ANNALS of OPERATIONS RESEARCH

Editor-in-Chief: Endre Boros

OPTIMIZATION MODELS WITH ECONOMIC AND GAME THEORETIC APPLICATIONS

COMPLETE VOLUME
PREFACE

Optimization models with economic and game theoretic applications
S.K. Neogy · R.B. Bapat · A.K. Das · B. Pradhan 1

ORIGINAL PAPERS

Optimal iterative QP and QPQC algorithms
Z. Dostal · L. Pospíšil 5

On transition matrices of Markov chains corresponding to Hamiltonian cycles
K. Avrachenkov · A. Eshragh · J.A. Filar 19

Axiomatizations of symmetrically weighted solutions
J. Kleppe · H. Reijnierse · P. Sudhölter 37

On double cycling for container port productivity improvement
D. Ku · T.S. Arthanari 55

A game theoretical analysis of the impact of income inequality and ethnic diversity on fiscal corruption
R. Cerqueti · R. Coppier 71

A shrinking projection method for nonexpansive mappings with nonsummable errors in a Hadamard space
Y. Kimura 89

A model for equilibrium in some service-provider user-set interactions
N. Hemachandra · K.S.N. Rajesh · M.A. Qavi 95

Impact of risk aversion and belief heterogeneity on trading of defaultable claims
J. Kim · T. Leung 117

Belief distorted Nash equilibria: introduction of a new kind of equilibrium in dynamic games with distorted information
A. Wiszniewska-Matyszkiel 147

An Owen-type value for games with two-level communication structure
R. van den Brink · A. Khmelnitskaya · G. van der Laan 179

Loan origination decisions using a multinomial scorecard
L. Gao · K. Rajaratnam · P. Beling 199

Single asset optimal trading strategies with stochastic dominance constraints
R. Khemchandani · A. Bhardwaj · S. Chandra 211

More results on column sufficiency property in Euclidean Jordan algebras
J. Tao · I. Jeyaraman · G. Ravindran 229
On an extension of Fu-Markham matrix theory result to simple Euclidean Jordan algebras
B. Zhong · Y. Chen · J. Tao 245

On duality for mathematical programs with vanishing constraints
S.K. Mishra · V. Singh · V. Laha 249

Testing market efficiency on the Johannesburg Stock Exchange using the overlapping serial test
M.A. Noakes · K. Rajaratnam 273

Optimal decisions in a dual-channel supply chain under simultaneous demand and production cost disruptions
F. Soleimani · A. Arshadi Khamseh · B. Naderi 301

Optimal inventory model under stock and time dependent demand for time varying deterioration rate with shortages
K. Prasad · B. Mukherjee 323

Sufficient optimality conditions and duality theory for interval optimization problem
A.K. Bhurjee · G. Panda 335

A new approach for solving intuitionistic fuzzy transportation problem of type-2
S.K. Singh · S.P. Yadav 349

On a quadratic programming problem involving distances in trees
R.B. Bapat · S.K. Neogy 365

Properties of some matrix classes based on principal pivot transform
A.K. Das 375
