing (first take)
    7.2.3 The exchange and the abyss

8 Archaeology of the Multiple
  8.1 To be vs. can be
    8.1.1 Identification and transition
    8.1.2 The danger of abstraction and the suspension of possibility
    8.1.3 0 and 1
    8.1.4 The real future
  8.2 Chrono-logic
    8.2.1 Probability as an integral
    8.2.2 Chronology as a simulation of chrono-logic
  8.3 Accounting for the event
    8.3.1 Money and the other face of the event
    8.3.2 The accident of time and the necessity of work
    8.3.3 An event that is not but that remains
    8.3.4 Writing the event

9 Archaeology of the Exchange
  9.1 All of the market!
    9.1.1 Impossible exchange, necessary exchange
    9.1.2 The inverse view
## Contents

9.2 Statistics as a proto-market
   9.2.1 Abstraction and the precision of the present state
   9.2.2 The immanence of statistics and the immanence of the paper
   9.2.3 The matter in statistics

9.3 The matter in the exchange
   9.3.1 The non-individual singular
   9.3.2 Single-case statistics
   9.3.3 Contingency of the strike

10 Matter and Geometry
   10.1 The singularity of writing
   10.2 The singularity of the exchange

**Part IV The Market of Contingent Claims (or the Matter in Black-Scholes-Merton)**

11 Towards a Contemporary Theory of the Market
   11.1 The stochastic narrative of the market
      11.1.1 Definite states
      11.1.2 Derivatives prices as states
      11.1.3 Variations on lottery value and random price
      11.1.4 The curse of the derivative value
   11.2 The trading narrative of the market
      11.2.1 Can the derivative trade independently?

12 Incomplete Markets
   12.1 Complete vs. incomplete markets
   12.2 Martingale measure of the market
   12.3 Equivocation
   12.4 Incomplete market when the market is all there is

13 The Central Knot
   13.1 Contingent payoff vs. contingent claim
   13.2 Probabilistic exit
   13.3 The alternative exit
      13.3.1 Differentiating the form
   13.4 The invention of writing
   13.5 Genesis
      13.5.1 That they don't exist

14 The Hard Problem
   14.1 The ultimate probability spot
14.2 The presentation of the contingent payoffs 304
14.3 The lure of theory 309
14.4 The semantic theory of the market 314

15 The Book of the Market 321
15.1 Formalism and meta-formalism 321
   15.1.1 The instant of the formalism and the instant of the market 322
   15.1.2 The infinity of the option price and the infinity of matter 325
   15.1.3 Formal deduction of matter 326
   15.1.4 A new book for a new reality 328
15.2 The book of genesis 330
   15.2.1 Only the book can write history 331
   15.2.2 One book instead of two theories 333
   15.2.3 Only the book can bind the void 335
   15.2.4 Only the book can settle the succession 337
   15.2.5 Contemporary art 339
   15.2.6 An ontology made of paper 340
15.3 The trading force 343
15.4 Coda 350

16 Denouement: The Theory after the Two Narratives 351

Conclusion 363

Appendix A: Regime-Switching Model 373
   A.1 A meta-contextual pricing tool 373
   A.2 Recalibration 376

Appendix B: Menard's Quixote 379

Notes 385
