PREFACE

Risk management and operations research: a review and introduction to the special volume
D. Wu 1

ORIGINAL PAPERS

Multiple agents finitely repeated inspection game with dismissals
Y. Deutsch • B. Golany 7

The strategic interaction between a company and the government surrounding disasters
K. Hausken • J. Zhuang 27

A stochastic semidefinite programming approach for bounds on option pricing under regime switching
R.H. Kwon • J.Y. Li 41

Multi-period risk minimization purchasing models for fashion products with interest rate, budget, and profit target considerations
T.-M. Choi 77

Smoothing and parametric rules for stochastic mean-CVaR optimal execution strategy
S. Moazeni • T.F. Coleman • Y. Li 99

Optimal allocation of a fixed production under price uncertainty
I. Rodríguez-Puerta • A.A. Álvarez-López 121

Separation results for multi-product inventory hedging problems
Y. Sun • J. Wissel • P.L. Jackson 143

A new rank dependent utility approach to model risk averse preferences in portfolio optimization
L. Javanmardi • Y. Lawryshyn 161

Optimal VaR-based risk management with reinsurance
J. Cong • K.S. Tan 177

Robust scenario-based value-at-risk optimization
O. Romanko • H. Mausser 203

Portfolio optimization with a copula-based extension of conditional value-at-risk
A. Kizmeńowski • S. Szymczyk 219

Sourcing decision under disruption risk with supply and demand uncertainty: A newsvendor approach
P. Ray • M. Jenamani 237
