Complexity and Creative Capacity
Rethinking knowledge transfer, adaptive management and wicked environmental problems

Kelly Chapman
# Contents

*Acknowledgments* xi

1 *Introduction: the relationship between knowledge and adaptive capacity* 1

Introduction 1
Resilience and adaptive management 2
Knowledge transfer 4
Social science perspective 5
Problem formulation and philosophy 7
A new way forward: complexity thinking 9
Organisation of the book 11
Notes 14
References 14

2 *Unearthing assumptions: the co-evolution of Western science and philosophy* 20

Surfacing our assumptions 20
Ancient era and Middle Ages 21
Scientific revolution 26
Romantic and Industrial eras 30
Machine age 34
Post-war era 47
Conclusion 53

Acknowledgments

This book would not have been possible without the support of many people who contributed ideas, support, and encouragement. First and foremost, many thanks to the people who took time out of their busy schedules to meet with me and provide their valuable input for the study that inspired this book, who are too many to list. Thank you to Commonwealth Scientific and Industrial Research Organisation (CSIRO) and Edith Cowan University for their financial contributions to the study, and to the Western Australia Department of Parks and Wildlife, the Ningaloo Turtle Program, and the Gascoyne Development Commission for providing in-kind support. Special thanks to all those who opened up their homes and offered me places to stay while I conducted my research, notably Milton Landon, Lyn Irvine, Susie Bedford, Paul Richardson, Peter Dellar, Kylie West, Colleen Sims, Karen Hattingh and Mike Ross. I also extend my appreciation to the many people who gave me encouragement, moral support and friendship along the way, among them my dissertation supervisors Pierre Horwitz, Pascal Scherrer and Geoff Syme; my study collaborators Tod Jones, Beth Fulton, Karen Thompson and Fabio Boschetti; Scott Gardner and Annabel Mazzella, for your ongoing support and ideas; my partner in kiting, Tania Knight; my wonderful climbing friends in Perth; my ‘re-discovered’ family and friends at the Lake; and my long-neglected Canadian friends and family—thanks for sticking with me through this process. Thanks also to Tina Holgate and Teresa Chapman for the onerous task of reviewing and editing the document. And finally eternal gratitude to Norma Foran, Bruce Chapman, Teresa Chapman, and Maggie Wheeler—I couldn’t have done it without your loving support; and to Chris and Patricia for illuminating the path.
