## Contents

List of Figures  xiii  
List of Tables  xvii  
List of Online Material  xix  
Preface  xxiii  

1 Energy Economics and Policy  1  
What Is Energy?  1  
Energy and Economics  2  
Energy and the Environment  3  
    Air Pollution  4  
Energy and Policy  5  
Measuring Energy  7  
    The Problem Is the Size of the Problem  8  
Forecasting Energy Demand  14  
    Short Cut for Projecting Energy Demand  17  
A Model to Project Total Energy Demand  26  
Problems and Projects  27  
Notes  29  

2 Electricity and Utility Industry  32  
Electricity Is Derived Energy  33  
    System Operation  34  
Methods of Rate Regulation  37  
    Operating Models in an Era of Deregulation/Liberalization  42  
    Smart Meters/Smart Grids  49  
Utility Pools  51  
It Takes Energy to Make Energy  54  
Projects and Problems  57  
Notes  70  

3 Biomass  72  
Yesterday's Fuel  72  
Today's Fuel  73  

Shoes Begin to Fall 185
Birth of OPEC 187

1973 Oil Crisis 189
  First Occasion for High Oil Prices 194
  Era of Moderate Oil Prices 200
  Second Occasion for High Oil Prices 201

Geopolitical Risks 214
  Oil and Diplomacy 217
  Oil and Environmentalists 218

Role of Oil Companies after the Oil Crisis 220
  A Changing World 222
  Future Role of Oil Companies 224

Projects and Problems 226
Notes 232

6 Oil

Oil Reserves 235
  Is Hubbert's Peak Oil Dead? 238
Oil Consumption and Production 244
  Oil Trade Patterns 247
  Changing Nature of US Oil Imports and Middle East Exports 251

Oil Shale—Game Changer 253

Synthetic Crude 257
  Bitumen 258
  Shale Oil 265

Challenge of Oil: The Automobile 266
  Automobile Population 268
  Fuel Savings with Piggybacking 278
  Internalizing an Externality 279

Problems and Project 281
Notes 297

7 Natural Gas

Background 302
  Road to Deregulation 304
  European Road to Liberalization 309

From Source to Consumer 311
  Natural Gas as a Fuel 314
  Natural Gas in the US 316
  Natural Gas in Europe 318
  Facing the Geopolitical Risk of Natural Gas 319
  Natural Gas in Asia 324
  Natural Gas in the Rest of the World 325

Transforming Natural Gas to Electricity 326
