   B. P. Sharma, ITS Engineering College Greater Noida, India
   M. D. Singh, Motilal Nehru National Institute of Technology Allahabad, India

Section 8
Emerging Trends

This section highlights research potential within the field of business intelligence while exploring uncharted areas of study for the advancement of the discipline. Introducing this section are chapters that set the stage for future research directions and topical suggestions for continued debate, centering on the new venues and forums for discussion. A pair of chapters on space-time makes up the middle of the section of the final 10 chapters, and the book concludes with a look ahead into the future of the business intelligence field. In all, this text will serve as a vital resource to practitioners and academics interested in the best practices and applications of the burgeoning field of business intelligence.

Chapter 103
The Data Machine: Identification in the Age of Data Mining ...................................................... 2068
   Nicholas A. Hanford, Rensselaer Polytechnic Institute, USA

Chapter 104
Pattern Based Feature Construction in Semantic Data Mining ...................................................... 2084
   Agnieszka Ławrynowicz, Poznan University of Technology, Poland
   Jędrzej Potoniec, Poznan University of Technology, Poland

Chapter 105
How Web 2.0 Shapes Patient Knowledge Sharing: The Case of Diabetes in Italy ....................... 2123
   Chiara Libreri, Università Cattolica del Sacro Cuore, Italy
   Guendalina Graffigna, Università Cattolica del Sacro Cuore, Italy
Chapter 106
Business Intelligence for Healthcare: A Prescription for Better Managing Costs and Medical Outcomes .......................................................... 2146
