## Chapter 1  Overview of Health Care: A Population Perspective  1

- Problems of Health Care ............................................... 2
- Understanding Health Care ............................................. 3
  - Why Patients and Providers Behave the Way They Do .............. 3
  - Indexes of Health and Disease .................................... 3
  - Natural Histories of Disease and the Levels of Prevention .... 4
- Major Stakeholders in U.S. Healthcare Industry ...................... 9
  - The Public ..................................................................... 9
  - Employers .................................................................... 9
  - Providers .................................................................... 11
  - Hospitals and Other Healthcare Facilities ......................... 11
  - Governments .................................................................. 11
- Complementary and Alternative Therapists ................................ 11
- Health Insurers .................................................................. 12
- Long-Term Care Industry .................................................. 12
- Voluntary Facilities and Agencies ...................................... 12
- Health Professions Education and Training Institutions ........... 13
- Professional Associations ................................................ 13
- Other Health Industry Organizations ................................... 13
- Research Communities ...................................................... 13
- Rural Health Networks ...................................................... 14
- Priorities of Health Care ................................................ 15
- Tyranny of Technology ..................................................... 15
- Social Choices of Health Care ......................................... 16
- Aging Population .................................................................. 16
- Access to Health Care ...................................................... 17
- Quality of Care ................................................................... 18
- Conflicts of Interest ....................................................... 18
- Health Care's Ethical Dilemmas ......................................... 19
- Continuing Challenges ..................................................... 20

## Chapter 2  Benchmark Developments in U.S. Health Care  23

- The Great Depression and the Birth of Blue Cross .................... 24
- Dominant Influence of Government ....................................... 25
- Three Major Health Care Concerns ....................................... 26
- Efforts at Planning and Quality Control ................................ 27
- Managed Care Organizations ............................................... 28
- The Reagan Administration: Cost Containment and Prospective Hospital Reimbursement .................................................. 28
- Biomedical Advances: Evolution of High-Technology Medicine .... 29
  - Technical Advances Bring New Problems .............................. 29
- Roles of Medical Education and Specialization ........................ 30
- Influence of Interest Groups .............................................. 31
  - The American Medical Association ..................................... 31
  - Insurance Companies ..................................................... 31
  - Consumer Groups ......................................................... 32
  - Business and Labor ........................................................ 32
  - Pharmaceutical Industry .................................................. 32
  - Public Health Focus on Prevention .................................... 33
Chapter 3  Health Information Technology .......... 45

Chapter 4  Hospitals: Origin, Organization, and Performance .......... 71
Hospitalists .............................................. 95
Forces of Reform ....................................... 96
  The Affordable Care Act ........................ 96
  Population Focus ................................ 96
Market Consolidations: Hospital Mergers
  and Acquisitions ................................ 97
Accountable Care Organizations ................ 97
Reimbursement and Payment Revisions ... 98
Medicare Access & CHIP Reauthorization
  Act of 2015 ......................................... 102
Continuing Change .................................. 103

Chapter 5 Ambulatory Care ............ 109
Overview and Trends ......................... 109
Private Medical Office Practice .......... 111
Integrated Ambulatory Care Models ..... 114
  Patient-Centered Medical Homes .......... 115
  Accountable Care Organizations .......... 119
Other Ambulatory Care Practitioners .... 120
Ambulatory Care Services of Hospitals:
  History and Trends ............................. 120
Hospital Emergency Services ............ 122
Non-hospital-Based (Freestanding) Facilities ... 124
  Urgent Care Centers ........................... 124
  Retail Clinics .................................. 126
  Ambulatory Surgery Centers ............... 127
  Federally Qualified Health Centers ...... 128
  Public Health Ambulatory Services ...... 130
  Not-for-Profit Agency Ambulatory Services 132
Telehealth ........................................ 133
Continued Future Expansion and
  Experimentation ................................. 133

Chapter 6 Medical Education and the
  Changing Practice of Medicine ........ 141
Medical Education: Colonial America to the
  1800s ............................................. 141
Flexner Report and Medical School Reforms ... 143
Transition from Academic Medical Centers to
  Academic Health Centers .................... 144
Graduate Medical Education ............. 145
Delineation and Growth of Medical
  Specialties ..................................... 147
Deficient Training of Medical
  Specialists .................................... 148
Certification of Physicians with Board
  Examinations .................................. 149
Accreditation of Graduate Physician Training ... 150
Physician Workforce Supply and Distribution ... 151
Ratios of Generalist to Specialist Physicians
  and the Changing Demand .................. 152
Preventive Medicine ......................... 154
Changing Physician–Hospital Relationships ... 155
  Evidence-Based Clinical Practice
    Guidelines .................................... 156
Physician Report Cards and “Physician
  Compare” ....................................... 157
Health Information Technology and Physician
  Practice ........................................ 159
Escalating Costs of Malpractice Insurance .... 160
Ethical Issues .................................. 160
Physicians and the Internet .................. 161
Future Perspectives ......................... 162

Chapter 7 The Healthcare Workforce .... 169
Health Professions ....................... 169
  Credentialing and Regulating Health
    Professionals ................................. 170
Healthcare Occupations .................. 172
  Physicians .................................. 172
  Nursing ..................................... 173
  Registered Nurses ............................ 174
  Licensed Practical Nurses ................. 177
  Nurse Practitioners ......................... 178
  Physician Assistants ........................ 179
  Clinical Nurse Specialists ................ 180
  Dentistry .................................... 180
  Pharmacy ................................... 182
  Podiatric Medicine .......................... 182
  Chiropractors ................................. 183
  Optometry .................................... 183
  Healthcare Administrators ................ 184
  Allied Health Personnel .................... 184
## Contents

### Technicians and Technologists
- Laboratory Technologists and Technicians ........................................... 185
- Radiologic and Magnetic Resonance Imaging Technologists .................. 185
- Nuclear Medicine Technology ................................................................. 186

### Therapeutic Science Practitioners
- Physical Therapy ...................................................................................... 186
- Occupational Therapy .............................................................................. 187
- Speech-Language Pathology .................................................................... 187

### Supporting Services
- Behavioral Scientists .................................................................................. 187
- Social Work ................................................................................................ 188
- Rehabilitation Counselor ........................................................................... 188

### Support Services
- Health Information Administrators .............................................................. 189
- Complementary and Integrative Medicine Practitioners ............................ 189
- Medical Assistant ....................................................................................... 190

### Factors That Influence Demand for Health Personnel
- Changing Nature of Disease, Disability, and Treatment ............................ 191
- Physician Supply ......................................................................................... 191
- Technology ................................................................................................ 191
- Expansion of Home Care ............................................................................ 191
- Corporatization of Health Care .................................................................. 192

### Healthcare Workforce Issues and the Patient Protection and Affordable Care Act
- The Future: Complexities of National Healthcare Workforce Planning .......... 193

### Chapter 8 Financing Health Care .......................................................... 201

#### Healthcare Expenditures in Perspective ............................................. 202
- Waste, Fraud, and Abuse ............................................................................ 207

#### Drivers of Healthcare Expenditures .................................................... 208
- Evolution of Private Health Insurance ....................................................... 209
  - The Rise of Blue Cross and Blue Shield and Commercial Health Insurance 209

#### Transformation of Health Insurance:
- Managed Care .......................................................................................... 210
- Managed Care Backlash ............................................................................ 213

#### Managed Care Today .............................................................................. 214
- MCOs and Quality ...................................................................................... 214

#### Private Health Insurance Cost Trends .............................................. 216
- Self-Funded Insurance Programs .............................................................. 217
- Government as a Source of Payment:
  - A System in Name Only ......................................................................... 217
  - Medicare .................................................................................................. 218
- Medicaid and the Children’s Health Insurance Program .......................... 228
  - Children’s Health Insurance Program ..................................................... 229
- Medicaid Managed Care ........................................................................... 230
- Medicaid Quality Initiatives ...................................................................... 230
- Medicaid Expansion Under the Affordable Care Act ............................... 231
- Disproportionate Share Hospital Payments .............................................. 232
- Healthcare-Financing Mandates of the Affordable Care Act for Individuals and Employers ................................................................. 232
  - The Individual Mandate and Health Insurance Marketplaces ................. 233
  - The Employer Mandate ........................................................................... 234
- The Affordable Care Act: Insurance Coverage Progress and Costs ........ 234
- Continuing Challenges and Innovations .................................................. 235

### Chapter 9 Long-Term Care ................................................................. 245

#### Development of Long-Term Care Services ..................................... 246
- Modes of Long-Term Care Service
  - Delivery .................................................................................................... 250
  - Skilled Nursing Care ............................................................................... 250
  - Assisted-Living Facilities ........................................................................ 252
  - Home Care ............................................................................................. 254
  - Hospice Care ........................................................................................... 258
  - Respite Care ........................................................................................... 261
  - Adult Day Care ......................................................................................... 263

#### Innovations in Long-Term Care
- Aging in Place ........................................................................................... 264
- Continuing Care Retirement and Life Care Communities ........................ 265
- Naturally Occurring Retirement Communities ........................................ 265
- High-Technology Home Care: Hospitals Without Walls ........................ 267
- Long-Term Care Insurance ..................................................................... 267
- Future of Long-Term Care ........................................................................ 268
