Part I Macroeconomic Aspects of Public Finance

2 The Macroeconomic Theory of Fiscal Policy I	29
1 The Simple Keynesian Model	29
1.1 The 45-degree Model	29
1.2 The Fiscal Multiplier	30
1.3 The Multiplier with Tax Rate	31
1.4 The Built-In Stabilizer	32
1.5 The Balanced-Budget Multiplier	33
2 The IS/LM Analysis	34
2.1 The Investment/Saving and Liquidity Preference/ Money Supply Equilibrium Model	34
2.2 The Size of the Multiplier in the IS/LM Model	35
2.3 Extreme Cases of the Zero Crowding-Out Effect	36
2.4 Direct Crowding Out	37
2.5 The Crowding-In Effect	38
3 The Open Economy	39
3.1 Extension to an Open Economy Model	39
3.2 The Fixed Exchange System	39
3.3 The Flexible Exchange Rate System: The Effect of Fiscal Policy	41
3.4 The Flexible Exchange Rate System: The Effect of Monetary Policy	42
3.5 Zero Capital Movement	42
4 The Efficacy of Fiscal Policy and the Policymaker	43
4.1 Three Viewpoints	43
4.2 The Lag of Policy	43
4.3 Lag of Monetary Policy	44
4.4 Lag of Fiscal Policy	44
4.5 Lag and Automatic Stabilizers	45
4.6 Rules Versus Discretion	46
Appendix: Public Investment in Japan	47
A1 Introduction	47
A2 The Efficacy of Public Investment as a Counter-Cyclical Measure	48
A3 Fiscal Policy and the Optimal Size of Public Investment	49
References	50

3	The Macroeconomic Theory of Fiscal Policy II	53
1	The Permanent Level of Fiscal Variables	53
1.1	Definition of the Permanent Level of an Economic Variable	53
1.2	The Government's Budget Constraint	54
2	Consumption and Saving Behavior	56
2.1	Optimization Over Time	56
2.2	The Permanent Income Hypothesis	57
3	The Labor Market and Supply Function	58
3.1	Labor Supply by Households	58
3.2	Labor Demand by Firms	60
3.3	Equilibrium in the Labor Market	61
4	Equilibrium in the Goods Market	62
5	The Effect of Fiscal Policy	63
5.1	Three Cases of Fiscal Expansion	63
5.2	Temporary Expansion	63
5.3	Permanent Expansion A	65
5.4	Permanent Expansion B	66
6	Evaluation of the Public Sector	66
6.1	Substitutability	66
6.2	The Multiplier Effect of Government Spending	67
6.3	Evaluation of Government Spending	68
	Appendix: The Size of Government Spending and the Private Sector's Evaluation	68
	A1 Introduction	68
	A2 Theoretical Considerations	69
	A2.1 Evaluation of Government Spending	69
	A2.2 Optimal Size of Government Spending	71
	A2.3 Optimizing Behavior	71
	A2.4 Indirect Test	72
	A3 Empirical Results	74
	A4 Conclusion	74
	References	75
4	Public Debt	77
1	Ricard's Neutrality Theorem	77
1.1	A Two-Period Model	77
1.2	The Implications of Public Debt Issuance	79
1.3	Debt Issuance in an Infinite Horizon Economy	79
2	The Shift of the Burden to Future Generations	80
2.1	A Two-Overlapping-Generations Model	80
2.2	The Efficacy of Keynesian Policy	81
2.3	The Shift of the Burden	82
3	Barro's Neutrality	82
3.1	The Inclusion of Bequests	82
3.2	A Simple Model with Bequests	83
3.3	Barro's Neutrality Theorem	84

4	Policy Implications of the Debt Neutrality Theorem	85
4.1	Policy Implications	85
4.2	Theoretical Assumptions	86
4.2.1	Perfect Capital Market	86
4.2.2	Lump-Sum Taxes	86
4.2.3	Anticipation of Future Tax Increases	87
4.2.4	Planning Period and Bequest Motive	88
4.3	Empirical Evidence	89
5	The Non-Keynesian Effect	89
5.1	What Is the Non-Keynesian Effect?	89
5.2	The Non-Keynesian Effect in the Real World	90
5.3	Simple Theory of the Non-Keynesian Effect	90
	Appendix: Government Debt in an Overlapping-Generations Model	91
	A1 Introduction	91
	A2 The Basic Model of Overlapping Generations	92
	A2.1 The Consumer Within the Model of Overlapping Generations	92
	A2.2 Production Technology and Capital Accumulation	94
	A3 Government Debt and Intergenerational Transfer	95
	A3.1 The Transfer Program	95
	A3.2 Some Remarks	96
	A3.3 The Burden of Debt	97
	A4 Debt Neutrality with Altruistic Bequests	98
	References	100
5	Economic Growth and Fiscal Policy	101
1	A Simple Growth Model	101
1.1	Long-Run Growth Rate in the Harrod-Domar Model	101
1.2	The Effect of Fiscal Policy	102
1.3	The Incorporation of Public Investment	103
2	Optimal Public Investment	104
2.1	The Role of Public Spending	104
2.2	Public Investment in the Market Economy	104
2.3	Optimal Allocation Between Two Regions	106
2.4	Optimal Size of Public Investment	107
2.5	The Discount Rate of Public Investment	109
3	The Solow Model	110
3.1	Formulation of the Solow Model	110
3.2	Stability of the System	111
3.3	The Effect of Fiscal Policy	112

4	The Endogenous Growth Model	113
4.1	The Optimal Growth Model	113
4.2	The AK Model	114
4.3	Public Investment and Growth Rate	115
5	Inequality and Economic Growth	117
5.1	Income Redistribution and Tax Rate	117
5.2	Externality of Educational Investment	118
Appendix A: Taxes on Capital Accumulation and Economic Growth		118
A1	Introduction	118
A2	The Endogenous Growth Model	119
A2.1	Technology	119
A2.2	The Three-Period Overlapping-Generations Model	120
A2.3	The Altruistic Bequest Motive	122
A3	Economic Growth and Efficiency	122
A3.1	The First Best Solution	122
A3.2	Optimizing Behavior in the Market Economy	123
A3.3	The Circumstance in Which Physical Bequests Are Zero	123
A3.4	The Circumstance in Which Physical Bequests Are Operative	125
A4	Taxes and Economic Growth	126
A4.1	The Constrained Economy	126
A4.2	The Unconstrained Circumstance	127
A5	Conclusion	127
