Energy Sector Diversification in Iran

Evolving Strategies and
Interests in the Electricity Sector

 Springer VS

Inhaltsverzeichnis

Figures	11
Tables.....	15
Abbreviations.....	17
Clarifications	21
1 Situating Iran in the geopolitics of fossil fuels, renewable energies and carbon emissions reductions	23
1.1 Core challenge and research question.....	31
1.2 Hypotheses.....	34
1.3 Current state of research	39
1.4 Research design and methodology.....	42
2 The relationship of domestic energy decisions in Iran's international context.....	47
2.1 The dominance of state interests in state interplay: An intertwined theoretical framework	50
2.2 Opening the black box: From international relations to state institutions.....	63
2.3 History matters: The importance of Iran's energy sector in a contemporary analysis	67
2.4 The historical evolution of the role of the energy sector in Iran	70
2.4.1 The emergence of the oil sector in Iran	71
2.4.2 The emergence of oil as a foreign policy tool.....	75
2.4.3 The impact of the Iranian Revolution on efforts to decouple from oil.....	81
2.5 Government organization and decision-making in Iran	82

2.6	The energy sector in Iran after 1990: Key actors and developments	86
2.7	The historical evolution of the electricity sector in Iran	90
2.7.1	Structural developments in Iran's electricity sector.....	91
2.7.2	Aspirations as a regional player in the electricity sector	98
2.8	Conclusion	103
3	Domestic, regional and international developments shaping Iranian energy politics (1990-1999).....	105
3.1	Geopolitical opportunities after the Cold War	107
3.2	The strategic vision of the first five-year plan (1990-1994)	124
3.2.1	Budget developments during the first five-year period	128
3.2.2	Political factionalism: A tight rope around the neck of modernization.....	140
3.2.3	Reconstruction: Strengthening the domestic electricity sector	143
3.3	Conclusions after the first five-year plan.....	150
3.4	The strategic vision of the second five-year plan (1995-1999).....	152
3.4.1	The allocation of resources in the electricity sector.....	155
3.4.2	Factionalism, internationalism and regionalism: The "isms" driving Iranian political developments between 1995 and 1999	160
3.4.3	Beyond reconstruction: First strategic decisions in electricity generation in the country	163
3.5	Conclusions of the second five-year plan	171
3.6	Slow beginnings: Energy dynamics between 1990-1999	173
4	Strategic decisions: Energy diversification interests in Iran (2000-2011).....	179
4.1	Domestic dynamics in Iran: From power struggles to economic justice (2000-2004).....	181
4.2	From domestic factionalism to international policy-making	183

4.3	Changes in the third five-year development plan: Privatization and renewable energies	198
4.3.1	Budget allocations between 2000-2004	202
4.3.2	Electricity sector diversification	207
4.3.3	Electricity pricing model in the 2000s in Iran	221
4.3.4	Electricity imports and exports	222
4.4	Conclusions after the third plan period	223
4.5	Entanglement of domestic and international policies: The Ahmadinejad years	224
4.6	Organizational changes in the government	227
4.7	The fourth five-year plan (2005-2009)	228
4.7.1	Budget allocations between 2005 to 2009	232
4.7.2	Electricity sector diversification	236
4.7.3	Electricity pricing	251
4.7.4	Iran's regional electricity strategy: A loophole to sanctions.	256
4.8	Conclusions during the fourth five year period.....	260
4.9	The fifth five year period: Lofty goals and strategic interests	262
4.9.1	Electricity generation in Iran: Beyond the fourth plan period.....	267
4.9.2	The growth of Iran's regional electricity grid: 2010 and beyond	281
4.10	Conclusions from 2000 to 2011	284
5	Evolution of Energy Dynamics in the Electricity Sector in Iran	297
5.1	The framework of the electricity sector	300
5.2	Power politics and national interests to attain systemic gains.....	307
5.2.1	Renewable energies have not been a strategic priority in electricity diversification	307
5.2.2	Overcoming structural shortcomings in Iran's electricity sector	311

5.2.3	Bowing to international pressures by diversifying domestic electricity generation	316
5.2.4	Strengthening Iran's regional interests by preparing its electricity sector for production increases	319
5.3	Addressing the issue: Merging domestic and foreign policy interests in Iran.....	324
5.3.1	Energy efficiency mostly driven by price subsidies	325
5.3.2	Renewable energies precluded by comparative investment costs.....	327
5.3.3	System modernization to benefit domestic connectivity and foreign policy objectives.....	329
5.4	Outlook	330
6	Annex.....	335
7	Bibliography	359
