Econometric Analyses of International Housing Markets

Rita Yi Man Li and Kwong Wing Chau
Contents

1 Introduction 1
RITA YI MAN LI AND KWONG WING CHAU

2 Applied econometric models in international housing markets: theories and applications 8
RITA YI MAN LI, KWONG WING CHAU, TAT HO LEUNG AND LI MENG

2.1 Introduction 8
2.2 Hodrick–Prescott (HP) filter 8
2.3 Vector Error Correction model (VECM) and impulse response 12
2.4 The application of the Hedonic Pricing model on housing market analyses 19
2.5 Cobb–Douglas function for input–output analysis 21
2.6 State Space models 25
2.7 The dichotomous Probit model 30
2.8 Conclusion 33
2.9 References 33

3 Risk averse real estate entrepreneurs in mainland China: a Probit model approach 39
RITA YI MAN LI AND KWONG WING CHAU

3.1 Introduction 39
3.2 Four hypotheses 39
3.3 Literature review 42
3.4 Research method 47
3.5 Data analysis 47
3.6 Research results and analysis 48
3.7 Conclusion 51
3.8 References 52

4 Forecasting real estate stock prices in Hong Kong: a State Space model approach
RITA YI MAN LI, YIKUN HUANG AND KWONG WING CHAU

4.1 Introduction 57
4.2 Hong Kong stock market and real estate stocks 59
4.3 A literature review on stock price forecast method 60
4.4 Research method 61
4.5 Data description 63
4.6 Empirical study with the State Space model and results of the research 65
4.7 The State Space model forecasts better for large scale companies than small companies. Why? 68
4.8 Conclusion 70
4.9 References 70

5 Market sentiment and property prices in Hong Kong: a heteroscedasticity-and-autocorrelation-consistent approach
RITA YI MAN LI AND JOE FUK KIN WONG

5.1 Introduction 80
5.2 News, market sentiment and commodity prices 81
5.3 The impact of market sentiment on real estate markets 81
5.4 Robert Shiller and Eugene Fama's theory: can the trend of asset price be predicted? 82
5.5 Mixed research method: a combination of qualitative and quantitative data analyses 85
5.6 Heteroscedasticity-and-autocorrelation-consistent and ordinary least square regression models 87
5.7 Research results 88
5.8 Conclusion 88
5.9 References 89

6 Superstition and Hong Kong housing prices: a Hedonic Pricing approach
RITA YI MAN LI, KWONG WING CHAU, CHUI YEE LAW AND TAT HO LEUNG

6.1 Housing prices, transportation and superstition 92
6.2 Data collection 94
6.3 Hedonic Pricing model 95
6.4 Research results of Hedonic Pricing models 96
6.5 Limitation of the research study 98
6.6 Conclusion 98
6.7 References 99
7 Negative environmental externalities and housing price: a Hedonic model approach
RITA YI MAN LI, KWONG WING CHAU, MING HONG LI, TAT HO LEUNG AND KA WAI KWOK

7.1 Introduction 101
7.2 Research method 103
7.3 Data description 105
7.4 The research results of four econometric models 108
7.5 Discussion and conclusion 110
7.6 References 114

8 The impact of the subprime financial crisis on the German and Norwegian real estate markets: L1, the Chow test and the Quantile regression approach
RITA YI MAN LI AND JOE FUK KIN WONG

8.1 Historical background of the subprime financial crisis 116
8.2 The impact of the financial crisis on the housing market 119
8.3 The impact of the subprime financial crisis on the housing market: a global perspective 120
8.4 Data 122
8.5 Research method 122
8.6 Results 126
8.7 Conclusion 129
8.8 References 129

9 Housing prices and external shocks' impact on South Africa and the Czech Republic's housing prices: a Vector Error Correction model and impulse response functions approach
RITA YI MAN LI, JOE CHO YIU NG, KWONG WING CHAU AND TAT HO LEUNG

9.1 Introduction 131
9.2 A general overview of the Czech Republic's housing market 132
9.3 A general overview of the housing market in South Africa 133
9.4 The relationship between the global financial environment and the housing market 133
9.5 Data description 134
9.6 Research method and results 136
9.7 Discussion of the results 143
9.8 Conclusion 144
9.9 References 144

10 Factors which drive the ups and downs of housing prices in Canada: a Cobb–Douglas approach

RITA YI MAN LI, KWONG WING CHAU AND LING SANCHI LI

10.1 Introduction 147
10.2 Literature review 147
10.3 Background information about Canada 149
10.4 Residential mortgage market in Canada 152
10.5 Research method and results 158
10.6 Conclusion 159
10.7 References 160

11 An econometric analysis on REITs cycles in Hong Kong, Japan, the US and the UK

RITA YI MAN LI AND KWONG WING CHAU

11.1 Introduction 163
11.2 Factors which drive the REITs prices 164
11.3 REITs and property stocks 166
11.4 Diversification function of REITs 166
11.5 Business cycle 167
11.6 Direct real estate cycle analyses 168
11.7 REITs cycles 168
11.8 The real estate market in Hong Kong, Japan, the UK and the US and data included for this study 169
11.8 Research methods and results 170
11.9 Discussion and conclusion 173
11.10 References 174

12 Conclusion: should mainstream economists neglect and undermine real estate economics? The ‘Wh’ questions in the international housing markets, macroeconomy and econometric models context

RITA YI MAN LI AND KWONG WING CHAU

12.1 References 183
