PREFACE

Analytical and stochastic modelling techniques
K. Al-Begain · D. Fiems · J.-M. Vincent 355

ORIGINAL PAPERS

Discrete-time queues with variable service capacity: a basic model and its analysis
H. Bruneel · S. Wittevrongel · D. Claeys · J. Walraevens 359

Transient workload distribution in the $M/G/1$ finite-buffer queue with single and multiple vacations
W.M. Kempa 381

Multi-server queueing system with a generalized phase-type service time distribution as a model of call center with a call-back option
A. Dudin · C. Kim · O. Dudina · S. Dudin 401

Retrial queues with balanced call blending: analysis of single-server and multiserver model
T. Phung-Duc · W. Rogiest · Y. Takahashi · H. Bruneel 429

Decentralized optimization of last-mile delivery services with non-cooperative bounded rational customers
Y. Hayel · D. Quadri · T. Jiménez · L. Brotcorne 451

Worst-case analysis of non-cooperative load balancing
O. Brun · B. Prabhu 471

$M/D^{[\beta]}/1$ Periodically gated vacation model and its application to IEEE 802.16 network
Z. Saffer · S. Andreev · Y. Koucheryavy 497

Queueing analysis of the DRX power saving mechanism in fault-tolerant 3GPP LTE wireless networks
I. Dimitriou 521

Modeling and optimization of CSMA/CA in VANET
A.T. Giang · A. Busson · M.D. Renzo 553

Controlling variability in split–merge systems and its impact on performance
I. Tsimashenka · W.J. Knottenbelt · P.G. Harrison 569

Matching performance objectives for open and closed workloads by consolidation and replication
D. Cerotti · M. Gribaudo · P. Piazzolla · G. Serazzi 589

Application of stochastic programming to reduce uncertainty in quality-based supply planning of slaughterhouses
W.A. Rijpkema · E.M.T. Hendrix · R. Rossi · J.G.A.J. van der Vorst 613
Resource allocation with stochastic optimal control approach
H. Valian · M.A. Jafari · D. Golmohammadi 625

Heuristic representation optimization for efficient generation of PH-distributed random variates
G. Horváth · P. Reinecke · M. Telek · K. Wolter 643

Mean-field analysis of hybrid Markov population models with time-inhomogeneous rates
A. Stefanek · R.A. Hayden · J.T. Bradley 667

Lumping and reversed processes in cooperating automata
S. Balsamo · G.-L. Dei Rossi · A. Marin 695
