Table of Contents

Preface .................................................................................................................................................. xv

Acknowledgment ................................................................................................................................... xxi

Section 1
Fuzzy MCDM in Digital Market Place: Background

Chapter 1
A Literature Survey on the Usage of Fuzzy MCDM Methods for Digital Marketing ......................... 1
Cengiz Kahraman, Istanbul Technical University, Turkey
Ibrahim Yazıcı, Istanbul Technical University, Turkey
Ali Karaşan, Istanbul Technical University, Turkey

Chapter 2
Fuzzy Multi-Criteria Decision Making Methods for E-Commerce Issues ........................................ 20
Mohamed Naili, University of Bejaia, Algeria & University of Bordj Bou Arreridj, Algeria
Abdelhak Boumetra, University of Bordj Bou Arreridj, Algeria
Abdelkamel Tari, University of Bejaia, Algeria

Chapter 3
Fuzzy Structural Models and Based Applications in Digital Marketplace ......................................... 59
Anil Kumar, ABV-Indian Institute of Information Technology and Management, India
Manoj Kumar Dash, ABV-Indian Institute of Information Technology and Management, India

Section 2
Consumer Decision Making in Digital Market Place

Chapter 4
Selection of Customers for Marketing Campaign as a Multi-Criteria Problem ................................... 72
Tadeusz Trzaskalik, University of Economics in Katowice, Poland
Slawomir Jarek, University of Economics in Katowice, Poland
Section 5
Fuzzy MCDM Analysis in Different Segment of Digital Market Place

Chapter 12
A Fuzzy-Based Decision Support Tool for Appraisal of Supplier’s Quality Assurance Practices ................................................................. 255
Chirasen Samantra, National Institute of Technology Rourkela, India
Saurav Datta, National Institute of Technology Rourkela, India
Siba Sankar Mahapatra, National Institute of Technology Rourkela, India

Chapter 13
Multi-Criteria Decision Making Models for Sustainable and Green Supply Chain Management Based on Fuzzy Approach ......................................................................................................................... 291
Meysam Shaverdi, Edwards School of Business, University of Saskatchewan, Canada
Iman Ramezani, Sharif University of Technology, Iran
Ali Asghar Anvary Rostamy, Tarbiat Modares University, Iran

Chapter 14
Multi-Criteria Fuzzy Analysis of Competitiveness: Comparative Evaluation of Regional Development ........................................................................................................................................... 308
Katsiaryna Navitskaya, Yanka Kupala State University of Grodno, Belarus

Compilation of References ........................................................................................................ 326

About the Contributors ........................................................................................................ 361
