Contents

Preface ........................................................................................................................................... ix
Editors ........................................................................................................................................ xi
Contributors ................................................................................................................................. xiii

Chapter 1  Introduction ................................................................................................................... 1
Yeñ Feng, Jean-François Audy, Mustapha Ouhimmou, and Sophie D’Amours

SECTION I  Forest Biorefinery Transformation and Strategic Planning

Chapter 2  Framework for Value Chain Optimization of Forest Networks in the Emerging Canadian Bioeconomy ................................................................. 9
Marc-André Carle, Sophie D’Amours, Eldon A. Gunn, and Reino Pulkki

Chapter 3  Strategic Transformation of the Forest Industry Value Chain ........... 33
Cédric Diffo Teguia, Virginie Chambost, Shabnam Sanaei, Sophie D’Amours, and Paul Stuart

Chapter 4  The Roles of FPInnovations, Governments, and Industry in Transforming Canada’s Forest Industry ................................................................. 75
Jean Favreau and Catalin Ristea

Chapter 5  Decision Support Needs for Strategic Planning of Canadian Forest Value Chains ................................................................. 95
Eldon A. Gunn and David L. Martell

SECTION II  Forest Value Chain Sustainability, Market Research, Collaboration, and Agility

Chapter 6  The Meaning and Means of Environmental Sustainability for the Forest Sector: Drivers and Responses in a More Responsible World ......................................................... 131
Justin G. Bull and Robert A. Kozak
Chapter 7  Overview of Wood Product Markets, Distribution, and Market Research in North America: Implications for Value Chain Optimization ................................................................. 161

*Christopher Gaston and François Robichaud*

Chapter 8  Framework for Information and Knowledge Sharing in Collaborative Modeling of the Forest Products Value Chain: A Survey and Road Map ..................................................... 183

*Riad Azouzi and Sophie D’Amours*

Chapter 9  Introduction to Agility in the Forest Product Value Chain ............. 207

*Jean-Marc Frayret and Nathalie Perrier*

SECTION III  Forest Value Chain Tactical Planning and Wood Flows

Chapter 10  Tactical Planning and Decision Support Systems in the Forest-Based Value Creation Network ................................................................. 239

*Jean-François Audy, Azadeh Mobtaker, Mustapha Ouhimmou, Alexandra Marques, and Mikael Rönnqvist*

Chapter 11  Key Aspects of Forest Woody Biomass Flows within the Canadian Forest Value Chain ................................................................. 283

*Luc LeBel, Reino Pulkki, Riadh Azouzi, and Denis Cormier*

Chapter 12  Overview of Wood Transportation and Operations Research Methods in This Area ................................................................. 311

*Bernard Gendron, Reino Pulkki, Marius Posta, and Jean Favreau*

Index .................................................................................................................. 337
