Nataliya Klimova • Oleg Kozyrev • Eduard Babkin

Innovation in Clusters
Understanding Universities, Special Economic Zones, and Modeling

Springer
Contents

1 Introduction ................................................................................................................. 1

2 The Main Characteristics of the Cluster Model on the Modern Stage ......................................... 5
  2.1 Modern Forms of Business Cooperation: Clusters and Networks-A Theoretical Overview ............... 5
  2.2 Analysis of the Best Practices of European Clusters ..................................................... 15
    2.2.1 European Initiatives in the Field of Clusters and SMEs ........................................... 15
    2.2.2 Different Factors in the Formation of Clusters ....................................................... 17
    2.2.3 Clusters: Organizational Modalities and Financial Performances .............................. 23
  2.3 Clusters in Europe: Best Practices and Reaction to Crisis ............................................. 27
    2.3.1 Best Practices: The Case of Italy ........................................................................... 30
    2.3.2 Best Practices: Case of Norway ........................................................................... 35
References ....................................................................................................................... 39

3 Problems of Modern Russian Industry and the Development of Clusters ..................................... 45
  3.1 The Russian Industrial Base and Problems of Small and Medium Enterprises ................. 45
  3.2 Clusters in Russia: Their Development, Organization, and Contribution to the Russian Economy .......................................................... 53
    3.2.1 Industrial Clusters .............................................................................................. 54
    3.2.2 Innovation Clusters and the Creation of Spin-Offs .............................................. 68
  3.3 Special Economic Zones ............................................................................................ 73
    3.3.1 Special Economic Zones: The Case of India ...................................................... 74
    3.3.2 Special Economic Zones in Russia ..................................................................... 78
    3.3.3 Innovation Implementation Zones ..................................................................... 80
References ....................................................................................................................... 88
4 A Methodology for Evaluating the Efficiency of University Clusters

4.1 University–Industry Relations in Innovative Clusters

4.1.1 Preconditions and Success Factors for University–Industry Collaboration

4.1.2 Benefits of University–Industry Collaboration

4.1.3 Challenges of University–Industry Collaboration

4.2 Creation of an Innovation Cluster and the Problems of the University Formation of Managers

4.3 Methodology for Evaluating a Cluster’s Efficiency

References

5 Formal Approaches to Cluster Modeling

5.1 Regional Clusters

5.1.1 Main Research Hypotheses

5.1.2 Modeling Approach

5.2 Innovative Clusters

5.2.1 Strategy

5.3 University Clusters

5.3.1 Gaps Between Theory and Practice

5.3.2 Application of Cluster Theory to University Parks and Their Associated Clusters

5.3.3 An Approach to a Methodology

References

6 A New Approach to Designing and Modeling the Evolution of Clusters

6.1 Motivation

6.2 The Generic Model and Its Mathematical Formulation

6.3 An Approach Based on a Neural Network

6.3.1 Reasons for Choosing the Artificial Neural Network Paradigm

6.3.2 Basic Implementation of the Approach Using Hopfield Networks

6.3.3 Application of the SSA Technique

6.4 Extension of the Basic Method by Application of Genetic Programming

6.5 The Usage of the TM for Solving the Task

6.5.1 Structure of the Tabu Machine

6.5.2 Dynamics of the Tabu Machine

6.5.3 Updating $AE(S_j)$

6.5.4 The State Transition Mechanism

6.5.5 The First Stage of the New Problem’s Solution

6.5.6 Modifications of Tabu Search Algorithm, Concerned to the Features of the Soluble Problem

6.5.7 Improvement of the Solution Quality
