PREFACE TO THE STUDENT xiii
PREFACE TO THE INSTRUCTOR xv

### PART ONE

#### 1 Introduction to Labor Economics 1

1.1 Tipping Busboys 2
1.2 Labor Economics 5
   - Key Principles 5
1.3 Economic Detection 7
   - Arguments and Explanations 7
   - Standards for Evaluating Hypotheses 7
   - Scientific Method 8
1.4 Data 10
   - Current Population Survey (CPS) 10
   - Current Employment Survey (CES) and Other Datasets 11
   - Occupation Averages in the CPS 11
1.5 Empirical Methods 14
   - Regression 14
   - Causation and Instrumental Variables 16
   - Before-and-After Comparison with and without a Control Group 17
   - Confidence with Caution 19
1.6 For Your Toolbox 19
   - Lines 19
   - Slopes, Marginal Changes, and Elasticities 20
   - Logarithms 21
   - Random Variables and Distributions 22
   - Adjusting for Inflation 22
# Labor Markets 29

2.1 Competitive Labor Market 30
- Demand for Nurses 31
- Supply of Nurses 32
- Equilibrium in the Market for Nurses 33
- Shifting the Equilibrium 36

2.2 Government Controls 40
- Minimum Wage 40
- Employment Taxes 48

2.3 Multiple Competitive Labor Markets 52
- Multi-Market Equilibrium and Migration 52
- Minimum Wage with Partial Coverage 54

2.4 Monopsony 57
- Monopsony Model 57
- Application: Baseball's Reserve System 61

# Labor Supply 72

3.1 Motivating Evidence 73
- Participation and Employment Rates 73
- Weekly Hours of Work 76

3.2 Hours of Work 78
- Opportunities 78
- Preferences 80
- Consumption–Leisure Choice 85
- Changing Nonlabor Income 87
- Changing the Wage Rate 88
- Labor Supply Curve 91

3.3 Applications 92
- Taxing Labor Income 93
- Incredible Shrinking Workweek 94
- Retirement 96

3.4 Whether to Work 98
- Reservation Wage 99
4 Labor Demand 117

4.1 Short-Run Labor Demand 118
   Production Function and the Total-Product Curve 118
   Average and Marginal Products of Labor 120
   Profit 122
   Profit-Maximizing Choice of Employment 123
   Short-Run Labor Demand Curve 126
   Factors that Shift Labor Demand in the Short Run 127
   Payroll Tax and Short-Run Labor Demand 128

4.2 Long-Run Labor Demand 129
   Production Function and Isoquant Curves 129
   Cost Function and Isocost Lines 131
   Cost-Minimizing Mix of Labor and Capital 132
   Application: Cross-Country Differences in Capital Intensity 134
   Profit-Maximizing Choice of Labor and Capital 136
   Long-Run Labor Demand Curve 138
   Factors that Shift Labor Demand in the Long Run 139
   Application: Short-Run v. Long-Run Effects of the Minimum Wage 141

4.3 Market Labor Demand 141
   Application: Demand for Palestinian Labor in Israel 142
   Equilibrium Price Effects and Marshall's Rules 143

PART TWO

5 Job Attributes 154

5.1 Market for Work on Dirty Jobs 155
   Supply of Labor to Dirty Jobs 156
7 Training, Turnover, and Migration 220

7.1 General Training 222
   On-the-Job Training as an Investment 222
   Productivity and Wage Profiles 223
   Who Pays for General Training? 226
   Wages and Work Experience 228
   Labor Supply over the Life Cycle 230

7.2 Applications 232
   Military Training of Commercial Pilots 232
   MBAs 233
   Baseball's Reserve System 235

7.3 Specific Training 236
   Who Pays for Specific Training? 237
   Specific Training and Turnover 239

7.4 Matching Models of Turnover 240
   Searching on the Job 241
   Learning the Value of the Match 244

7.5 Migration 245
   Migration as an Investment in Human Capital 245
   Application: Indentured Servitude 247
   Selection on Skill 250
   Effects of Immigration in the Short Run and Long Run 251
   Application: Mariel Boatlift 252

8 Discrimination 262

8.1 Measuring Wage Gaps 263
   Wage Gaps by Sex, Race, and Ethnicity 263
   Standardized Comparison 266
   Accounting for Changes in Wage Gaps 272
   Wage Gaps by Sex Across Countries 275
   Wages and the Sex and Race Compositions of Occupations 276
CONTENTS

8.2 Identifying the Effects of Discrimination 278
   Omitted Skill Variables 278
   Control Group of Nondiscriminators 279
   Test Scores and the Long Shadow of Discrimination in Childhood 281
   Discrimination in Hiring: Audit Studies and Blind Auditions 282

8.3 Modeling Discrimination 283
   Employer Discrimination 283
   Employee Discrimination 289
   Customer Discrimination 290
   Monopsony Discrimination 291
   Statistical Discrimination 292

8.4 Can Discrimination Survive in the Long Run? 295
   Paying a Price to Discriminate 295
   Institutionalized Discrimination 297

8.5 U.S. Anti-Discrimination Policy 298

9.1 Historical Context 311
   Union Membership 311
   Union Wage Premium 317

9.2 Models of Unions 321
   Union Bargaining with a Monopsony Employer 321
   Monopoly Union 323
   Efficient-Contracting Union 328

9.3 Applications 331
   Comparing Union Models 331
   Recipe for a Successful Monopoly Union 335
   Effects of Unions on Nonunion Wages 340
10 Wage Distribution 350

10.1 Measuring the Distribution of Wages 351
   Dispersion 352
   Asymmetry 357
   Application: Wage Inequality Across Occupations 359

10.2 Economic Models of Wage Inequality 361
   Ability 361
   Schooling 362
   Job Assignment in Hierarchies 363
   Superstars 366

10.3 Application: Widening Distribution of Wages 368
   Increasing Return to Skills 370
   Skill-Biased Innovations and the Baby Boomers 371
   International Trade and Immigration 372
   Institutions 373

PART THREE

11 Compensation Strategies 382

11.1 Introduction to Compensation 383
   Production Environment 383
   Efficient Effort 384
   Self-Employment 385
   Profit Sharing and Shirking 385

11.2 Performance Pay 388
   Personal Performance 388
   Relative Performance 393
   Application: Self-Employment and Entrepreneurship 396

11.3 Efficiency Wage and the Threat of Dismissal 396
   Efficiency Wage 397
   Threat of Dismissal 400
   Application: Mandatory Retirement 403
11.4 Compensation of Chief Executive Officers 405
Level of CEO Pay 406
Sensitivity of CEO Pay to Firm Performance 410
Application: Personal Use of the Corporate Jet 413

12. Unemployment 423

12.1 Disequilibrium Unemployment 426
Minimum Wage and Efficiency Wage 426

12.2 Steady-State Unemployment 427
Flows Between Labor-Market States 428
Distribution of Lengths of Spells of Unemployment 431

12.3 Job Search 436
Reservation Wage 437
Career Jobs, Low Interest Rates, and Being Well-Connected 439

12.4 Applications 441
Unemployment Insurance 441
European Unemployment 445

12.5 Unemployment in the Macroeconomy 449
Inflation and Unemployment 449
Phillips Curves in a Model of Aggregate Fluctuations 450

ANSWERS TO THE PRACTICE QUESTIONS 463
GLOSSARY 475
INDEX 487
