### Part I

**Introductory Materials**

1. **Introduction**
   - 1.1 The Focus of the Book  
   - **BOX 1.1 Different Types of Financial Institutions**  
   - 1.2 Liquidity Creation Theories  
   - 1.3 Understanding Financial Statements  
   - 1.4 Measurement of Bank Liquidity Creation  
   - **BOX 1.2 Brief Summary of the Three-Step Approach to Measure “Cat Fat” Liquidity Creation**  
   - 1.5 Using Liquidity Creation to Measure Bank Output  
   - 1.6 Using Liquidity Creation to Measure Bank Liquidity  
   - 1.7 Defining and Dating Financial Crises  
   - 1.8 How Much Liquidity do Banks Create during Normal Times and Financial Crises?  
   - 1.9 The Links Between Bank Liquidity Creation and Future Financial Crises  
   - 1.10 Do Better Capitalized Banks Create More or Less Liquidity?  
   - 1.11 Which Banks Create the Most and Least Liquidity?  
   - 1.12 How do Government Policies and Actions Affect Bank Liquidity Creation During Normal Times and Financial Crises?  
   - 1.13 Bank Liquidity Creation: Value, Performance, and Persistence  
   - 1.14 How can Bank Executives, Financial Analysts, Researchers (including Academics and Students), and Policy Makers (including Legislators, Regulators, and Central Bankers) Use Bank Liquidity Creation Data to their Advantages?  
   - 1.15 Where We Stand Now and the Open Research and Policy Questions
2. Liquidity Creation Theories

2.1 Liquidity Creation On the Balance Sheet

2.2 Liquidity Creation Off the Balance Sheet

2.3 Liquidity Created by other Types of Financial Institutions and Markets

2.4 Summary

3. Understanding Financial Statements

3.1 Financial Statements of a Large Nonfinancial Firm versus a Large Commercial Bank

TABLE 3.1 Examples Comparing a Large Nonfinancial Firm, a Large Commercial Bank, and a Small Commercial Bank

3.2 Financial Statements of a Large Commercial Bank versus a Small Commercial Bank

3.3 Summary

Part II
Liquidity Creation Measurement and Uses

4. Measurement of Bank Liquidity Creation

4.1 Preferred “Cat Fat” Measure of Liquidity Creation

TABLE 4.1 Constructing Berger and Bouwman’s (2009) Preferred “Cat Fat” Liquidity Creation Measure

4.1.1 Step 1 – Classifying Activities as Liquid, Semiliquid, or Illiquid

4.1.2 Step 2 – Assigning Weights to the Activities Classified in Step 1

BOX 4.1 Step 1 Classifications of Activities on the Asset Side, Liability Side, and Off the Balance Sheet

BOX 4.2 Numerical Examples to Illustrate the Step 2 Weights

4.1.3 Step 3 – Constructing the “Cat Fat” Liquidity Creation Measure by Combining Activities as Classified in Step 1 and as Weighted in Step 2

BOX 4.3 Why Use Three Liquidity Classes and Three Weights?

4.2 Other Main Measures of Liquidity Creation

BOX 4.4 “Cat fat” and Other Acronyms Explained
TABLE 4.2 Constructing Berger and Bouwman’s (2009) Three Alternative Main Liquidity Creation Measures
4.3 Deep and Schaefer’s (2004) Liquidity Transformation Measure
4.4 Modification of the “Cat Fat” Measure that Takes
   Into Account Takedown Probabilities of Off-Balance
   Sheet Guarantees
4.5 Modification of the “Cat Fat” Measure that Takes
   Into Account Securitization Frequencies
4.6 Summary

5. Using Liquidity Creation to Measure Bank Output
   5.1 Traditional Approaches to Measuring Bank Output
      and What is Missing
      BOX 5.1 Examples of Literature and Policies That Use Assets
      to Measure Bank Output or Size
      BOX 5.2 Examples of Literature That Use Lending
      to Measure Bank Output
   5.2 Why “Cat Fat” Bank Liquidity Creation is a Superior Measure
      of Bank Output
   5.3 Summary
      BOX 5.3 Numerical Example to Show Why “Cat Fat” Liquidity
      Creation is a Superior Measure of Output

6. Using Liquidity Creation to Measure Bank Liquidity
   6.1 Simple Measures of Bank Liquidity
      BOX 6.1 Examples of Literature That Use Simple Ratios
      to Measure Bank Liquidity
   6.2 Using Normalized “Cat Fat” Liquidity Creation
      as a Direct Measure of Bank Illiquidity or an Indirect Measure
      of Bank Liquidity
   6.3 The Basel III Measures of Bank Liquidity
      BOX 6.2 Basel III Liquidity Requirements
      FIGURE 6.1 Correlations over time between normalized
      “cat fat” liquidity creation and the Basel III liquidity ratios
      FIGURE 6.2 Correlations over time between normalized
      on-balance sheet liquidity creation and the Basel III
      liquidity ratios
      FIGURE 6.3 Correlations over time between normalized
      off-balance sheet liquidity creation and the Basel III
      liquidity ratios
   6.4 The Liquidity Mismatch Index (LMI) of Bank Liquidity
   6.5 Market Measures of the Liquidity of Publicly Traded Equity
      and Debt of Listed Banks and Bank Holding Companies (BHCs)
      BOX 6.3 Market Measures of Liquidity
   6.6 Summary
Part III
Financial Crises, Liquidity Creation, and their Links

7. Defining and Dating Financial Crises

7.2 Reinhart and Rogoff's (2009) Analysis of Worldwide Financial Crises Over Nearly Eight Centuries

7.5 Berger and Bouwman's (2013) Financial Crises in the United States from 1984:Q1 to 2010:Q4

7.6 Financial Crises Used in the Empirical Analyses in this Book

8. How Much Liquidity Do Banks Create During Normal Times and Financial Crises?

8.1 Sample Description and Numbers of Banks over Time

8.2 "Cat Fat" Liquidity Creation and its Components over Time

8.3 Alternative Liquidity Creation Measures over Time

8.4 Alternative Measures of Output over Time

8.5 Summary
9. The Links Between Bank Liquidity Creation and Future Financial Crises

9.1 Theoretical Link between Aggregate Liquidity Creation and Future Financial Crises

9.2 Empirical Evidence on the Link between Aggregate Bank Liquidity Creation and Future Financial Crises

9.3 New Empirical Evidence on the Link between Aggregate Bank Liquidity Creation Normalized by GDP and Future Financial Crises

FIGURE 9.1 Aggregate US “cat fat” liquidity creation and its on- and off-balance sheet components normalized by GDP over time

9.4 Are Financial Crises Always Suboptimal?

9.5 Summary

Part IV
Causes and Consequences of Liquidity Creation

10. Do Better Capitalized Banks Create More or Less Liquidity?

10.1 Why Do We Care?

10.2 What Do the Theories Say?

10.3 Empirical Evidence on the Relation between Capital Ratios and Liquidity Creation

10.4 Summary

11. Which Banks Create the Most and Least Liquidity?

11.1 Top and Bottom Liquidity-Creating Banks in each Size Class

11.1.1 Large Banks’ Liquidity Creation in Dollar Terms

TABLE 11.1 Large Bank Top and Bottom Liquidity Creators (in $ Terms) in 1984:Q1 and 2014:Q4

11.1.2 Large Banks’ Normalized Liquidity Creation

TABLE 11.2 Large Bank Top and Bottom Normalized Liquidity Creators in 1984:Q1 and 2014:Q4

11.1.3 Medium Banks’ Liquidity Creation in Dollar Terms

11.1.4 Medium Banks’ Normalized Liquidity Creation

TABLE 11.3 Medium Bank Top and Bottom Liquidity Creators (in $ Terms) in 1984:Q1 and 2014:Q4

11.1.5 Small Banks’ Liquidity Creation in Dollar Terms

11.1.6 Small Banks’ Normalized Liquidity Creation

TABLE 11.5 Small Bank Top and Bottom Liquidity Creators (in $ Terms) in 1984:Q1 and 2014:Q4
TABLE 11.6 Small Bank Top and Bottom Normalized Liquidity Creators in 1984:Q1 and 2014:Q4 164
11.2 New Evidence on the Relations between Bank Liquidity Creation and Bank Characteristics 169
11.2.1 Large Banks’ Relations 169
TABLE 11.7 Large Bank Normalized Liquidity Creation – Bank Characteristics Summary Statistics and Correlations 170
TABLE 11.8 Medium Bank Normalized Liquidity Creation – Bank Characteristics Summary Statistics and Correlations 172
TABLE 11.9 Small Bank Normalized Liquidity Creation – Bank Characteristics Summary Statistics and Correlations 174
11.2.2 Medium Banks’ Relations 176
11.2.3 Small Banks’ Relations 177
11.3 Summary 177

12.1 The Effects of Capital Requirements on Liquidity Creation 179
12.1.1 Basel III Capital Requirements 180
BOX 12.1 Origins of the Basel Accords 181
BOX 12.2 Basel III Capital Requirements 182
12.1.2 The Dodd-Frank Act and Systemically Important Financial Institutions (SIFIs) 184
BOX 12.3 The Dodd-Frank Act 184
BOX 12.4 US Systemically Important Financial Institutions (SIFIs) as of 2015 185
12.2 Stress Tests in the United States and Europe 186
TABLE 12.1 European Union (EU) Institutions Subject to the European Banking Authority (EBA) 2014 Stress Tests 188
TABLE 12.2 Institutions Subject to the European Central Bank (ECB) Comprehensive Assessment in 2014 192
12.3 Liquidity Requirements 196
12.4 Regulatory Interventions, Capital Support or Bailouts, and Central Bank Funding 196
12.5 Monetary Policy 197
12.6 Summary 198

13.1 Literature on Bank Liquidity Creation and Bank Value 199
13.2 New Evidence on the Relations between Bank Liquidity Creation and Bank Performance 200
13.2.1 Large Banks’ Performance 200
TABLE 13.1 Large Bank Normalized Liquidity Creation – Bank Performance Summary Statistics and Correlations 201
TABLE 13.2 Medium Bank Normalized Liquidity Creation – Bank Performance Summary Statistics and Correlations 202
TABLE 13.3 Small Bank Normalized Liquidity Creation – Bank Performance Summary Statistics and Correlations 203
  13.2.2 Medium Banks’ Performance 204
  13.2.3 Small Banks’ Performance 204
13.3 Is There Liquidity Creation Persistence? 204
  13.3.1 Large Banks’ Liquidity Creation Persistence 205
FIGURE 13.1 Large banks: winning and losing persistence based on liquidity creation (in $ terms) 206
FIGURE 13.2 Large banks: winning and losing persistence based on normalized liquidity creation 207
FIGURE 13.3 Medium banks: winning and losing persistence based on liquidity creation (in $ terms) 208
FIGURE 13.4 Medium banks: winning and losing persistence based on normalized liquidity creation 209
FIGURE 13.5 Small banks: winning and losing persistence based on liquidity creation (in $ terms) 210
FIGURE 13.6 Small banks: winning and losing persistence based on normalized liquidity creation 211
  13.3.2 Medium Banks’ Liquidity Creation Persistence 212
  13.3.3 Small Banks’ Liquidity Creation Persistence 212
13.4 Summary 212

Part V
Looking Toward the Future

14. How Can Bank Executives, Financial Analysts, Researchers (including Academics and Students), and Policy Makers (including Legislators, Regulators, and Central Bankers) Use Bank Liquidity Creation Data to Their Advantages?
14.1 Liquidity Creation is a Novel Benchmarking Tool that Can be Used by Bank Executives and Financial Analysts to Evaluate a Bank’s Performance and Compare it to its Peer Group 215
  14.1.1 Benchmark a Bank’s Liquidity Creation against Those of its Peers 216
  14.1.2 Benchmark a Bank’s Liquidity Creation Against its Own Past Liquidity Creation 216
14.2 Aggregate Bank Liquidity Creation Can be Used by Researchers and Policy Makers to Predict Financial Crises 216
14.3 Liquidity Creation Can be Used by Researchers and Policy Makers to Assess Risk Taking and to Predict Failure of Individual Banks 217
14.4 Use of Liquidity Creation in Future Research and Policy Work 218
14.5 Summary 218

15. Where We Stand Now and the Open Research and Policy Questions

15.1 Where do We Stand Now? 219
15.2 Measuring Bank Liquidity Creation and its Causes and Consequences around the World 219
BOX 15.1 Non-US Countries in which Bank Liquidity Creation has been Measured 220
15.3 Effects of Bank Mergers and Acquisitions on Liquidity Creation 221
15.4 Effects of Bank Competition and Market Power on Liquidity Creation 222
15.5 Effects of Bank Deregulation on Liquidity Creation 223
15.6 Effects of Deposit Insurance on Liquidity Creation 223
15.7 Effects of Bank Corporate Governance – Ownership, Executive Compensation, and Board and Management Structure – on Liquidity Creation 224
15.7.1 Effects of Ownership on Liquidity Creation 224
15.7.2 Effects of Executive Compensation on Liquidity Creation 225
15.7.3 Effects of Board and Management Structure on Liquidity Creation 226
15.8 Liquidity Creation and Risk 226
15.9 Effects of Liquidity Creation on Real Economic Activity 226
15.10 Is There an Optimal Scale of Bank Liquidity Creation for the Industry and for Individual Banks? 227
15.11 Liquidity Creation Dynamics 228
15.12 Liquidity Creation by Banks in Different Financial and Legal Systems 229
15.13 Liquidity Created by other Types of Financial Institutions and Markets, and How They Interact with Bank Liquidity Creation 229
15.14 Summary 230

16. Links to Websites Containing Data, Documents, and Other Information Useful for US Bank Performance Benchmarking, Research, and Policy Work

16.1 Liquidity Creation Data 231
16.2 Commercial Bank Call Report Data 231
16.3 Commercial Bank Reporting Forms 232
16.4 Bank Holding Company (BHC) Data 233
16.5 Bank Holding Company Reporting Forms 234
16.6 Micro Data Reference Manual (MDRM) 235
