List of Tables xix
List of Abbreviations xx

Part I. The Political Economy of Climate Governance

1. Introduction: Confronting Climate Change 3
   1.1 The Nature of the Problem 3
   1.2 The Formation of Climate Policy around Emissions Markets 5
   1.3 The Evolution of Emissions Markets from Theory to Practice 11
   1.4 The Nature of Market-Based Governance and Authority 14
   1.5 The Structure of the Book 21

2. Climate Change Governance: Institutions, Values, and the Culture of Markets 25
   2.1 The Evolution and Social Constitution of Markets 26
   2.2 Markets as Institutions 30
   2.3 Market Communication and Collective Action 34
   2.4 Culture of Markets 40

3. Universal Norms versus Local Practice: Cross-National Comparison of Market Meaning-Making 46
   3.1 Market Governance at the Interface of Competing Logics 46
   3.2 Technocratic Norms and Political Context 49
   3.3 Comparisons between East and West 58
   3.4 Statistical Analysis of Regional and Occupational Difference 60
   3.5 The Role of Politics in Shaping Political Norms 65
   3.6 Market Perceptions: From General Claims to Specific Cases 67
Part II. Global Adaptations of Emissions Markets

4. Europe and the United States: Market Coordination through Contrasting Discourses of Security, Leadership, and Economic Opportunity  
  4.1 Market as Coordinator 71  
  4.2 Technocratic Governance in the United States and Europe 74  
  4.3 Security and Climate Change Policy in the United States and Europe 86  
  4.4 The Influence of Authority in Shaping Policy Outcomes 102

5. Australia and South Korea: Technocratic Governance at the Interface of Politics and International Aspiration 106  
  5.1 Start, Stop, Reverse: Governance and Climate Policy in Australia 109  
  5.2 Australia, Authority, and Technocratic Governance 117  
  5.3 Inexorably Forward: Governance and Climate Policy in South Korea 121  
  5.4 Technocratic Influence Absent Emotive Authority 132  
  5.5 Lessons from Australia and South Korea: Balancing Authority Bases and Building Resonance for Policy 136

6. Japan and China: Cultural Norms Mediated through Crisis and Environmental Context 140  
  6.1 Japanese Governance and Emissions Trading 143  
  6.2 Trial Emissions Trading Programs 147  
  6.3 Policy Aftermath of the Fukushima Crisis 156  
  6.4 China's Technocratic Governance 160  
  6.5 Climate Change and Pilot Trading Systems 166  
  6.6 Discussion: The Impact of Crisis 172

Part III. The Cultures of Markets

7. The Cultures of Markets: Interplay between Economic and Political Governance 179  
  7.1 Comparison of the Cases 179  
  7.2 Interpreting the Evolution of Emissions Markets 189  
  7.3 The Implications of Culture 196  
  7.4 Technocratic Norms Mediated through Culture 199  
  7.5 The Challenge of Technocratic Governance in Space and Time 203  
  7.6 Building Policy with Bridge Concepts 205
8. The Fate of Markets: Materiality and the Construction of Values 208
   8.1 The Issue of Materiality in Carbon Markets 208
   8.2 Carbon Market Financialization 211
   8.3 Mechanisms of Financialization in Carbon Markets 216
   8.4 A Spatial and Temporal View of Value 227
   8.5 Time-Space Compression in the Interview Data 233
   8.6 Material Value Embedded in Space and Time 235

9. Conclusion: The Path towards Environmental Finance and Sustainable Valuation 237
   9.1 Summary and the Path Forward 237
   9.2 The Inclusion of Alternative Values, Empowering Authority Bases 240
   9.3 Shaping Materiality at the Onset of Environmental Finance 245
   9.4 Improving Markets to Incorporate Use Value 250
   9.5 Markets at the Precipice of Sustainable Social Valuation 252
