Contents

<i>Preface</i>	v
Chapter 1. Overestimated Trade Surplus	1
1.1 Rapid Development of the Sino-U.S. Bilateral Trade	2
1.2 Why Trade Deficit in U.S. Statistics is Higher than that in Chinese Statistics?	5
1.3 Co-existence of Surplus and Deficit	9
1.4 Repeated Calculation of Processing Trade in Customs Statistics	13
1.5 Theoretical Model of the Value-added Approach . .	17
1.6 Difference in Calculating China's Trade between the Customs Frontier Method and the Value-added Approach	22
1.7 Keeping Pace with the Times and Reforming the Foreign Trade Statistical Method	33
Chapter 2. On Trade Surplus from Property Rights	35
2.1 Distinguishing between Capital Flow and Logistics in the International Trade	36
2.2 Competitive and Non-competitive Input-Output Tables	40
2.3 Shares of the Domestic and Foreign Capitals in Non-labor Compensation in Processing Trade	42
2.4 Distinguishing Capital Flow by Country	46
2.5 Sino-American Trade Surplus	55

Chapter 3.	Interpreting the Economic Scale of China	59
3.1	Two Methods of Calculating the GDP	60
3.2	Limitations of Calculating the GDP using the Atlas Method	62
3.3	Advantages and Limitations of the PPP	67
3.4	Distorted Proportion of the Service Industry	70
3.5	Reasons for the Underestimation of the Service Industry	73
3.6	Estimate of the Proportion of the Service Industry in the GDP of China	78
3.7	Processing the Depth Coefficient Method for Estimating the GDP	91
3.8	Avoiding the Quality Difference	93
3.9	Value-Added in the Manufacturing Process	94
3.10	Virtual Output Value of Raw Materials	94
3.11	Processing Depth Coefficient	98
3.12	The Bottom Line and the Possible Range of the GDP of China	100
Chapter 4.	Foreign Trade Dependence and Trade Weighted Method	103
4.1	Debate Caused by Foreign Trade Imbalance	104
4.2	Four Errors Affecting China's Foreign Trade Statistics	107
4.3	Influence of Two GDP Statistical Methods on the FTD	109
4.4	Proportion of the Current Account in the GDP	113
4.5	International Comparison of Degree of Foreign Trade Imbalance	113
4.6	Adjusting the Current Account According to Property Rights	117
4.7	Adjusting the GDP according to the Proportion of the Service Industry	118

4.8	Double Correction of the Import and Export Data	120
4.9	International Comparison of China's FTD	125
Chapter 5. The Standard in Judging the Exchange Rate		131
5.1	Different Opinions on the Exchange Rate	132
5.2	Basis for Judging the Exchange Rate	133
5.3	Calculating the Equilibrium Exchange Rate According to Money Market and Import and Export Market Equilibrium	136
5.4	Calculating the Equilibrium Exchange Rate According to Trade Equilibrium	138
5.5	No Nash Equilibrium in the Foreign Exchange Market	140
5.6	Different Conclusions based on Different Methods	142
5.7	Market: The Touchstone for Judging Distortion of Exchange Rate	144
Chapter 6. Stabilizing the Currency and Manipulating the Exchange Rate		147
6.1	Who Determines the Exchange Rate?	148
6.2	Selection of the Exchange Rate System	150
6.3	The Central Bank's Duty is to Stabilize the Value of Currency	153
6.4	What is a Currency Manipulator?	159
6.5	The RMB is in the Appreciation Channel	165
6.6	Internal Contradiction between Price Stability and Exchange Rate	167
6.7	Excessive Liquidity and the Money Lake	174
Chapter 7. Origin and Development of the High Savings Rate		185
7.1	China's High Savings Rate Causes Problems	186
7.2	China's High Savings Rate	188
7.3	Savings and Economic Growth Stage	190

7.4	Three Parts of Total Savings: Household, Enterprise, and Government Savings	193
7.5	Why is the Enterprise Savings Rate Remarkably High?	197
7.6	Why is the Government Savings Rate Remarkably High?	199
7.7	Causes of the High Household Savings Rate	207
7.8	Is the Savings Rate Attributable to the High Housing Price?	219
7.9	The First-generation Effect of Savings	224
7.10	Empirical Study of the Savings Rate	229
7.11	Never be Misled by Others to Exceed the Proper Limits in Correcting a Mistake	240
Chapter 8. Computable General Equilibrium Model for Exchange Rate Research		243
8.1	Compromise and Quantification	244
8.2	Five Stages of the Mathematical Model	246
8.3	Partial Equilibrium and General Equilibrium	248
8.4	CGE Model Structure	250
8.5	Avoiding the Double Account in Calculating Processing Trade	256
8.6	The Database Reflecting the Valued-added Distribution in the Global Production Chain	259
8.7	Use of the CGE Model to Study the Exchange Rate Adjustment	260
Chapter 9. Effect of the Exchange Rate on Employment		263
9.1	High Unemployment Rate: A Difficult Problem for the U.S.	264
9.2	The Obama Government's Countermeasures to Increase Employment Opportunities	266
9.3	Shifting the Target to Frame China	272
9.4	Main Reasons for the High Unemployment Rate in the U.S.	277

9.5	Analysis of the Relationship between Exchange Rate and Employment from the Perspective of System Engineering	279
9.6	Unemployment and the Industrial Transfer	285
9.7	Different Effects on Different Industries	290
9.8	Effect of the Exchange Rate Adjustment on the Unemployment Rate of Different Industries	292
9.9	Effect of the Exchange Rate Adjustment on Employment in Processing Trade and General Trade	294
9.10	Effect of the Exchange Rate Adjustment on the Employment of Industrial Departments with Different Science and Technology Contents	298
9.11	Will the RMB Appreciation Reduce the U.S. Unemployment Rate?	299
Chapter 10. The Impact of the Exchange Rate Adjustment on Import and Export		305
10.1	The RMB Exchange Rate and the U.S. Trade Deficit	306
10.2	Effect of the RMB Appreciation on the Import and Export Volumes of Different Economies	309
10.3	Effect of the RMB Appreciation on General Trade and Processing Trade	315
10.4	Effect of the RMB Appreciation on the Manufacturing Industries of Different Science and Technology Contents	321
10.5	Three Groups of Competitors	328
10.6	Ways to Narrow the U.S. Trade Deficit	342
10.7	Is the International Trade Really Distorted?	344
Chapter 11. Range and Path of the RMB Appreciation		349
11.1	Path Choice for the RMB Appreciation	350

11.2	Dynamic Simulation of the Effect of Different Exchange Rate Appreciation Ranges on China's Labor Market	351
11.3	Dynamic Simulation of the Effect of Different Ranges of Appreciation on China's Imports and Exports	355
11.4	Dynamic Simulation of the Effect of Different Ranges of Appreciation on China's Domestic Production	356
Chapter 12. Economic Sanctions and Free Trade		361
12.1	Origin and Evolution of the Trade War	363
12.2	Means to Impose Economic Sanctions	377
12.3	Probability of Success of Economic Sanctions	379
12.4	Six Commandments of Trade War	382
12.5	Cost of a Trade War	394
12.6	Different Logics on Dealing with a Trade War	396
12.7	CGE Model Simulating a Trade War	399
12.8	Scenarios of a Trade War	401
12.9	Impact of a Trade War on Global Trade	402
12.10	Impact of a Trade War on GDP and Employment	410
12.11	A Trade War is Not Good for Anyone	413
12.12	Possibility of a Trade War between the U.S. and China	417
12.13	China-U.S. Free Trade Agreement	423
Chapter 13. The Debate is Far From Over		429
13.1	Focus of Dispute on the RMB Exchange Rate	429
13.2	Fictitious Foreign Trade Imbalance	430
13.3	Stabilizing the Currency and Manipulating the Exchange Rate	434
13.4	Origin, Advantages, and Disadvantages of High Savings Rate	436

13.5	Impact of RMB Appreciation on Employment and Foreign Trade	438
13.6	A Win–Win Free Trade Agreement is Better than a Lose–Lose Trade War	442
