Introduction and Conclusion
Ariel Dinar and Yacov Tsur

Part I  Economic, Institutional, and Technological Aspects in Management of Transboundary Water Under Scarcity 1

Chapter 1. Closing the (Widening) Gap Between Natural Water Resources and Water Needs in the Jordan River Basin: A Long-Term Perspective 3
Yacov Tsur

Chapter 2. Exploring Benefits and Scope of Cooperation in Transboundary Water Sharing in the Amu Darya Basin 35
Anik Bhaduri and Maksud Bekchanov
Chapter 3. Distributional Impacts of Welfare Allocations from Damming the Nile River
Getachew Nigatu and Ariel Dinar

Chapter 4. Issue Linkage: A Mechanism for Managing Conflict, Applied to the Mekong Basin
Kim Hang Pham Do and Ariel Dinar

Part II Water Treaty Models

Chapter 5. Proposed International Legal and Institutional Framework for Conjunctive Management of Surface and Groundwater along the US–Mexico Border Region
María E. Milanés Murcia

Chapter 6. A New Paradigm for Transboundary Water Agreements: The Opportunity for Israel and Palestine
David B. Brooks and Julie Trottier

Part III Managing and Valuing Water

Chapter 7. Disputes Over International Watercourses: Can River Basin Organizations Make a Difference?
Sabine Blumstein and Susanne Schmeier

Chapter 8. Transboundary Water Management Along the Tagus River Basin in the Iberian Peninsula: Sustainable Water Allocation of the Aqueduct Tagus-Segura
María E. Milanés Murcia

Christine Bismuth and Bernd Hansjürgens

Nir Becker and David Katz
