Processes and Practices of Open Strategy

Dissertation
submitted to the Faculty of Business, Economics and Informatics
of the University of Zurich

to obtain the degree of
Doktor der Wirtschaftswissenschaften, Dr. oec.
(corresponds to Doctor of Philosophy, PhD)

presented by

Felix Werle
from Germany

approved in September 2015 at the request of

Prof. David Seidl, PhD
Prof. Dr. Egon Franck
Table of contents

List of figures ................................................................. V
List of pictures ............................................................... VI
List of tables .................................................................... VII
Notes ................................................................................ VIII
Acknowledgements ........................................................... IX

1 Introduction ................................................................. 1
  1.1 Overview .................................................................... 1
  1.2 Summary of three papers ........................................... 5
  1.3 Contributions to Open Strategy ................................. 11
  1.4 Limitations & Future Research ................................. 13
  1.5 References ............................................................. 15

2 The layered materiality of strategizing: epistemic objects and the interplay between material artefacts in the exploration of strategic topics .............................. 18
  2.1 Introduction ........................................................... 19
  2.2 Literature review .................................................... 20
    2.2.1 Research on the role of material artefacts in strategizing ........ 20
    2.2.2 The theory of epistemic objects ........................... 22
  2.3 Methodology .......................................................... 25
    2.3.1 Research setting ................................................. 25
    2.3.2 Data collection .................................................. 27
    2.3.3 Coding and analysis .......................................... 29
  2.4 First part of findings: types of materiality and their impact on the exploration process ........................................ 30
    2.4.1 Generation of primary partial objects .................... 31
    2.4.2 Primary partial objects structuring the discussions .... 34
    2.4.3 Primary partial objects as means of contextualizing discussion items .. 38
    2.4.4 A typology of different material artefacts in the exploration process ...... 40
  2.5 Second part of findings: shifts between primary partial objects ............................. 41
  2.6 Discussion and contributions .................................... 45
  2.7 Conclusion and future directions ............................... 49
  2.8 References ............................................................. 51

3 Scoping and coalition building in inter-organizational strategizing on metaproblems .................................................. 54
  3.1 Introduction ........................................................... 55
  3.2 Theoretical background ............................................ 56
3.2.1 Collaboration in strategizing ................................................. 56
3.2.2 Strategic sensemaking and the extension of sensemaking capacities .... 58

3.3 Methodology ............................................................................. 60

3.4 Findings .................................................................................... 63
3.4.1 Case 1: Collaborative sensemaking on water ............................. 63
3.4.2 Summarizing case 1 ................................................................. 70
3.4.3 Case 2: Collaborative sensemaking on flexible production negotiating the issue scope for joint exploration with an existing partner ............... 71
3.4.4 Formation of new coalition due to new problem scope .................. 75
3.4.5 Splitting into different coalitions with different problem scopes ...... 77
3.4.6 Summarizing case 2 ................................................................. 77
3.4.7 Towards a process model of inter-organizational strategic sensemaking .................................................................................. 78

3.5 Discussion and conclusion ............................................................ 81
3.5.1 Four central aspects specific to inter-organizational sensemaking ........ 81
3.5.2 Contributions ....................................................................... 84
3.5.3 Limitations and opportunities for future research ....................... 85

3.6 References .................................................................................. 87

4 Opening up the strategy-making process: Comparing open strategy and open innovation ................................................................. 91
4.1 Introduction ................................................................................ 92
4.2 Openness in innovation and in strategy as an aspect of communication ... 93
4.3 Commonalities of open innovation and open strategy ....................... 97
4.4 Differences between open innovation and open strategy .................. 98
4.4.1 Why open? Purpose of openness in innovation and strategy .......... 105
4.4.2 What is open? Content of open innovation and open strategy ......... 107
4.4.3 How open? Modalities of openness in innovation and strategy ......... 108
4.5 Discussion ................................................................................. 109
4.6 Conclusion ................................................................................ 112
4.7 References ................................................................................. 114

Curriculum Vitae ............................................................................. 118
