Preface xviii
JAKOB GRANIT

PART I
Introduction: Why this book? 1

1 Background and overview of the book 3
IVAR VIRGIN AND E. JANE MORRIS

2 Benefits and challenges of a new knowledge-based bioeconomy 11
IVAR VIRGIN, MATTHEW FIELDING, MELINDA FONES SUNDELL,
HOLGER HOFF AND JAKOB GRANIT

3 The gene revolution: what can and can’t be done with modern biosciences? 26
E. JANE MORRIS

PART II
Towards sustainable food security 39

4 A European perspective: the case for a highly productive and innovative agriculture in Europe 41
HARALD VON WITZKE AND STEFFEN NOLEPPA
Contents  

13 The need for international bioscience collaboration and a shared agenda  
JOHN KOMEN AND JULIUS ECURU  
158

14 The social and economic challenges for a bioeconomy  
RICHARD D. SMART AND JUSTUS WESSELER  
172

15 Two decades of European-African bioscience collaboration: from BIO-EARN to Bio-Innovate  
IVAR VIRGIN AND ALLAN LIAVOGA  
191

PART V  
Transitions to a modern bioeconomy: analysis of policies  
207

16 European strategies and policies getting towards a bioeconomy  
DIRK CARREZ  
209

17 Getting towards an African bioeconomy  
JULIUS ECURU  
224

18 Intellectual property challenges for a bioeconomy  
ROSEMARY WOLSON  
234

19 Europe and Africa: how European policies influence bioscience adoption in Africa  
JOHN KOMEN  
247

PART VI  
Way forward: progressing towards European and African bioeconomies  
259

20 Conclusions and key messages  
IVAR VIRGIN AND E. JANE MORRIS  
261
