An Evaluation of Japanese Environmental Regulations

Quantitative Approaches from Environmental Economics
Contents

1 Environmental Policy Evaluations in Japan: 
   Concepts and Practice ........................................ 1
   1.1 Key Concepts in Environmental Economic Theory .......... 1
   1.2 Instruments for Environmental Policies .................... 3
   1.3 Evaluation of Environmental Policies ...................... 5
   1.4 Approaches and Tools for Policy Management 
       and Evaluation ............................................. 8
   1.5 Policy Evaluations in Japan in the Past and Present ...... 13
   1.6 Contents of This Book ..................................... 14
   References .................................................... 17

2 Ex Ante Policy Evaluation of the Vehicle Type Regulation ..... 19
   2.1 Introduction ............................................... 20
   2.2 A Brief History of Japanese Air Pollution Regulation: 
       Background of the VTR ..................................... 21
   2.3 Compliance Methods ........................................ 24
   2.4 Cost of the VTR ............................................ 24
       2.4.1 Compliance Cost ....................................... 24
       2.4.2 Opportunity Cost of Replacement ....................... 25
       2.4.3 Income from Selling Old Vehicles ....................... 29
       2.4.4 Compliance Cost ....................................... 29
       2.4.5 Total Cost ............................................. 30
       2.4.6 Potential Biases in \( TC \) ................................ 32
   2.5 Benefit of the VTR ......................................... 33
       2.5.1 Effect of the VTR ..................................... 33
       2.5.2 Baseline: Emissions Without the VTR ................... 34
       2.5.3 Emissions with the VTR ................................. 34
       2.5.4 Emissions Reduction ................................... 35
       2.5.5 Net Benefit ........................................... 37
   2.6 Cost-Benefit Analysis ....................................... 38
2.7 Efficiency of the VTR: Simulation of Alternative Policies 39
  2.7.1 Marginal Abatement Cost 39
  2.7.2 Simulation of Improved Efficiency 40
  2.7.3 Discussion on the Optimal Simulation 45
2.8 Conclusion 46
Appendix 2.1 Average Life Expectancy: \( L \) (Year) 47
Appendix 2.2 The Number of Vehicles Replaced, \( NR' \) 48
Appendix 2.3 Mileage Adjustment Rate 49
References 49

3 Cost-Benefit Analysis of Enforcing Installation of Particulate Matter Elimination Devices on Diesel Trucks 51
  3.1 Introduction 51
  3.2 Operational Regulation and Vehicle Type Regulation 53
  3.3 Cost of Operational Regulation 57
    3.3.1 Cost of Method 1 57
    3.3.2 Cost of Method 2 58
    3.3.3 Total Cost 59
  3.4 Benefit of Operational Regulation 60
    3.4.1 Emissions Without Operational Regulation 61
    3.4.2 Emissions with Operational Regulation 62
    3.4.3 Total Benefit of Operational Regulation 63
  3.5 Cost-Benefit Analysis 63
  3.6 Robustness Check 65
  3.7 Conclusion 68
References 69

4 Does Environmental Regulation Affect on Outside of the Regulated Areas? Empirical Analysis of Japanese Automobile NOx-PM Act 71
  4.1 Introduction 71
  4.2 The Effect of VTR on Unregulated Areas 73
  4.3 Estimation Models 76
  4.4 Data and Explanatory Variables 78
  4.5 Estimation Results 80
  4.6 Conclusion 83
References 84

5 An Economic Welfare Analysis of the 1,000-Yen Expressway Discount 87
  5.1 Introduction 87
  5.2 Economic Welfare Analysis Using Average Costs 90
  5.3 Generalized Equilibrium Demand for the Tomei Expressway and Social Cost 91
    5.3.1 Changes Observed in the Tomei Expressway 91
    5.3.2 Generalized Cost and Benefits for the Tomei Expressway due to the 1,000-Yen Expressway Discount 93
    5.3.3 Average Social Cost and the Cost of the 1,000-Yen Expressway Discount for the Tomei Expressway 95
## Contents

7 Economic Impacts of the GHG Tax on the Japanese Economy: Short-Term Analysis .................................................. 145
  7.1 Introduction .......................................................... 145
  7.2 The Energy-Related Taxation System in Japan and Key Points of the Proposed Carbon Tax ................................. 147
    7.2.1 Energy-Related Taxation and the Discussion at the Tokyo Tax Commission .............................................. 147
    7.2.2 Key Issues in Carbon Taxation (the Global Warming Countermeasure Tax) .............................................. 150
  7.3 The Input-Output Model ............................................. 151
    7.3.1 Input-Output Analysis .......................................... 151
    7.3.2 Model ............................................................ 153
  7.4 A Simulation Scenario and the Results of the IO Analysis ................................................................. 154
    7.4.1 The Taxation Scenario .......................................... 154
    7.4.2 Results ........................................................... 156
    7.4.3 The Effects of National and Local Taxes .................. 158
    7.4.4 The Effects of Carbon Taxation by Fuel Type .............. 159
  7.5 The Effects on Households ......................................... 161
    7.5.1 A Framework of the Impacts on the Household .......... 161
    7.5.2 The Impacts of the Carbon Tax on Household Expenditures with Different Levels of Income ......................... 162
    7.5.3 The Impacts of the Carbon Tax on Household Expenditures in Different Regions ........................................... 164
  7.6 Conclusion ............................................................ 166

Appendix 7.1 .............................................................. 166

References ........................................................................ 173

8 The Impact on the Japanese Economy of Reducing Greenhouse Gas Emissions: The Role of Economic Models ............ 175
  8.1 Introduction ............................................................ 175
  8.2 Economic Model Assessment of the Effects of GHG Emission Reductions on the Economy .............................................. 176
    8.2.1 The Benefits of GHG Emission Reductions .................. 176
    8.2.2 Economic Models for Evaluating the Economic Effects of GHG Emission Reduction Policies ......................... 177
    8.2.3 Economic Effect Assessment: Policy Comparisons ........ 178
    8.2.4 Factors Affecting the Magnitude of Economic Impacts ................................................................................. 179
    8.2.5 Comparisons of the Models ........................................ 179
    8.2.6 The Importance of Effective Communication .......... 180
  8.3 Does Environmental Regulation Have Any Positive Effect on the Economy? ....................................................... 181
    8.3.1 Possible Positive Effects on the Economy: Double Dividends ......................................................... 182
    8.3.2 Possible Positive Effects of Regulation: The Porter Hypothesis ......................................................... 183
